4.	PUBLIC HEALTH	Health Officer's Report and Vital Statistics	357-555
		License Department Report	557-561
		Market Report and Statements.	563-575
		Return of Street Accidents	576-579
5.	EDUCATIONAL	Report of the Joint Schools Committee	581-595
6.	AUDITORS' REPORT		597-648

Review by the Standing Committee of the Administration Report of the Municipal Commissioner for the City of Bombay for the year 1890-91.

1. *Income.*—It is a source of much satisfaction to the Standing Committee that they are again able to congratulate the Corporation on the condition of the Municipal finances, notwithstanding the fact that in order to provide for the payment of sinking fund and interest on the various loans raised, or to be raised, for the carrying out of the Vehar, Tulsi, Pawai and Tansa Water Works, for Drainage, Market Extensions, and other sanitary works, the Municipality, during the current year, has to provide no less a sum than Rs. 18,08,252-4-10. The opening balance on 31st March 1890 was Rs. 13,31,321-8-3, including the lapsed grant of Rs. 4,77,861-1-5 for 1889-90 renewed during the past year. The total revenue of the year ending 31st March 1891 was Rs. 58,61,182-6-4 or Rs. 4,53,882-6-4 better than the estimate a result due to the enhanced receipts from the taxes on Vehicles and Horses, Water and Halalkhor taxes, Town Duties, Miscellaneous Receipts and interest and profits on invested funds. The increase of Rs. 30,948 from wheel-tax and tolls was nominal only, and is accounted for by the facts, that the outstandings of the previous twelve months were Rs. 9,500 higher than in 1889-90, and that Rs. 35,000 additional for public conveyances, were recovered, because the tax was levied last year for 21 months, *i.e.* from April to December 1890, and for the whole of the calendar year 1891 (in order to obviate a discrepancy between the dates of collection under the Municipal Act and the Public Land Conveyance Act), instead of for the official year ending 31st March 1891. As a matter of fact, there was really a falling off of Rs. 1,000 in tolls, and of Rs. 3,000 in the tax on private carriages. By far the largest increase was that from Town Duties, Rs. 1,72,519, due to the greatly increased consumption of sugar and ghee. On this point it is interesting to note that the importation of sugar, principally the cheap German beet-root, was the largest on record. No less than Rs. 2,78,186 were refunded for duty on this kind of sugar exported for consumption up-country. Halalkhor and Water-taxes yielded Rs. 15,622 and Rs. 68,098, respectively, above the estimate. Of the large increase under Water-

tax, Rs. 68,098, more than half, Rs. 38,861 was on account of interest and profit on the Tansa loan interest account. The other increases included Rs.7,441 from Licenses, &c., Rs. 14,984 from Tobacco duty, Rs. 23,371 from Public Gardens, Rs. 43,259 from Miscelleneous Receipts (sale of land, rent of reclaimed ground,. rent of chawls, Fire Brigade stations, &c.), and Rs. 1,30,456 from interest and profit on loan and reserve fund investments. In framing the estimates, the interest on loan and reserve funds was taken at Rs. 55,850. The actual yield, however, was Rs. 1,36,173-8-2, or Rs. 80,323-8-2 more than the estimate, while a profit of Rs. 50,132-14-0 was also made out of the sale, &c., of Government paper belonging to the surplus cash, and other investments. The method by which during the course of the year it was found practicable to make this large profit, was by paying loan charges, as far as possible, from available balances and the selling out invested funds to recoup the advances on the most favourable opportunities. There was a nominal profit of Rs. 72,175 on the adjustment of the stock returns, but in accordance with a recommendation made by Government, this item is shown separately as it cannot be treated as one of revenue.

2. *Expenditure.*—The total sanctioned expenditure (apart from loan works) was, including the lapsed grants renewed as mentioned above, Rs.65,64,924-13-6,of which Rs. 10,11,893-5-5 remained unexpended, the net expenditure being Rs. 55,53,031-8-1. Out of this unexpended amount, however, Rs. 5,49,481-8-7 representing the cost of unpaid liabilities and of works deferred are required during the current year, so that the actual saving on the estimates was Rs. 4,62,411-12-10. Of this saving, Rs. 1,70,115 were in the Engineer's Department, including lighting and other charges, Rs. 59,504 on new works, Rs. 76,915 on Health Department, and Rs. 83,936 on debt charges—chiefly owing to the postponement of the taking up of loans. As compared with the actuals of the previous year, the expenditure was greater under all items except miscellaneous,. and the net increase was Rs. 5,10,626. From a statement on page 10, it appears that the expenditure during the last five years on Tansa and other water works, sewerage, minor sanitary works, drainage, roads, and markets was Rs. 1,63,47,505-10-0.

The gross payments on account of Municipal Debt amounted to Rs. 15,52,138-7-5 ; of this sum, Rs. 12,09,960-14-6 was on account of interest and charges on loans and

Rs. 3,42,177-8-11, on account of repayment of Capital. The interest on Water Works Loans was Rs. 8,05,038-12-6 and on other loans Rs. 3,97,174-14-2. On Tansa Works Loans the interest paid during the year amounted to Rs. 4,60,530-7-11.

3. *Assets and Liabilities.*—The assets at the close of the year were estimated at Rs. 4,93,37,380-10-10 made up as follows:—Investments, Loan Funds and Building and Sinking Funds, Rs. 84,22,379-14-1 ; Advances, departmental and to contractors, Rs. 2,59,050-7-1 ; Municipal property (1) land and buildings, Vehar, Tulsi, Pawai, Tansa and other Water Works, Rs. 3,12,62,859-9-8; (2) roads, bridges, and other improvement works, Rs. 76,39,217-0-9 ; (3) Stock, Rs. 17,53,873-11-3. The liabilities are shown at Rs. 3,42,56,265, namely, Rs.3,28,54,981-12-6 on account of loans, Rs. 13,69,570-11-10, deposits by contractors, &c., and Rs. 31,712-7-8, adjustment items. According to these figures, the value of the assets over the liabilities was Rs.1,50,81,115-10-10.

4. *Valuation.*—The number of properties on the Assessment book at the close of the year was 50,873, an increase of 448 in the year, of which only 37,839 were assessed to the general tax, 5,358 being exempted or compounded for, and 7,676 being small plots of unproductive land for which no bills are issued. The total valuation of these properties was Rs. 2,82,27,355, of which Rs. 2,27,69,337 only was chargeable with the General Tax. During the year, the valuation was increased by Rs. 8,62,996. The total number of bills for collection was 79,746, amounting to Rs. 35,46,223-8-1. The Committee regret to find that the outstandings amounted to Rs. 4,15,800-10-1 in respect of 6,294 bills. These were chiefly on account of disputes regarding water and halalkhor taxes and the one-fifth drawback. This total, however, had, by the 10th of last month, been reduced by Rs. 1,79,640-0-8, but important questions connected with the levy of the Halalkhor tax, due to the changed conditions of the new Municipal Act, are still under litigation. There were only 13 appeals to the Chief Judge of the Court of Small Causes, of which 3 were allowed, 3 dismissed and 7 settled by consent. The Revenue and Audit Department was organized during the year and page 22 contains an account of its work.

5. *Defalcations in the Assessment Department.*—The Municipal Commissioner in the introductory part of his report refers to two frauds discovered in the Assessment

Department, both of which were committed by Ward Clerks. In one case, that of Jamsetji Muncherji Hakim, defalcations were discovered to the extent of Rs. 31,891. The Ward Clerk was convicted and sentenced to 3 years' rigorous imprisonment. The Commissioner made a report, dated the 24th September 1890, regarding the defalcations and applied for additions to Ward Establishments and Revenue and Refund Audit Department, amounting to Rs. 600 per month or Rs. 7,200 per year. The Corporation appointed a Committee of its body to investigate and report on the questions referred to in the Commissioner's report and sanctioned, pending the presentation of such report, the employment of the extra establishment. Another fraud was discovered in the Assessment Department, by Manekji Adarji. In this case the defalcations amounted to Rs. 582. The man is still at large, though a warrant has been issued for his apprehension.

6. *Water Works.*—Important progress was made with the Tansa Water Works, and by the end of the year the dam, which contains 11,000,000 cubic feet of masonry, was practically completed. The rainfall was 105·93 inches, against an average during the previous five years of 103·33, and on 31st March the level of the impounded water was 378·51 R.L. or only 1′ 49″ beneath the sill of the lowest outfall sluice, and at the present time, as the Corporation are aware, the lake is level with the top of the waste weir. On the duct works, the tunnelling had all been completed on 31st March except about 900 lineal feet, whilst the 23 miles of masonry conduits were nearly finished. The laying of the 48″ mains on the syphon tracks except on track No. 1, approached completion, and all the pipes required for the project except a small number of special castings, were tested and passed in England. The laying of the main from Ghat Kopar to Arthur Road has involved difficulties, and the contractors, Messrs. Sittaram Luximon, not being able to cope therewith, the progress of this portion of the work is not saisfactory. There is, however, no reason whatever to suppose that the work will not be completed within the contract period. The revised estimates of the whole scheme already sanctioned by the Corporation amount to Rs. 1,47,00,000, but a further excess of Rs. 1,50,000 has now been reported to the Committee. The rainfall at all the lakes was very heavy. At Pawai the water from the new lake was pumped during the

monsoon with satisfactory results. The repairs of the Malabar Hill and John Hay Grant reservoirs, intended to stop the leakages therefrom, made satisfactory progress, and it may be expected that when these are completed the leakage will be reduced to a minimum, if not altogether stopped. Twenty-eight thousand feet of new mains were laid in various localities, and 6,115 feet of old pipes relaid. The total number of connections with the mains was 17,634, of which 736 were added during the year.

7. *Drainage.*—Adverting to the question of drainage, the Commissioner reports that the pumping engines at Love Grove were worked satisfactorily on the whole, although at an enormous consumption of coal. The Committee appointed by the Corporation to enquire into the whole question have reported, and the Corporation have, quite recently, sanctioned the purchase of new pumps and engines. The construction of house connections for the Agripada district was entrusted to Mr. Sittaram Luxomon, and satisfactory progress is being made therewith. As to the future of the drainage, the Committee concur generally in the remarks of the Commissioner on the subject, but considering it is a settled thing that the Colaba outfall is practically impossible, it has been their duty to recommend bringing the Love Grove outfall arrangements to a proper state of efficiency by the supply of new pumping engines. It is all the more satisfactory to the Committee, therefore, to find that Government under date of the 15th instant has decided that the outfall must be retained at Warli.

8. *Building By-laws.*—Serious disasters occurred from the fall of faultily constructed buildings resulting in the death of 44 persons and the injury to 32 others, and as it was shown during the course of the enquiries into these accidents, that building by-laws are urgently needed in the public interest, the Committee earnestly hope that when the by-laws which have now been approved by the Corporation are passed into law, they will be found sufficient to enable the building department to exercise a proper amount of control in regard to the quality of materials and the stability of structures.

9. *Fire Brigade.*—The duty of selecting an officer for the head of the Bombay Fire Brigade was kindly undertaken by Captain Shaw, C.B., the late chief of the London Fire Service, who selected Mr. Nicholls. This officer entered upon his duties on 1st September 1890, and has ever since been busily

engaged in organizing the Brigade, which now numbers 137 officers and men, with 7 steam fire engines, 7 manuals and 3 fire escapes; as the cost of the brigade for 1890-91 was estimated at Rs. 1,50,000, and the Corporation have sanctioned the building of new quarters and fire stations at a cost of Rs. 4,50,000, and have likewise made a grant for the purchase of two new engines and plant, the brigade should speedily become efficient.

10. *The Public Health and Vital Statistics.*—Notwithstanding the unhealthiness of portions of the season, it is gratifying to observe that the deaths from all causes were only 20,534, or a decrease of 2,844 as compared with the figures for the previous year, the average of the five previous years being 21,384. The death-rate was 25·35 per 1000. There was a decrease in the mortality from small-pox, measles, cholera, diseases of the respiratory system, diarrhœa and dysentery. On the other hand, there was an increase in the deaths from fevers, phthisis, diseases of the nervous system and accidents. In spite of an epidemic of influenza, the mortality from the chief causes of death was less than in the year before, and, on the whole, the public health was better. The number of deaths from cholera was only 102, from small-pox 150, measles 179, fever 6,489, phthisis 2,728, diseases of the nervous system 1,936, diseases of the respiratory system 3,335, diarrhœa 905, dysentery 507, accidents 397, and all other causes except still-born, 3,806. The death-rate from fever was the greatest in the districts of Parel, Byculla and Mahaluxmi. The Corporation will remember that the Committee which they appointed in November 1889 to consider the increasing mortality from this cause, attributed it to imperfect drainage, absence of drainage, imperfect conservancy, street nuisances, the bad state of private lanes, overcrowding, the presence of milch cattle stables, and the disposal of town-sweepings on the Flats. The complete absence of drainage in Colaba and Malabar Hill necessitates the use of cess-pools, the increasing number of which is becoming a serious nuisance; whilst the removal, or rather partial removal, of the contents of the pools is a severe tax on the Health Department. The only remedy is the construction of drains, for it is impossible to remove in a very limited number of carts all the filthy water placed in the cess-pools. The very high mortality from fevers in Parel is, in some measure, due to the expansion of the population and

to the absence of drainage. The highest mortality by class, occurred among a small and fluctuating community, Negro-Africans, the ratio being 33·38 per 1,000. The lowest mortality was amongst Europeans (1·43). At page 386 of his report, the Health Officer states that there were 45 deaths from leprosy, or 25 less than the average. With the segregation of lepers in the excellent Home at Matunga, and therefore the more correct registration of these unfortunate out-castes, Dr. Weir hopes that in the future more exact information will be obtainable in the matter, the number of deaths now registered from leprosy and the ills which accompany that dreadful disease, being probably far below the actual number.

The birth returns show the usual discrepancy between births and deaths 15,386, exclusive of still-borns, as against 15,943 for the preceding year, but in the opinion of the Health Officer these figures may be regarded as fairly correct, having regard to the last Census returns which establish the fact of the vast preponderance of the male over that of the female population of Bombay.

11. *Work of the Health Department.*—As to the work performed by the Health Department, on an average 4,129 men and women, 788 scavenging, and 166 night-soil and cess-pool carts were employed daily. 309,482 tons of garbage or cutchra, equal to 847 tons a day, were collected and removed, as also 131,836 tons of night-soil, equal to 361 tons per diem. 192 miles of covered drains were opened and cleaned. The total expenditure on the department was Rs. 11,55,118-3-9. As, however, the department earned Rs. 6,34,478-14-5, its actual cost was but Rs. 5,20,639-5-4.

12. *Markets.*—As usual, the public markets were well supplied with vegetables and fruits, and fairly well with mutton, but the supplies of fish and beef were below the average. Sixty-six tons of meat, fish, rice, and sugar were destroyed as being unfit for human food. The revenue from markets and slaughter houses was Rs. 3,48,106, an increase of Rs. 18,936.

13. *Joint Schools Committee.*—The first report of the Joint Schools Committee is included in the Commissioner's Report. There were 130 schools under the Committee with 6,134 pupils, a proportion of children which is manifestly far below what it should be.

The report, which sets forth the insanitary condition of many of the schools, and places before the Corporation the

grounds on which that Committee base their case for a largely increased expenditure, deserves the careful consideration of the Corporation.

14. *Municipal Servants Act.*–In reference to Government Resolution No. 1713, General Department, dated 14th May 1891, it should be mentioned that no prosecution has yet been found necessary under the Municipal Servants Act No. V. of 1890. Copies of the Act are furnished to all servants affected thereby.

15. *Report of the Municipal Auditors.*—The Annual Report of the Auditors, dated 8th instant, supplies a good deal of useful information regarding the details of Income and Expenditure, particularly in the matter of comparison with the receipts and disbursements for the preceding year and regarding the accounts of the Joint Schools Committee.

Especial attention is drawn by the Auditors to the questions of the expenditure under discretional contingencies and lapsed grants, and to the subject of stamped signature attached to bills for rates and taxes, as to the objectionable practice of submitting duplicate instead of the original bills for private works, which have to be written off as irrecoverable, and also to vouchers for work done in the Workshops on account of loan works, and works constructed out of loan works, &c., being sent in without any details as to quantities and rates charged, by which the Auditors would be enabled to compare the quantities and rates with the sanctioned estimates.

In accordance with the terms of Section 124 (3) of the Municipal Act, the Standing Committee direct that all the appendices attached to the reports of the several heads of departments, as received from the Commissioner, be circulated with his report for the information of the Corporation.

The foregoing "Review" is circulated to Municipal Councillors as directed by Section 124 (3) *of the Municipal Act III. of* 1888.

E. B. CARROLL,
Chairman of the Standing Committee.

23*rd September* 1891.

MUNICIPAL CORPORATION.

ADMINISTRATION REPORT

OF THE

MUNICIPAL COMMISSIONER.

Annual Administration Report of the Municipal Commissioner for the City of Bombay for the year 1890-91.

Introductory.

I held the appointment of "The Municipal Commissioner for the City of Bombay" from the 1st May 1890, having relieved Mr. Ollivant who held the appointment up to the end of April.

2. Some of the principal events of the year may be here noted. The Pawai Reservoir was completed before the commencement of the monsoon of 1890, and it was at once brought into use. The analysis of the water drawn from it showed that it was of fair quality. The revision of the assessment on Government properties was entrusted to Mr. Stevens, C.I.E., but his report had not been received at the close of the year.

3. Two frauds were discovered in the Assessment Department, both of which were committed by ward clerks. In one instance, that of Jamsetji Muncherji Hakim, defalcations to the extent of Rs. 31,891 were discovered. The ward clerk on conviction at the Sessions was sentenced to 3 years' rigorous imprisonment. In the other instance, that of Manekji Adarji, the defalcations amounted to Rs. 582. This ward clerk has not yet been arrested, although a warrant for his apprehension was obtained in February.

4. The enumeration of the population of Bombay, for which preparations had previously been in progress, took place on the night of the 26th February 1891. Until the whole of the clerical work is completed, the correct number of the population cannot be given, but it is roughly estimated at over 8,20,000.

5. The Bombay Municipal Servants Act, which had been under consideration by the Corporation, came into force on the 15th January 1891, but prosecutions under it have not yet been found necessary. Copies of the Act were duly furnished to all Municipal servants affected thereby.

6. A leper home at Matunga to accommodate 200 to 300 lepers was erected by public subscription, and towards its main-

tenance the Corporation sanctioned the sum of Rs. 1,000 per mensem, Government also contributing a like sum. A further sanction was made by the Corporation of Rs. 10 per head when the lepers numbered over 200 and up to 300, which has been supplemented by a further contribution of Rs. 500 a month by Government.

1.—Corporation and Standing Committee.

7. Mr. Muncherji Kavasji Murzban, F.R.I.B.A., ASSOC. MEM. I.C.E., was elected President of the Corporation at the meeting held on the 11th April 1890, and he held the appointment until the 31st March 1891.

8. Eighty-seven meetings of the Corporation were held, and one more was convened, but not held for want of a *quorum*. Besides these, forty-two Committee meetings were held, and three others convened but not held for want of a *quorum*.

9. The changes in the personnel of the Corporation were as follows :—

Mr. J. P. Watson was appointed by Government on the 14th April 1890, in place of Mr. J. Alston, who had resigned on the 18th March.

Mr. R. Gilbert resigned on the 12th April, and in his stead Government appointed Brigade-Surgeon S. O.'B. Banks on the 24th April.

Mr. K. M. Shroff resigned on the 29th April, and the rate-payers elected in his place Mr. B. S. Shroff on the 29th May.

Mr. H. R. King proceeded to Europe on the 18th April, while on his return voyage he died off Aden on the 7th July. Colonel Wilson was appointed by Government on the 18th July in his place.

Major H. O. Selby resigned on the 7th July, and the rate-payers elected in his stead Mr. Cowasjee Pestonjee on the 29th July.

Mr. Muncherji N. Banaji died on the 25th October, and the rate-payers elected on the 21st November Mr. K. M. Shroff in his stead.

Mr. Raghunath N. Khote resigned on the 3rd November, and Government appointed in his place Mr. R. Gilbert on the 1st December.

Dr. E. F. Underwood resigned on the 24th December, and Mr. Hormusji Coorlawalla was elected in his stead by the rate-payers on the 23rd January 1891.

Mr. A. M. Gubbay resigned on the 26th January 1891, and Government appointed Mr. S. Nathan on the 4th February in his stead.

Mr. J. R. Duxbury left for England on 12th April, and returned on the 14th July 1890.

Mr. Grattan Geary left for England on the 11th May, and returned on the 11th December 1890.

Captain Sir Henry Morland, Kt., was absent from Bombay from 30th November 1890 to 26th January 1891, and from 6th February to 10th March 1891.

Captain Sir Henry Morland, Kt., was appointed Chairman of the Standing Committee at the meeting held on the 2nd April 1890, and he held the appointment throughout the year 1890-91.

10. During the same period the Standing Committee held 53 meetings, including one attendance at the Pawai Water Works. There were also 8 Sub-Committee meetings and one hundred and ninety-four attendances for cheque-signing and for the audit of the weekly statement of accounts.

The changes in the personnel of the Standing Committee were as follows :—Major H. O. Selby resigned on the 7th July, and in his stead Mr. K. N. Kabraji was elected on the 24th July by the Corporation.

Mr. Muncherji N. Banaji died on the 25th October and the Corporation elected in his stead Captain Walshe on the 10th November.

11. On the occasion of the landing in Bombay on 10th April 1890 of H. E. the Right Hon'ble Lord Harris, G. C. I. E., the Governor of Bombay, the Corporation presented His Lordship with an address of welcome, and two days later, the Corporation presented a farewell address to the Right Hon'ble Lord Reay, G.C.S.I., G.C.I.E., at the close of his 5 years of office as Governor.

II.—Heads of Departments.

12. Mr. W. Clerke, Executive Engineer, Tansa Works, was granted special leave on full pay (in accordance with his agreement) from 21st June to 2nd November 1890, and Mr. T. C. H. White, Deputy Executive Engineer, Tansa Works, was in charge of the works without extra pay.

13. Dr. T. S. Weir, the Health Officer, was on 3 months' privilege leave from 13th September to 12th December 1890, and Dr. K. R. Kirtikar acted for him.

14. Mr. R. P. Brunton, Assessor and Collector, was on 6 months' leave on full pay, as a special case, from 1st June to 30th November 1890, and Mr. W. Pearson acted for him.

15. Mr. Sorabji Navaroji Cooper, Chief Accountant, was on 50 days' privilege leave from 1st September to 20th October 1890, and Mr. Manekshaw Kavashaw Talyarkhan, Deputy Accountant, acted for him.

16. Rao Bahadur Virprasad Tapiprasad was on 1 month's privilege leave from 4th May to 3rd June 1890, and again on 2½ months' privilege leave from 17th December 1890 to 3rd March 1891, and Mr. Pheroshaw Rustomji acted for him on both occasions.

III.—Financial.

17. The opening workable balance (including recoverable advances and excluding deposits and minor adjustment items) was Rs. 13,31,321-8-3 or Rs. 8,31,321-8-3 more than the budget estimate. Of this amount, the sum of Rs. 4,77,861-1-5 represents the unexpended balance of lapsed grants for 1889-90 renewed in 1890-91. The remainder Rs. 3,53,460-6-10 not having been appropriated during the year now under report, formed part of the opening balance of 1891-92.

18. The revenue exceeded that of 1889-90 by Rs. 5,19,012-11-7. It fell short of the estimates under certain heads by Rs. 61,460-4-9, and under other heads it was better than the estimate by Rs. 5,15,342-11-1. The total revenue of the year was Rs. 58,61,182-6-4, which is Rs. 4,53,882-6-4 better than the estimate. This excess was principally

obtained from Tax on Vehicles and Animals, Halalkhor Tax, Water Tax &c., Town Duties, Miscellaneous Receipts, and interest on invested funds. Of the above excess revenue, Rs. 1,20,000 have already been taken credit for in the current year's budget.

19. The total grants sanctioned for expenditure during the year amounted to Rs. 65,64,924-13-6 as shown below :—

	Rs.	a.	p.
Originally sanctioned in the Budget	58,00,194	0	0
Lapsed grants renewed	4,77,861	1	5
Additional grants sanctioned	2,86,869	12	1
Total sanctioned...Rs.	65,64,924	13	6
Deduct—Spent.....Rs.	55,53,031	8	1
Balance (expenditure less than sanctions)...Rs.	10,11,893	5	5

This balance includes the sum of Rs. 5,49,481-8-7 on account of unpaid liabilities of the year.

The amount actually available for further requirements is as shown below :—

	Rs.	a.	p.	Rs.	a.	p.
Workable closing balance (including recoverable advances, &c., and excluding deposits and other minor adjustment items)				17,29,269	14	4
Deduct—						
For renewal of lapsed grants ...	5,49,481	8	7			
Appropriated in Budget, 1891-92 (including the 1 lakh required by law)	4,30,000	0	0			
				9,79,481	8	7
Actually available ..... Rs.				*7,49,788	5	9

20. The following tables **A** and **B** show the main heads of Revenue and Expenditure as compared with the Budget Estimates for 1890-91 and the Actuals for 1889-90 :—

* Of this amount, Rs. 48,206-8-3 have been utilized up to date for extra grants and about 2½ lakhs have been, pending final decision of the Corporation, advanced for Victoria Garden improvements, filling in Sewri Cemetery and survey for pipe sewers in Oomercarry and other districts.

21. From Statement **A**—Revenue—it will be observed that the General Tax yielded Rs. 28,580-11-4 more than in the previous year, but it was less by Rs. 36,322-12-0 than the budget estimate, owing to the outstandings of this tax being nearly ¾ths of a lakh larger than those of the previous year. The Water and Halalkhor Taxes yielded, respectively, Rs. 68,098-2-3 and Rs. 15,622-2-0 more than the budget estimates and Rs. 70,699-9-11 and Rs. 53,303-0-9 more than in the preceding year. The increase of Rs. 30,947-15-4 under Tax on Vehicles and Animals and Toll Fees is not an actual increase, for, owing to the tax on public land conveyances having been first levied for 9 months from April to December 1890, and then for the whole of the calendar year 1891, instead of for the official year ending 31st March 1891 as hitherto, an increase of nearly Rs. 35,000 is thus arrived at. There was really a falling off of Rs. 1,000 on Tolls and of Rs. 3,000 on Private Conveyances.

Town Duties realized Rs. 1,72,519-10-1 more than the estimate, owing to the importation of sugar and ghee being larger than anticipated. For presumably a similar reason there is an increase of Rs. 14,983-15-9 on Tobacco Duty. The decrease of Rs. 10,638-1-4 in the latter duty over the actuals of 1889-90 is due to the collections of the past year having been shown after deducting from the gross receipts the establishment, &c., charges incurred by Government.

The decrease of Rs. 8,723-15-4 in Market Receipts is due to the full estimated amount of slaughter fees not being realized, and to a number of stalls in the Erskine Road Market remaining vacant.

The receipts from returns from property and miscellaneous were higher than the estimate by Rs. 1,96,757-4-3, principally owing to interest having been realized on the invested funds in excess of the estimate, to advantageous sale of Government paper in which the surplus cash, &c., had been invested, and to increased receipts from Public Gardens. Except the decrease under Tobacco Duty Collections explained above, the revenue under every head was more than that of the preceding year. The net increase over the actuals of 1889-90 was Rs. 5,19,012-11-7.

22. On referring to Statement **B**—Expenditure—it will be observed that the actuals have in all cases been less than the estimate, leaving an unexpended balance of Rs. 10,11,893-5-5 at the end of the year. Out of this sum, Rs. 5,49,481-8-7, representing the cost of unpaid liabilities and of works deferred, are required during the current year. The actual saving on the estimates is, therefore, Rs. 4,62,411-12-10, which has been principally caused on the following items : Engineer's Department—saving on purchase of materials, cart hire, and labour (including Water Works), Rs. 1,23,888 ; Lighting, Establishment and other charges, Rs. 46,227; Rs. 59,504 on new Works; Health Department—savings due to the maximum strength of the scavengering and drain-cleaning, and halalkhor, &c., staff not having been employed, Rs. 63,604 ; establishment and other charges, Rs. 13,311, and Rs. 83,936 on Municipal debt. As compared with the previous year's actuals, the expenditure for the year under report was greater under all items except miscellaneous. The net excess of expenditure over the previous year's account was Rs. 5,10,626.

23. The following statement exhibits the expenditure during the last five years on the principal loan works in progress :—

9	The Miscellaneous Works Loan of 1888 and 1889 (Drainage and Water Works, Markets and Roads) of 33,00,000	10,08,900 0 0	.....	10,08,900 0 0	††	10,08,900 0 0	50,425 0 0	50,425 0 0	¶ The Sinking Fund for this Loan will be set apart from 1893, i.e., after the completion of the works as per conditions of the Loan.
10	Agripada House Suluage Water Connections Loan of 2,45,000 of 1889 and 1890	84,000 0 0	a 1,54,000 0 0	2,48,000 0 0	††	2,48,000 0 0	9,773 0 2	9,773 0 2	** In addition to the above the interest of Rs. 28,38 realised during 1890-91 on the Tansa interest invested fund has been added to that fund to meet interest payments in future years.
11	Sir Lakhs Various Sanitary Works Loan 1890	.....	a 34,47,000 0 0	34,47,000 0 0	††	34,47,000 0 0	27,272 9 0	27,272 9 0	§ If from this sum the interest, amounting to Rs. 12,250-0-3, received on the Tansa Loan investment during 1890-91 and credited against the payment of interest, were deducted, the net payment would amount to Rs. 4,48,140-5-3, of which Rs. 23,286-14-3 were met out of the Tansa Interest Invested Fund.
	TOTAL OF LOANS RAISED FROM THE PUBLIC..Rs.	1,20,80,900 0 0	61,01,000 0 0	2,81,81,900 0 0	85,000 0 0	2,80,46,900 0 0	9,44,388 9 1	10,29,863 9 1	†† Under the terms of these Loans the bonds could not be repaid to the holders before the dates stipulated in the debentures, the Sinking Fund has been invested as under :—
	GRAND TOTAL ..Rs.	2,05,18,294 2 0	61,01,000 0 0	3,57,19,864 3 0	b 2,93,530 15 2	c 3,54,27,864 3 10	12,69,215 14 9	15,61,746 13 11	a Balance of this Loan .....
									b This amount, together with Rs. 80,177-9-9, set apart as Sinking Fund during 1890-91, brings up the total disbursement for that year on account of repayment of Capital to Rs. 3,73,177-3-11.
									c Balance of Rs. 1,50,150-13-10 received as net proceeds from Loans No. 12,289-9-2 in 1890-91 were added, the total balance would amount to Rs. 3,95,50,981-12-11.
									d If to this amount the sum of Rs. 38,861-4-11 paid on account of Tansa Loan Interest Investments (vide note **), Rs. 63-7-11 paid on account of interest on the Local Loans (vide note), and Rs. 7,47-3-10 on account of Bank Commission and Advertisement charges, &c., on different Loans were added and Rs. 12,289-9-2 received on account of interest on the Tansa Loan Investment (vide note ‡) and Rs. 23,286-14-3 paid out of the Tansa Interest Invested Fund were deducted, the total payments would aggregate Rs. 12,69,360-14-6.

26. The revenue, expenditure, and balances of the past five years have been contrasted in the following table :—

	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	49,01,815	51,66,530	49,66,192	53,42,170	58,61,182
Expenditure	41,76,362	58,12,690	52,01,258	50,42,405	55,53,032
Closing balance (including recoverable advances to loan works, &c., and excluding minor deposits, &c.)	20,58,938	13,64,599	11,26,056	13,31,322	17,29,270
Add—Recoverable Revenue outstanding	90,000	1,10,000	1,60,000	2,90,000	3,50,000
	21,48,938	14,74,599	12,86,056	16,21,322	20,79,270
Deduct— Uncompleted works, &c., for which grants had to be renewed in the following year	11,42,824	5,25,941	4,05,084	4,77,861	5,49,482
Net workable balance available for requirements of the following year	10,06,114	9,48,658	8,80,972	11,43,461	15,29,788

IV.—Assessment and Collection of Revenue.

Registration of Properties.

27. The number of properties on the Assessment Book at the close of 1890-91 was 50,873 against 50,425 in the previous year, or an increase of 448. The details are contrasted in the following table :—

Years.	Classification of properties according to description,					Classification of properties according to liability to pay General Tax.			
	Buildings.	Salt-pans.	Cocoa-nut plantations.	Vacant lands including tanks, &c.	Total.	Number assessed to General Tax.	Number exempt or compounded for on special terms.	Small plots of unproductive land for which no bills are issued.	Total.
1	2	3	4	5	6	7	8	9	10
1889-90..	33,106	199	1,273	15,847	50,425	37,365	5,318	7,742	50,425
1890-91..	33,393	199	1,273	16,008	50,873	37,839	5,358	7,676	50,873

In the year under report, 388 buildings were demolished, while 675 new buildings were erected and 161 existing properties were subdivided.

Valuation.

28. The recorded gross value of these properties for the year under report is shown in the following table in contrast with that of the preceding year :—

Closing valuation of 1889-90.	Opening valuation for 1890-91.	Valuation after complaint.		Subsequent amendments.		Closing valuation of 1890-91.				Increase.
		Number of complaints.	Amount after disposal of complaints.	Reductions.	Enhancements.	Valuation chargeable with General Tax.	Valuation exempt from General Tax.	Valuation for which no General Tax bills issued.	Total.	
1	2	3	4	5	6	7	8	9	10	11
Rs. 2,73,64,359	Rs. 2,77,02,300	2,009	Rs. 2,75,95,575	Rs. 3,95,382	Rs. 10,27,162	Rs. 2,27,69,337	Rs. 54,40,198	Rs. 17,820	Rs. 2,82,27,355	Rs. 8,62,996

The increase in column 11 is thus accounted for :—

		Rs.
1.	Rise in rents and correction of under-assessments	1,70,220
2.	Erection of new buildings	4,85,643
3.	Enlargements	2,07,133
	Rs....	8,62,996

Property Taxes.

29. The following comparative tables show the increase in Property Taxes :—

(1) GENERAL TAX.

1889-90.			1890-91.				
8½ per cent. on rateable value.	Compounded sum payable by Government and Port Trust.	Total.	8¾ per cent. on rateable value.	Compounded sum payable by Government.	Compounded sum payable by Port Trust.	Total.	Increase.
1	2	3	4	5	6	7	8
Rs. a. p. 14,56,345 3 0	Rs. a. p. 2,23,177 0 0	Rs. a. p. 16,79,522 3 0	Rs. a. p. 15,64,710 1 7	Rs. a. p. 50,000 0 0	Rs. a. p. 1,79,265 5 0	Rs. a. p. 17,93,975 6 7	Rs. a. p. 1,14,453 3 7

Of the increase in column 8, the sum of Rs. 49,827-13-11 is due to the additional tax of ¼ per cent., and the balance to

increase in the value of properties. The amount of General Tax on properties exempt under Section 143 of the Act does not appear in the above table. This amount, as contrasted with that of the previous year, is as follows :—

	Rs.	a.	p.
1889-90	4,13,282	2	9
1890-91	4,28,415	10	6

(2) WATER TAX.

1889-90.				1890-91.				Increase.
On Value.	Compounded.	On Meter Measurement.	Total.	On Value.	Compounded.	On Meter Measurement.	Total.	
1	2	3	4	5	6	7	8	9
Rs. a. p. 5,66,877 13 9	Rs. a. p. 15,992 4 11	Rs. a. p. 5,21,451 1 1	Rs. a. p. 11,04,321 3 9	Rs. a. p. 5,94,669 4 3	Rs. a. p. 14,944 14 2	Rs. a. p. 5,17,884 13 2	Rs. a. p. 11,27,498 15 7	Rs. a. p. 23,177 11 10

(3) HALALKHOR TAX.

1889-90.			1890-91.			Increase.
On Value.	Special Service.	Total.	On Value.	Special Service.	Total.	
1	2	3	4	5	6	7
Rs. a. p. 4,49,280 13 9	Rs. a. p. 69,292 14 4	Rs. a. p. 5,17,573 12 1	Rs. a. p. 4,88,916 8 6	Rs. a. p. 65,507 0 8	Rs. a. p. 5,54,423 9 2	Rs. a. p. 36,849 13 1

The total demand, on account of property taxes for 1890-91, amounted to Rs. 34,75,897-15-4, to which must be added Rs. 18,918-2-5, demands on account of previous years, making a total demand of Rs. 34,94,816-1-9 as against a total demand of the previous year of Rs. 33,96,498-3-9.

Collection.

30. From the total demand for the year, a sum of Rs. 16,605-0-7 was allowed as drawback, under Section 158 (2) of the Act, and the sum of Rs. 2,29,265-5-0 was the amount payable by Government and the Port Trust. For the recovery of the remainder, bills were issued as under:—

Years.	Bills issued.		REMARKS.
	No.	Amount.	
		Rs. a. p.	
1886-87	4	76 2 0	
1887-88	8	240 0 0	
1888-89	13	530 3 6	
1889-90	303	18,071 12 11	
Total....	328	18,918 2 5	
1890-91	74,121	32,30,027 9 9	
Total....	74,449	32,48,945 12 2	

31. The outstanding balance on account of Property Taxes at the end of 1889-90, as shown in the report for that year, was 5,297 bills amounting to Rs. 2,97,277-12-9. Consequently the total number of bills of all years for collection in 1890-91 was 79,746 amounting to Rs. 35,46,223-8-11 as against 80,051 bills amounting to Rs. 33,40,439-6-5 for 1889-90.

At the end of the year under report the total outstanding was 6,294 bills for Rs. 4,15,800-10-1. This large outstanding is due chiefly to bills disputed on account of water and halalkhor taxes, and one-fifth drawback. Included in the above amount is the sum of Rs. 25,552-1-5 due by the Port Trust and pending the settlement of the assessment of the Trust's properties, and also the sum of Rs. 32,474-1-8 on account of the defalcations of two ward clerks. Up to the 10th August the sum of Rs. 1,79,640-0-8 of the outstandings had been recovered. Important questions connected with the Halalkhor Tax are still under litigation.

32. The following table gives details of the amounts which had to be collected during the year 1890-91 :—

Taxes.	To be Collected.				Collected.		Uncollected.	Deduct Irrecoverable Bills.						Balance outstanding at the end of 1890-91.	
	Opening Balance outstanding.	Total of Bills issued in 1890-91.	Amount payable by Government and Port Trust within the Bills.	Total.	On account of former years.	Total.	Total.	On account of former years.				On account of 1890-91.	Total.	On account of former years.	Total.
								Timberhead Bills.	Bills cancelled and replaced on the Treasurer's Bills for collection.	Bills remitted as irrecoverable.	Total.				
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18

Tax on Vehicles and Animals.

33. The opening outstanding balance on account of this tax was Rs. 10,432-9-2. The demand for the year ending 31st December 1890 was Rs. 1,66,274-10-0 as against Rs. 1,68,504-8-0 for the previous year and bills to the extent of Rs. 245-9-0 were issued on account of tax due for former years, so that the total demand was Rs. 1,76,953-12-2. The amount actually collected during the year was Rs. 1,56,605-9-4 as against a collection of Rs. 1,62,679-12-10 in the previous year.

The amount recovered on account of licensed public conveyances, including license fees, and fees for badges and the amount realized from the tolls at Mahim and Sion Causeways, as contrasted with the previous year, is as follows:—

Year.	Tax on public Licensed Conveyances.	License Fees.	Fees for Badges.	Toll Fees at Mahim and Sion Causeways.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
1889-90	1,50,289 10 0	3,934 2 0	6,505 6 0	12,835 14 0
1890-91	1,88,162 0 0	6,116 4 0	10,892 6 0	12,399 10 0

The taxes on public land conveyances are now collected for the calendar year, January to December. The amount shown for 1890-91 is from 1st April 1890 to 31st March 1891, the official year.

Property Taxes and Taxes on Vehicles and Animals.

34. The following tables show : **A,** the total assessment ; **B,** the collection and outstanding balances under these

Table A.

REVENUE AUDIT.

38. The Revenue Audit Department was organized for the first time in the year under report. Some time was necessarily taken up in bringing the Department into proper working order and consequently the work done does not represent that of a whole year.

39. The books and balances for the 3rd and 4th quarters of the year in all the 7 wards of the Assessment and Collection Department were examined and checked in detail, and tallied with the Head Office accounts. The total number of bills thus treated was 27,903, amounting to the sum of Rs. 13,87,307-7-4. Two special examinations were conducted—one, of the bill books from the year 1884 of the ward clerk, Jamsetji Muncherji Hakim, who was convicted of fraud, which comprised the examination of 18,634 entries ; and the other, of the books and balances of the ward clerks in E Ward consequent on the defalcations of a clerk of that ward, Maneckji Adurji. In the Head Office of the Assessment Department 1,500 exemptions from the General Tax, 50,425 entries for Water and Halalkhor Tax in form 3, and 6200 entries for Tax on Vehicles and Animals were all examined and checked. 5,326 claims for one-fifth drawback were scrutinized, and of the 5,189 entries in forms 11, 11 A, and 11 B, 10 per cent. were traced through all the assessment and collection accounts. 241 irrecoverable bills were examined and reported on.

40. The number of complaints against valuations heard were 417. This is in addition to the disposal of 20 complaints against the valuations of educational institutions. The Election Roll was also scrutinized.

41. The revenue receipts or vouchers of the following Departments were also examined and checked :—

	No. of Receipts.	Amount. Rs.	a.	p.
Markets and Slaughter-Houses	15,503	2,55,363	5	7
Health Department	16,782	80,014	3	1
Engineer's Department	10,290	32,102	9	10

42. In the Licensing Department each of the 3,516 licenses granted was scrutinized with respect to the amount of fee leviable.

43. The number of claims for refund sanctioned after examination, on account of vacancy or over-collection, was 1,581, amounting to Rs. 25,268-11-7.

TOWN DUTIES.

44. The following table shows that the total collections for the year amounted to Rs. 17,67,747-13-4 as against Rs. 12,61,316-12-11 in the previous year, or an increase of Rs. 5,06,431-0-5. This increase is due partly to larger imports of all articles (except wines, spirits and firewood, which have fallen off) and partly to the rates on sugar and ghee having been raised ; the former from 6 to 8 annas per cwt. and the latter from 6 to 8 annas per Bombay maund.

The net revenue derived from the duties during the year was Rs. 9,56,094-13-4 against Rs. 6,86,435-6-11 in the previous year, or an increase of Rs. 2,69,659-6-5.

The amount of refunds claimed was Rs. 8,54,906 12-0, of which the sum of Rs. 43,253-12-0 was retrenched. The number of claims disposed of was 27,801 against 22,064 in the preceding year or an increase of 5,737.

Statement contrasting the Collections, Refunds and Net Revenue from Town Duties for the years 1889-90 and 1890-91.

V.—Public Works.

45. The Executive Engineer's report gives details of works completed, works in progress, and works to be undertaken.

DRAINAGE.

The engines at the Love Grove Pumping Station were worked on the whole, though at an enormous expenditure of coal, satisfactorily, and were frequently all required. Attention was given to determining the actual effective work done. A Committee of the Corporation was appointed to report upon the efficiency of the machinery, but at the close of the year their report had not been submitted. The working of the Carnac Bunder Night-soil Pumping Station and of the several drainage sluices was also satisfactory.

Tenders were again invited for the work in house connections of the first portion of the Drainage Scheme, but none were received. The work in house connections of the Agripada District has been entrusted to Mr. Sittaram Luximon, and satisfactory progress is being made.

Mr. Baldwin Latham in his report on the sanitation of Bombay, which was printed and circulated in July 1890, proposes to have the main sewer outfall at Colaba. As an alternative he proposes improvements in the present outfall at Worli. Government appointed a Committee to consider these proposals, but their orders on the Committee's report have not been yet received. Until the future position of the outfall is determined, no serious or comprehensive effort can be made to extend and complete the sewerage system upon the lines suggested by Mr. Latham.

Several new latrines and urinals have been erected, and miscellaneous drainage works, such as repairs to drains, cleaning of drains and flushing of sewers and drains, &c., has been well done. The Commissioner endorses the opinion of the Executive Engineer that the Municipality has suffered a great loss in the death of Mr. A. Baker, the late Chief Inspector of Drains.

The report of the Government Committee and the letters of the Sanitary Commissioner in connection with the Marine Lines Pipe Sewers have been commented on. The papers have been printed and circulated.

A set of revised rules on the subject of workmen entering sewers was approved by the Corporation on the 23rd February last.

WATER WORKS.

46. *Works at Tansa.*—The dam works were practically completed at the end of the year. The total quantity of masonry work executed is 11,000,000 cubic feet, of which 3,490,436 cubic feet is the outturn for the year under report. At the commencement of the year (1st April 1890) the water in the lake stood at R. L. 354·75. At the end of the monsoon it stood at R. L. 380·36, and this gave a depth of 90·36 feet against the water-face of the dam in the bed of the river. At the end of the year (31st March 1891) the water stood at R. L. 378·51 or 1·49 feet below the sill of the lowest outlet sluices. The rainfall gauged at the dam site gave a total of 105·93 inches. The average of the previous 5 years was 103·33.

47. *Duct Works.*—The total length of tunnel driven is 21,000 lin. feet, of which 7,230 lin. feet was done during the year. A balance of 900 lin. feet remained to be done. The masonry conduits, aggregating about 23 miles, have been nearly completed, only a few gaps remaining to be done. The laying of the 48″ pipe on all the syphon tracks (with the exception of syphon No. 1, where the pipes had not been delivered) are approaching completion. All the pipes required for the project, excepting a small number of special castings, have been tested and passed at home. The number to be delivered is small, and they would have been delivered before this had they been required.

48. *Land Acquisition.*—All the land for the lake and almost all for the duct up to the boundary of the island of Bombay has been acquired.

49. *Health.*—There has been a deal of malarious fever in the whole of the districts, but no serious outbreak of any epidemic has occurred.

50. *Works from Ghatkupar to Bombay.*—The progress on these works has not been satisfactory. The difficulties are considerable, and the contractors, Messrs. Sittaram Luximon & Co., have not been able to cope with them in a satisfactory manner.

51. Revised estimates for the whole of the Tansa Water Works Scheme were sanctiond by the Corporation on the 5th February 1891. The total is now Rs. 1,47,00,000 against

the original estimate of Rs. 1,23,00,000, or an increase of 24 lakhs.

52. *Vehar.*—The rainfall for the year was a very favourable one, *viz.* 100·04 inches, the average of previous years being 81·57 inches. This favourable rainfall, combined with the overflow from Tulsi Lake, and of the supplementary supply from Pawai, resulted in the level of the water in the Vehar Lake being 7 feet higher on the 31st October 1890 than it was on the 31st October 1889, the respective levels being 262·35 and 255·40. The point of overflow 262·50 was reached on the 29th and 30th September 1890, but the overflow never actually commenced, and the level gradually receded. No work of importance was required during the year ; but the preservation of the sanitary condition of the lake and its gathering ground has received strict attention.

53. *Pawai.*—The Pawai works were completed before the monsoon of 1890, and the pumping engines were worked during the monsoon with sastisfactory results. The rainfall was 94·33 inches or about 5 per cent. less than Vehar.

54. *Tulsi.*—The rainfall was 116·09 inches, being the heaviest yet recorded. The lake overflowed on the 2nd August. The dam and catch-water channels are in a satisfactory condition, but a portion of the pipe line crossing the Bandra creek was under repair.

55. *Bhundarwada Reservoir.*—Works to reduce the leakage of the reservoir were undertaken. The floor of Filter No. 1 and the floors and walls of the Inlet and Clear-water Channels were repaired with Indian patent "stone", and the work has been completely successful.

56. *Malabar Hill Reservoir.*—Several improvements costing over Rs. 80,000 were effected, the most important one being the asphalte flooring to the settling basin. Another important improvement was the fixing of a 25-inch diameter turbine in the outlet well on the outlet main supplying the city, in order to supply the high-level district. The total length of new mains laid during the year was about 28,000 feet and the renewal of old mains 6,115 feet. The number of free supplies, dipping wells, drinking fountains, &c., was, on the 31st March 1891, 174. The increase in water connections was 736, bringing the total number up to 17,634.

BUILDINGS.

57. 1,287 applications for permission to build or re-build houses were received, out of which 939 were passed, the others being disapproved on sanitary or other grounds. 7,559 notices regarding removal of inflammable materials and other building matters were served on house-owners. 282 summonses were issued for non-compliance with the notices; in 246 of these cases, the persons complied with the requirements of the notices before service, or return of the summonses, and in the remaining 36 cases convictions were obtained, 32 being warned and discharged, and fines amounting to Rs. 46 being inflicted in 4 cases.

58. 29 buildings or parts of buildings fell. Of these, 5 were of a serious nature resulting in the death of 44 persons and injury to 32 others. The terrible disaster in Jambli Street alone accounted for the death of 31 persons and injury to 29 others. The Draft Building By-laws are now under discussion by the Corporation.

59. Street improvements or set-backs to the extent of 6,982 square yards were effected at a cost of Rs. 1,21,746.

60. Municipal buildings and works completed or under construction during the year :—

Completed.	*Under construction.*
Boundary wall and fencing at Chinchpoogly Fire Brigade Station.	Raising the level of the ground of the Arthur Road Hospital.
Extension of Erskine Road Markets.	Filling in Municipal ground near the Elphinstone Road Church.
Extension of Mahalakshmi Dhobiwada.	Raising low-level ground at Victoria Gardens.
Cross Road, Mahalakshmi	New Road from Jakaria Br. to Sewri Cemetery.

61. The new Municipal offices building work under the supervision of the architect, Mr. F.W. Stevens, C.E., C.I.E., is making very satisfactory progress. On the 14th November 1890 the Corporation sanctioned a sum of Rs. 3,02,444 to provide for the new offices, fire service, water supply, drainage, hydraulic passenger lift, garden compound wall and fountain, furniture, and electric lighting.

ROADS.

62. The total number of steam-rollers is now 20. The area of roadway rolled by them during the year was 7,643,165 square feet at a cost of Rs. 34,703-1-7. Foot-paths were paved with blue stone to the extent of 36,804 square yards. Difficulties having arisen as regards claims in the negotiations

connected with the proposed new road through Nowroji Hill, the matter is now in abeyance. A new road, 40′ wide, from Jakaria Bandar Road to the Sewri Cemetery is under construction.

63. The construction of an overbridge at Falkland Road had not at the close of the year been commenced by Government. Difficulties in connection with payment for land are the cause of the delay.

64. There was no extension of the tramway. Sanction has been accorded to an extension to Hancock Bridge from the Parel Road, but the work was not commenced.

LIGHTING.

65. The gas lighting of the city was generally satisfactory. The illuminating power of the gas was up to the contract standard. The lighting with kerosine oil was not satisfactory owing to the contractor's remissness. The contractor was several times fined, but without effect. It has now been determined to do the work departmentally. At the end of the year there were in use 3,509 gas-lamps and 1,371 kerosine oil-lamps.

FIRE BRIGADE.

66. Mr. Nicholls, who was selected by Captain Shaw, of the London Fire Brigade, for the newly-created appointment of Chief Officer of the Fire Brigade, arrived and assumed charge of his appointment on the 8th September last. Under his direction considerable improvements have been and are being effected, but it will be seen from his report that a great deal remains to be done to establish the Brigade on a thoroughly efficient footing. One important step towards the attainment of this object has been made by the Corporation, who, on the 9th February last, sanctioned the sum of Rs. 5½ lakhs for Fire Brigade buildings. The erection of these buildings has not yet been commenced owing to the delay caused by the change of site necessitating the alteration of the plans and estimates. The site first selected was the triangular plot of Government land south of the Arthur Crawford Market, but the rate demanded for it being deemed exorbitant, the Corporation declined to purchase it. Eventually a plot of Municipal land at Sankli Street was selected as the site. A project for erecting all the buildings required at a cost of about 4½ lakhs is now before the Corporation.

67. The force of the Brigade at present consists of—

1 Chief Officer,
1 Superintendent,
5 District Foremen,
5 Engineers, and
125 Natives of all ranks;

and there are 7 Steam Fire Engines, 7 manual engines and 3 fire-escapes.

68. There were 120 fires during the year, of which 31 resulted in serious damage and 89 in slight damage to property. The damage done is estimated at Rs. 22,92,675, of which Rs. 20,00,000 is estimated for the fires at the Nicol and Gordon Mills, Rs. 8,00,000 for the former and Rs. 12,00,000 for the latter, leaving the estimated damage of the remaining 118 fires at Rs. 2,92,675. The following is a list of the fires where property to the extent of Rs. 10,000 and upwards was destroyed :—

Date.	Locality.	Nature of property destroyed.	Estimated value of property destroyed.
1890.			Rs.
3rd April	Colaba	Cotton	40,000
13th „	Do.	The Nicol Mill	8,00,000
15th May	Arthur Road	The Gordon Mill	12,00,000
„ „	Do.	Cotton Godown, Hindustan Mill	10,000
22nd „	Bazaar Gate Street	House and goods	15,900
26th June	Tardeo	Cotton, Jivraz Baloo Mill	10,000
27th „	Ripon Road	Cotton, The Ripon Mill	30,000
15th September	Parel	Cotton, The Queen Mill	10,000
20th November	Cathedral Street	House	20,000
21st „	Samuel Street	Do.	22,000
1891.			
20th January	Duncan Road	Do.	14,500
14th February	Colaba Cotton Green	Cotton	50,000

69. The following is a statement of the number of fires which took place, and the approximate amount of damage done in each of the last five years :—

Year.	Number of fires.	Value of property destroyed.
		Rs.
1886-87	76	45,870
1887-88	70	10,46,931
1888-89	86	7,65,766
1889-90	88	22,62,121
1890-91	120	22,92,675

PUBLIC GARDENS.

70. The public gardens have been well maintained during the year and several improvements have been effected. The Corporation rejected the proposal for laying out the land recently acquired for the extension of the Victoria Gardens. The land in question is low-lying, uncultivated, and is flooded during the rains, and in its present state is an unsightly spot which mars the general effect of the gardens. The entrance fees to the Victoria Gardens were reduced by the Corporation in February last, and they are now as follows :—Monday, Tuesday, Thursday and Saturday free. Wednesday and Friday, 2 annas for each adult, and 1 anna for each child. Sunday 3 pies per head. To the zoological collection numerous gifts of animals and birds have been made by the Bombay Natural History Society and others ; and in addition the following donations have been received for the construction of cages :—from the Tramway Company, Rs. 10,000 ; H. H. the Thakur Saheb of Bhownuggur, Rs. 4,000 ; Sir D. M. Petit, Bart., Rs. 1,500 ; Mr. Jalbhoy Ardesir Sett, Rs. 1,500. The great improvements in both the botanical and zoological divisions have had the effect of causing the gardens to be much frequented by the people.

71. The Secretary and Curator in his report gives in detail the several additions made to the different divisions of the museum. It is noteworthy that the museum was frequently visited by students from almost all the colleges, especially when the examinations were being held. The museum was open to the public for 313 days during the year. The visitors numbered 414,184, or an average of 1,323 daily. There is a large falling off in the numbers of visitors of the previous years, as will be seen from the following:—

Year.	Total number of visitors.	Daily average.
1887-88.....	586,228	1,872
1888-89.....	640,206	2,045
1889-90.....	563,908	1,801
1890-91.....	414,184	1,323

A proposal from Government to transform or extend the museum into a Trade Museum, on the model of those in Germany, was postponed by the Corporation until the question of holding an international exhibition in Bombay is considered.

VI.—Public Health.

72. During the year under review the state of the public health has been better than in the preceding year. The total number of deaths from all causes amounted to 20,534, being a decrease of 2,844 in the number of the previous year. The average number of deaths for the last five years is 21,384.

73. The returns of mortality from the chief death-causes show a decrease in small-pox, measles, fevers, cholera, diseases of the respiratory system, diarrhœa and dysentery, and an increase in phthisis, diseases of the nervous system and accidents. The enhanced mortality of the city during the 1st quarter of the year was due to the influence of an epidemic of Influenza which acquired intensity in the latter part of February.

74. The number and causes of deaths in the city during the last five years are shown in the following return :—

RETURN showing the number of Deaths and the Death-rate per 1,000 of population from different causes during the last five years.

YEAR.	Total number of deaths.	Per 1,000 of population.	Cholera.	Per 1,000 of population.	Small-pox.	Per 1,000 of population.	Measles.	Per 1,000 of population.	Fevers.	Per 1,000 of population.	Phthisis.	Per 1,000 of population.	Nervous system.	Per 1,000 of population.	Respiratory system.	Per 1,000 of population.	Diarrhœa.	Per 1,000 of population.	Dysentery.	Per 1,000 of population.	Accidents.	Per 1,000 of population.	Other causes.	Per 1,000 of population.
1886	20,074	23·26	19	·02	19	·02	572	·66	5,820	6·74	2,674	3·10	1,984	2·30	3,810	4·42	1,032	1·20	484	·56	389	·45	3,271	3·79

Average of five years	21,384	24·54	246	·27	212	·23	431	·49	6,365	7·31	2,706	3·13	1,997	2·29	3,817	4·38	1,022	1·17	579	·66	382	·44	3,602	4·15

75. Amongst all the great classes of the population there is a reduction in the mortality, the death-rate per 1,000 being Europeans 18·56, Native Christians 19·31, Parsis 21·09, Brahmins 22·27, and the great mass of the Hindu population 23·90.

76. The sections of the city in which the highest mortality occurred were : 1*st*, Parel (which has had the highest mortality for the two previous years) ; 2*nd*, 2nd Nagpada ; and 3*rd*, Byculla. It should be noted that in these sections there is either imperfect drainage or no drainage at all.

77. The number of deaths from cholera was 102 against 462 in the previous year. There were 2 deaths of Europeans, 9 of Parsis and 9 of Hindu low-castes, or a mortality in each case of ·18. The death-rate was greatest in Girgaum, Kamathipura, Chowpatty and Bhuleshwar.

78. There were 150 deaths from small-pox against 304 in the preceding year, and these occurred chiefly amongst Hindu out-castes, Native Christians and the mass of the Hindu population. The death-rate was greatest in the districts of Parel and Mahaluxmi.

79. The deaths from measles were 179 against 459 in the previous year. The highest mortality was amongst Hindu out-castes, which class had the highest mortality last year also. The death-rate was greatest in the districts of Tardeo, Byculla and Girgaum.

80. The deaths from fever were 6,489 against 7,266 in the previous year. The death-rate was greatest in the districts of Parel, Byculla and Mahaluxmi. The Committee of the Corporation appointed on the 28th November 1889 to consider the subject of the increasing numbers of deaths from fever, submitted its report during the year. The Committee attribute the causes to (1) imperfect drainage, (2) absence of drainage, (3) imperfect conservency, (4) street nuisances, (5) bad state of private lanes, (6) overcrowding, (7) milch cattle stables, (8) disposal of town-sweepings on the Flats.

81. The increasing number of cesspools in certain districts, particularly those of Colaba and Malabar Hill, is becoming a serious nuisance. In the absence of drainage in these districts the cesspools are a necessity, and the removal of their contents is a severe tax upon the Health Department. The only remedy is the construction of drains, for it is impossible to remove in carts all the water brought into the cesspools through pipes.

82. The hospital at Grant Road was open during the whole year for the treatment of epidemic cases of disease.

83. The question of burial places for the dead, particularly of the Beni-Israel and Mahomedan dead, formed the subject of a report of a Committee of the Corporation. Negotiations for the purchase of land for a burial ground have been in progress, but nothing is definitely settled.

84. The bill dealing with the adulteration of Ghee was not proceeded with by the Bombay Government, as the Government of India declined to accord sanction to certain sections of it.

85. The number of births registered (exclusive of still-born) were 15,568 against 15,493 in the previous year. Contrasted with the number of deaths (20,534), but one inference can be drawn, *viz.*, that the registration is inaccurate.

86. On an average 4,129 men and women, 788 scavengering and drain carts, and 166 night-soil and cesspool carts were employed daily. The collection of garbage or cutchra was 309,482 tons equal to 847 tons a day. 131,836 tons of night-soil, equal to 361 tons a day, were collected and removed ; and 192 miles of covered drains were opened and cleaned.

LICENSES.

87. This is the first year the licensing of certain trades under Section 394 has been worked as a separate department, as previously it formed a branch of the Health Department. The amount actually collected on account of License Fees during the year was Rs. 27,136-8-0, remaining uncollected Rs. 8,695—total Rs. 35,831-8-0. The number of prosecutions conducted was 2,676. The old schedule of fees having been found to operate harshly upon many engaged in the licensable trade, a revised schedule of fees was sanctioned by the Corporation on the 14th November 1890.

MARKETS.

88. The total revenue from the markets and slaughter-houses for the year was Rs. 3,48,106 against Rs. 3,29,170 of the previous year, a net increase of Rs. 18,936. This increase is principally due to—1st, the stalls at the markets having been let at higher rents ; 2nd, to the right of collecting fair ground and feeding fees at Bandora having been sold for a higher sum than in the previous year ; 3rd, to an increase in the levy of Butchers' fees; and 4th, to an increase in the amount of squatters' fees.

89. The supply of fruit and vegetables was plentiful and good, and the prices were moderate.

90. The supply of mutton has been fairly good, but that of beef was below the average. The supply of fish was likewise below the average. The following is a comparative statement of the consumption of meat for the past three years :—

Animals slaughtered at the Municipal Slaughter-Houses at Bandora for Public and Commissariat Consumption (exclusive of the local supply to Bandora).

	1888-89.	1889-90.	1890-91.
Horned cattle	29,959	33,785	31,912
Sheep and goats	4,65,807	5,07,892	4,47,072
Pigs	939	1,043	860

Animals taken from the Municipal Slaughter-Houses for private slaughter.

	1888-89.	1889-90.	1890-91.
Horned cattle	932	1,111	909
Sheep and goats	51,358	45,217	43,762

91. The quantity of food, chiefly mutton, beef, fish, rice and sugar, destroyed during the year as unfit for consumption amounted to over 66 tons.

92. There were 27 convictions for market offences against 58 in the year previous ; and the amount of fines inflicted was Rs. 257 against Rs. 442 in the previous year.

93. The proposal to extend the Arthur Crawford Market by the purchase from Government of the triangular piece of land immediately to the south of the market was rejected by the Corporation. The extension of the Bhuleshwar Market will probably be shortly proceeded with as all the land is now acquired. The erection of a market at Colaba is awaiting the selection of a new site and revised estimates. The value of the site formerly selected exceeds the amount sanctioned for both the erection of the market and the site on which it is to stand, and hence it has been determined to select a cheaper site. The proposed new market at Foras Road, in respect of which the Corporation sanctioned the sum of Rs. 49,942, on the 17th April 1890, has not yet been started. A report on the subject has been laid before the Corporation.

94. A new scale of fees for verifying weights and measures under Section 420 of the Municipal Act was sanctioned by the Corporation on the 11th September 1890. The verification

is not compulsory under the Act, the punishment for using false weights and measures being provided by the Penal Code.

STREET ACCIDENTS.

95. The number of persons run over in the public streets was 540, of whom 33 were killed. This number is largely in excess of the returns of previous years. One cause of the increase may be attributable to the fact that the strength of the Police is insufficient to properly regulate the street traffic. The accients occurred chiefly in the Parel, Frere, Hornby, Pydownie, Falkland, Grant and Girgaum Roads and in Abdul Rahimon Street.

The number of street accidents in each of the past 5 years is shown in the following table :—

Year.	Number injured.	Number killed.	Total.
1886-87	366	28	394
1887-88	364	31	395
1888-89	466	24	490
1889-90	391	30	421
1890-91	507	33	540

VII.—Education.

96. The subject of the Government contribution of Rs. 25,000 a year for a fixed period of 5 years, towards Primary Education in the city, has been under discussion by the Corporation, with the result that a representation has been made to Government by that body, and the question of liability is still pending.

97. The following statement shows the receipts and expenditure on Municipal Primary Schools for the year 1890-91:—

	Receipts.	Amount.		Expenditure.	Amount.
		Rs. a. p.		A.—SCHOOLS.	Rs. a. p.
1	Balance, 1st April 1890	11,053 10 4	1	Head Masters and Teachers ..	44,212 7 10

29	Masjid Bandar do.	21
30	Nal Bazar do.	30
	Total ...	6,134

99. In addition to the sum of Rs. 39,500 for Primary Education the Corporation sanctioned for other Educational Institutions the grants as under :—

	Rs.
Medical Female Scholarships...	1,000
School for Deaf-Mutes	1,800
Veterinary College	2,500
Technical College	10,000

100. The first report of the Joint Schools' Committee on the Primary Schools of Bombay is included in this Annual Report. The matters therein referred to deserve the consideration of all those concerned. A memo. on the subject of school buildings has been drawn up by the Secretary to the Committee. A proposal to reconstruct Bhuleshwar markets and provide accommodation over them for 700 children is before the Corporation.

H. A. ACWORTH,
Municipal Commissioner
for the City of Bombay.

FINANCIAL.

REPORT OF Mr. SORABJI NAVAROJI COOPER, Chief Accountant, as forwarded with his letter No. 1677, dated 20*th August* 1891.

From the following Revenue Statement A, it will be observed that the receipts, excluding Rs. 72,175-7-0 on account of adjustment of stock (a nominal item) and Rs. 2,32,544-5-9 recovered on account of Workshop advances and consequently not an item of revenue, exceeded the estimates under certain heads by Rs. 5,15,342-11-1, whereas under others they fell short of our expectations by Rs. 61,460-4-9. The net excess of revenue over the estimates was thus Rs. 4,53,882-6$\frac{5}{8}$4 or over 4½ lakhs not including the stock adjustment and Workshop advance items. Of this large surplus, Rs. 1,20,000 having been anticipated at the time of framing the budget estimates for the current year, have already been appropriated in that Budget.

A.

STATEMENT showing the Net Receipts during the Financial year 1890-91 *from all Sources contrasted with the Budget Estimate.*

* Including Rs. 2,626-5-3 on account of actual profit on sales of stores.

† Fire Brigade Tax was levied in 1889-90 at ½ per cent.

The falling off of Rs. 36,322-12-0, under General Tax, was simply owing to the outstandings of that tax being nearly ¾ths of a lakh larger than those of the previous year.

The other property taxes, Halalkhor and Water, yielded Rs. 15,622-2-0 and Rs. 68,098-2-3 more than the respective estimates, besides the addition of Rs. 20,000 and Rs. 25,000 to the outstandings of 1889-90.

Of the large increase under Water Tax, Rs. 25,230-6-9 were obtained on Departmental and public supply of water, Rs. 1,380-1-4 from miscellaneous receipts by sale of grass, pipes, &c., Rs. 2,626-5-3 from profit on sale of stores, &c., and the balance of Rs. 38,861-4-11 was realized on account of interest and profit on the Tansa Loan Interest account, which last-mentioned sum was re-invested as shown in Statement C, page 59.

The increase of Rs. 30,947-15-4 under Wheel Tax and Tolls was not an actual increase; there was really a falling off of Rs. 1,000 on tolls and of Rs. 3,000 on private conveyances, entirely owing to the outstandings being about Rs. 9,500 higher than those of 1889-90 and an increase of nearly Rs. 35,000 on Public Conveyances, owing to the tax on such conveyances having been first levied for nine months from April to December 1890 and then for the whole of the Calendar year 1891 instead of for the quarter ending March 1891 as was the practice in previous years.

Town Duties realized Rs. 1,72,519-10-1 more than our estimates as explained in detail at page 71 of this report.

Under Licenses—(*a*) Dangerous and Offensive Trades—Only Rs. 28,500 were collected during 1890-91, or Rs. 6,100 less than the estimate; Rs. 9,048-8-0, however, appear to have been recovered on account of past year's fees for the licensing of these trades during the current year. The actual collections for 1890-91 have thus been Rs. 37,548 or Rs. 2,948 more than the budgetted amount.

(*b*) Streets and Buildings licenses to Plumbers and Surveyors yielded Rs. 140 less than the estimate.

(*c*) Land Conveyance, Music, &c., licenses realized Rs. 7,441-10-0 more than our expectations, owing to license and badge fees being recovered for the calendar year 1891, from January to March 1891, in addition to similar fees for the previous year (1890) having been recovered between April to December 1890.

The net realizations from the duty on Tobacco exceeded the budget estimate by Rs. 14,983-15-9, presumably on account of larger consumption of that article in the city.

The decrease under Market Receipts of Rs. 8,723-15-4 was almost due to slaughter fees not realizing the full estimated amount and to a number of stalls in the new Erskine Road Mutton and Fruit and Vegetable Markets remaining vacant for a great part of the year.

The increased receipts of Rs. 23,371-11-7 under Public Gardens were solely due to Rs. 17,300 having been received from the public as contributions for construction of cages, &c., in the Victoria Gardens and to nearly Rs. 6,000 having been recovered from admission fees from December 1889 to March 1891, as shown in detail in Appendix No. 8 of the Garden Fund, *vide* page 160 of this report.

The small decreases of Rs. 7-12-2 and Rs. 430-13-0 under Tramway Rent and Miscellaneous Fines were simply due to round figures having been shown in the estimates.

The increase of Rs. 43,259-0-5 under Miscellaneous Receipts was derived under the following sub-heads :—

	Rs.	a.	p.
Sale of Land at Hornby Row, Mint and Warden Roads, Nagpada, Memonwada and Temkar Street...	9,817	15	2
Rent of Chawls, reclamation grounds(Health Department)	25,839	3	0
Rent of ground and telephone lines, hire of carts, rollers, &c., and sale of rights of catching fish, &c., &c. (Engineer's Department).....	2,979	5	11
Rent of Fire Brigade quarters and other sundry receipts...	4,622	8	4
	Rs. 43,259	0	5

The recoveries of fees for projecting verandahs, balconies, sunshades, weather frames and scaffoldings not reaching the budget estimate wholly account for the short receipts of Rs. 5,748-9-5 under Miscellaneous Fees.

Miscellaneous Savings.—The decrease of Rs. 3,949-11-3 under this head is simply due to the former practice of crediting to revenue at the end of the year the net amount of unpaid wages being discontinued, and to such unpaid balance being credited to Deposit Account, as required to be shown in the forms of accounts to be submitted to Government. Had the balance of Rs. 5,621-4-2 transferred to Deposit Account at the end of the year been credited to this head as usual, this source of revenue would have shown a surplus of Rs. 1,671-8-11.

The excess realization of Rs. 1,320-5-2 under Pension Contributions was chiefly due to larger recoveries made from employés, whose salaries were raised under the first schedule framed and sanctioned as per the provisions of the new Municipal Act and to extra contributions obtained from the officers, &c., employed in the new appointments created in that schedule.

While framing the budget for 1890-91 it was estimated that the interest on invested balances of loan and reserve funds would amount to Rs. 36,000. The actual yield, however, was Rs. 1,04,678-15-4 or Rs. 68,678-15-4 more than the estimate. A profit of Rs. 40,943 was also derived by the sale, &c., of the Government Paper of the surplus cash and other investments. Thus by advancing from current revenue sums required for loan works expenditure and allowing the loan funds to remain invested in Government paper or at interest with the Bank as long as practicable and by the sale from time to time of Government paper of the surplus cash and Sanitary Works Loan accounts on favourable opportunities, we realized in the shape of profit and interest on our invested loan and reserve funds Rs. 1,09,621-15-4 in excess of the Budget estimate as shown in detail below :—

				Rs.	a.	p.
6 per cent. Loans unclaimed balance				90	13	1
Drainage Loan of 1878				292	3	11
44 Lakhs Sanitary Works Loan				28,482	15	8
7 Do. do.				1,433	7	1
12 Lakhs Drainage and Water Works Loan				28,905	14	7
Miscellaneous Works Loan of Rs. 10,08,500				6,302	7	6
35 Lakhs Various Sanitary Works Loan				16,259	3	10
Surplus Cash deposit				22,911	13	8
Total Interest received ...			Rs.	1,04,678	15	4
Less—						
Budget Estimate				36,000	0	0
Interest received in excess of the Budget estimate				68,678	15	4
Add—						
Profit realized by the sale of 4 per cent. Government Paper for Rs. 11,53,600 belonging to the Surplus Cash deposit	Rs.	36,970	8 0			
Do. do. Rs. 70,000 belonging to the 44 lakhs Sanitary Works Loan	,,	3,675	0 0			
Do. realized by the transfer of 4 per cent. Government Paper for Rs. 1,19,000 belonging to the 35 lakhs Sanitary Works Loan, to surplus cash	,,	297	8 0			
				40,943	0	0
Interest and Profit in excess of the Budget Estimate.			Rs.	1,09,621	15	4

Rs. 8,000-0-0 were estimated to be realized as interest on the Building Fund investment, but by meeting the expenditure on the works connected with the New Municipal buildings from current balances we realized Rs. 19,091-15-1 as interest on the investments of this fund and also realized a profit of Rs. 9,189-14-0 on the sale of the paper at favorable times for recouping our cash and other ad-

vances. The total realizations of Rs. 28,281-13-1, which were Rs. 20,281-13-1 in excess of the estimate were added to the Building Fund invested account as shown in Statement C, page 58.

Interest amounting to Rs. 12,402-9-9 and Rs. 113-4-5, which accrued on the Sinking Fund and Municipal Buildings Fire Insurance Fund investments (against the respective estimates of Rs. 11,850 and Rs. 150) was also added to those invested funds, as will appear from Statement C, page 58.

The actual profit realized on sale of Stores to contractors, &c., was Rs. 7,321-12-4.

The nominal profit of Rs. 72,175-7-0 on stock adjusted was the net result of taking as surplus and charging the value to stock of Departmental officers all dead stock articles, plant, live stock, &c., purchased out of Budget and Loan grants after writing off the loss by auction sale of unserviceable stores and animals and from mortality or transfer to Panjrapole of horses and bullocks. This item cannot be treated as revenue and has been shown separately at the end of the Statement as suggested by Government.

The Workshop receipts should not similarly be treated as an item of income inasmuch as they were mere recoveries of advances made in the past and previous years for execution of works in the shops and adjusted in the accounts by charging the cost of such works to Loan and Budget allotments. Such amount of the advances that remains unadjusted at the end of each year must, as in previous years, be treated as a recoverable advance like all other advances for departmental works. If the total receipts, Rs. 2,32,544-5-9, which include Rs. 1,09,302-11-8 recovered on account of Rs. 1,10,933-3-7 shown as a recoverable advance made to the shops and forming part of the surplus cash of the year 1889-90, were shown as revenue of the past year, it would show a fictitious extra income in 1890-91. Deducting from the total receipts during the past year, the recoveries made on account of the previous years' advances, the receipts against the advances of Rs. 1,31,829-15-2 made during the last year as per Statement C, would amount to Rs. 1,23,241-10-1. Thus showing a deficit of Rs. 8,588-5-1 which, if the outstandings of Rs. 4,515-13-11 on account of last year's advances and which would be recovered during the current year, were taken into account, would be reduced to Rs. 4,072-7-2. This net loss on the working of the shops would not appear if the receipts and disbursements of the shops were shown in Statements A and C as actual revenue and expenditure of the year. As, however, Rs. 1,40,000 were shown as revenue and the like amount as expenditure in the past year's Budget for the first time, I have shown the actuals against the estimates at the foot of the Income and Expenditure Statements and have shown the net result of the working as per Workshop Cash Account as loss in Statement C.

I would, however, for the reasons given above suggest that workshop receipts and disbursements should not in future be budgetted for as revenue and expenditure, but sanction of the Corporation should be obtained for advances from Surplus Cash Balance to be adjusted from Loan and Budget grants or recoveries from private parties as was done prior to 1890-91 and as is still being done in the case of advances for Water Works and Drainage Stores, Private and Departmental works executed by the Engineer, &c., &c.

It will be seen from column 1 of Statement B given below that Rs. 58,00,194, exclusive of the advance of Rs. 1,40,000 for Workshops, were sanctioned by the Corporation for expenditure as per Budget estimates for the year 1890-91.

Column 2 shows that additional grants amounting to Rs.7,64,730-13-6, excluding a further advance of Rs. 21,652-2-5 for Workshops, had to be provided for from time to time during the past year as under :—

		Rs.	a.	p.
(1.)	Additional grants sanctioned by the Corporation under the provisions of Section 131 of the Municipal Act for maintenance of Powai pumping engines, Primary Education, Census charges, cleaning, repairing and lighting Victoria Dock Roads, diverting sewers from the site of the proposed overbridge at Falkland Road, maintenance of Leper Home at Matunga, improvements at the junctions of Ghoghari Mohla, &c., and Apollo Street, &c., survey for the completion of the Surface Drainage scheme and for other sundry special or unforeseen requirements as also to meet excesses on the grants for Love Grove Pumping Station, repairs to machinery, &c., Miscellaneous Drainage, &c., &c., &c.	1,99,280	3	8
(2.)	Do. do. do. from the garden donations and receipts from fees to be expended on various garden improvements ...	21,244	2	2
(3.)	Amount sanctioned to be written off on account of private works irrecoverable bills	6,649	10	6
(4.)	Unexpended grants for 1889-90 sanctioned by the Standing Committee under the provisions of Section 132 to be renewed during the past year for the completion of the purposes or objects for which the grants were made	4,77,861	1	5
(5.)	Interest realizations on invested funds in excess of their respective budget estimates added to the following invested accounts :—			
	Sinking Fund Account ..... Rs. 552 9 9			
	Building Fund Account..... „ 20,281 13 1			
	Tansa Loan Interest Account ..... „ 38,861 4 11			
		59,695	11	9
	Rs.	7,64,730	13	6

Columns 3 and 4 show that the transfers made by the Standing Committee and the Corporation from one Budget head to another, under the provisions of Section 133 (1) and (2), amounted to Rs. 1,96,347-9-1.

These transfers, however, did not affect as required by law the totals of grants sanctioned by the Corporation either at the time of passing the Budget under Section 129 or subsequently under Section 131 (1).

Column 5 shows that the grants as amended from time to time during the past year amounted in the aggregate to Rs. 65,64,924-13-6, excluding the aggregate amount of Rs. 1,61,652-2-5 sanctioned for Workshop advances.

B.

			3,42,177 8 11
Gross payments on account of Debt Rs.			15,52,138 7 5

From the foregoing Statement C, it will be seen that not including the Workshop advances of Rs. 1,31,829-15-2, the actual expenditure amounted to Rs. 55,53,031-8-1 against a total grant of Rs. 65,64,924-13-6, thus leaving an unexpended balance of Rs. 10,11,893-5-5, of which Rs. 5,49,481-8-7 will have to be renewed during the current year to meet unpaid establishment, labor, stores, contingent, interest, pensions, debt and other charges for 1890-91 and the cost of completion of works in progress or not taken in hand during last year. The net savings in expenditure were consequently Rs. 4,62,411-12-10.

I give below the causes and reasons of the above large sum of over 10 lakhs remaining unexpended under the various expenditure heads. I have also explained why and under what heads about 5½ lakhs of the unexpended grants will have to be renewed.

The saving of Rs. 5,304-4-9 under General Superintendence accrued chiefly on the Establishment and Contingent grants of the Corporation and Standing Committee's, Commissioner's and the Accounts and Expenditure Audit Departments. Rs. 1,073-13-9, however, will be renewed during the current year on account of bills of printing charges of the Corporation and Standing Committee's Department not received during the past year.

Of the total saving of Rs. 10,946-15-0 under the Assessment and Collection Department, Rs. 2,500 will have to be renewed for payment of fees to Mr. Stevens for revision of assessment on Government buildings and lands, which was not completed at the close of last year. The remainder was saved chiefly owing to the full schedule and budgetted salaries not having been paid to all the members of the Property and Wheel Tax and the Revenue and Refund Audit Departments and to the full grants for commission on Town Duty Collections and Land Conveyance License Department not being required.

The saving of Rs. 3,716-6-0 under Engineer's General Branch was almost entirely due to the Assistant Engineer being on leave without pay for 4 months and 24 days and to full schedule salaries not having been paid to the Establishment and the full Budget strength not having been employed during the past year.

From the unexpended balances under Miscellaneous Drainage and maintenance of Love Grove Pumping Station and Sluices, and the Carnac Bunder Pumping Station, aggregating Rs. 35,669-8-6, Rs. 22,865-2-9 will be required during the current year for repairs and alterations to drains and sewers, repairs to Love Grove Pumping Station machinery and building, renewal of sluice gates and repairs to machinery and renewing quarters of the staff of the Carnac Bunder Pumping Station, and cost of stores, &c., purchased for Miscellaneous Drainage and Love Grove Pumping Station during the past year. Thus there was a net saving of Rs. 12,804-5-9 under Drainage, which was chiefly derived on account of the full schedule strength of the Miscellaneous Drainage, Inspection of Sewers and Sluices Establishments not having been employed all throughout the past year.

The saving of Rs. 3,567-8-5 under Streets and Buildings Inspection and Supervision Establishment was also entirely due to the schedule strength and salaries not being in force for the whole of the past year.

Owing to the provision of experimental electric lights, remaining almost wholly unexpended and to sundry savings in the provisions of gas contingencies, lighting with gas the Wellington and Flora Fountains and kerosine lighting we saved Rs. 35,997-13-8 under Public Lighting. Rs. 31,427-8-10 will, however, be required for experimental electric lights, for cost of 16 gas lamps put up at the road near the Graving Dock, bill for which was not received during the past year, and for sundry kerosine lighting contingent charges.

Of the saving of Rs. 31,623-10-2 on road watering, Rs. 9,720-0-3, the whole of the unexpended grant for new water tanks and Persian-wheels, as also Rs. 335-14-6 for sundry unadjusted repairs charges, or Rs. 10,055-14-9 in all, will have to be renewed during the current year. The remainder of the saving was due to the sanctioned schedule strength of hand and bullock bhistees, pipemen and bullock pairs not having been employed during the whole of the 9 months of the watering season.

Excluding the entire Pavement grant of Rs. 50,000 to be renewed, owing to the contract for the work having been only executed in December 1890, and the amount of Rs. 6,236-7-0 required (1) for labor to complete repairs of Morland and other roads, (2) for the completion of the renewal of the roof of the Queen's statue and (3) for freight, &c., charges on new steam rollers, the actual saving out of the unexpended balance of Rs. 1,27,068-0-11 under road repairs amounted to Rs. 70,831-9-11 derived chiefly under the sub-heads Purchase of materials, and Cart hire and labor.

The street improvement balance of Rs. 87,912-2-2 will have to be wholly renewed to meet the cost of the completion of the Ghogari Mohla and Apollo Street junctions, Walkeshwar and other improvements already taken in hand.

Thus out of the aggregate unexpended grants of Rs. 3,25,555-1-10 under the Engineer's Department, Rs. 2,08,497-3-6 will have to be renewed for unpaid or unincurred liabilities, leaving a net saving of Rs. 1,17,057-14-4.

The whole of the Victoria Gardens unexpended grant and the unspent donations, &c., amounting to Rs. 15,852-11-10, will be renewed and placed to the credit of the Garden Fund, *vide* Appendix No. 8, pages 83 and 161.

The aggregate savings under the other Public Gardens amounted to Rs. 1,554-1-11, of which only Rs. 164-7-11 will be wanted to complete the repairs of the Northbrook Garden Roads during 1891-92.

In consequence of the schedule strength and salaries of the Office Establishment not coming into force from the beginning of the past year and the full amount of the estimated summons fees for Health Department and License cases not being required, there resulted a saving of Rs. 3,651-9-9 under General Supervision.

The saving of Rs. 65,971-0-8 in the following sections of Conservancy Branch was wholly due to the maximum strength of Superintendence and Inspection, Scavengering and Drain-cleaning and the Halalkhore staff not having been employed and to the maximum schedule salaries not having been paid in all cases during the past year. Rs. 2,366-15-0 will, however, have to be renewed in this year to meet cost of certain repairs to labourers and halalkhore chawls, carts, night soil depôts, &c., bills for which were not received before the close of 1890-91.

					Rs.	a.	p.

					21,557	3	11
				Rs....	65,971	0	8

The saving of Rs. 1,286-5-9 under Registration of Births and Deaths was chiefly effected under contingencies and pay of Birth Registration Karkoons, who were paid by results instead of a fixed monthly salary.

One hearse driver and a hearse horse being less than the authorized strength and the contingent and stores, &c., grant not being fully spent, resulted in a saving of Rs. 4,859-4-11 under cemeteries. A bill for Rs. 89-4-8 for repairs to the Haines Road Bungalow and grave-diggers' chawl received on 16th April 1891 will have to be paid during the current year with the requisite sanction.

The small savings under Laboratory, Mahaluxmi Dhobiwada, Infectious Diseases, Milch Cattle Stables, Tank Conservancy and Vaccination, aggregated Rs. 5,675-3-6. Rs. 1,218-2-11 and Rs. 244-15-6, will, however, be required for the payment of the petty works contractors' bills for repairs to the Dhobiwada and Milch Cattle Stables and Rs. 609-3-3 for the contingent bill of the Vaccination Department for February 1891 received after the expiry of the past year.

Deducting from the aggregate unexpended balance of Rs. 81,443-8-7 of the Health Department, Rs. 4,528-9-4 required to be renewed for payment of unpaid liabilities, &c., there remained a net saving of Rs. 76,914-15-3 on the grants of the various branches under the Health Officer.

Chiefly under the sub-heads Superintendence, Lighting, Meat Carriage, Repairs and Water supply, Markets and Slaughter Houses Department, there accrued savings, aggregating Rs. 15,670-3-11, of which Rs. 4,633-1-7 will have to be renewed for defraying repairs, &c., charges, bills for which were not received within the past year.

The whole of the Municipal grant of Rs. 9,000 and Rs. 10,928-6-3 contributed by Government for Census charges were expended during the past year with the exception of Rs. 28-11-10. The difference of Rs. 1,928-6-3 between the Government contribution and Municipal expenditure was due to bills for that amount having been paid during the current year after obtaining sanction of the Corporation to the necessary extra grant.

The unexpended balance of the grant for interest on Loans was Rs. 1,10,689-12-3, of which Rs. 56,624-11-1 will have to be renewed for payment of unclaimed interest due to bond-holders up to the end of last year.

There had been a saving of Rs. 4,853-7-4 on Miscellaneous Loan charges.

In the following table I have shown the total savings that had accrued during the past year with their respective causes, the amount to be renewed to meet unpaid claims of interest and redemption of capital on account of the entire Municipal Debt, including that contracted for Water Works :—

Savings on charges on loans, almost due to the grant of Rs. 5,000, for Miscellaneous charges not having been fully expended						Rs. 4,853	a. p. 7 4
Savings on interest on Loans :—							
5 per cent. Agripada House Sullage Water connections Loan, owing to the raising of the balance of the Loan having been completed only on the 9th May 1890 (Municipal Fund)				Rs. 2,626	a. p. 15 10		
5 per cent. 35 lakhs various Sanitary Works Loan, owing to almost the whole of the loan having been raised between September and November 1890 (Municipal Fund Rs. 51,438-1-4 + Water Works Rs. 25,017-15-11)				76,456	1 3		
Short paid by the Bank to Tansa (Water Works) Bond-holders				0	0 1		
(Municipal Fund, Rs. 54,065-1-2 + Rs. 25,018-0-0 Water Works)						79,083	1 2
Unpaid interest (to be renewed) :—						83,936	8 6
6 per cent. Local Loans				140	13 4		
Drainage, &c., Loan of 1878 (27 Lakhs)				14,325	0 0		
44 Lakhs Sanitary Works Loan				16,800	0 0		
7 „ „ „				12,650	0 0		
12 „ Drainage and Water Works Loan				9,237	8 0		
35 „ Various Sanitary Works Loan				3,471	5 9		
			Municipal Fund, Rs.	56,624	11 1		
Tansa Works Loan (122 Lakhs), Water Works Fund—	Rs.	a.	p.				
Unpaid Interest	22,033	8	9				
Amount required to replace the sum erroneously overdrawn from the Tansa Interest Fund Account	281	14	11				
				22,315	7 8		
Unpaid Capital (to be renewed) :—				78,940	2 9		
Amount of one Debenture of the Drainage Loan of 1878, payable on 1st January 1890, and of 8 Debentures payable on 1st January 1891 not claimed up to the end of the past year				4,500	0 0	83,440	2 9
					Rs...	1,67,876	11 3

As in the preceding year, the grant of Rs. 1,000 voted by the Corporation under Primary Education for scholarships to Female Medical Students was not utilized.

The saving of Rs. 2,201-1-11 under Victoria and Albert Museum was due to the provisions for Natural History specimens and collection of artware, as also the extra grant of Rs. 1,000 sanctioned by the Corporation not having been fully expended during last year.

The Joint Schools Committee Office rooms being rented at Rs. 65 per month against the Budget provision of Rs. 100 per month almost accounted for the saving of Rs. 462-13-7 on the Committee's Establishment, &c., grant.

The survey for the completion of the surface drainage scheme not having been finished, the unexpended balance of Rs. 5,899-15-7 will have to be renewed during the current year.

Rs. 3,796-11-11 were refunded by Government, being the unexpended balance of the Municipal contribution of Rs. 36,000 for the maintenance of the Gokuldas Tejpal Hospital for the year 1889-90. Rs. 202-9-3 were expended out of this balance for employing nurses from the middle of December 1890 to end of February 1891 as per Corporation's Resolution No. 6208 dated 29th September 1890. Thus the net saving on the working expenses of the hospital was Rs. 3,594-2-8.

As was the case in 1889-90 and former years, the Cholera and Small-pox Hospital establishment provision of Rs. 3,108 remained unexpended during the past year.

The grant of Rs. 3,205 allotted by the Corporation and the like sum contributed by Government for the maintenance of the Leper Asylum at Matunga were, with the exception of Rs. 10-4-1, spent during last year.

Out of the saving of Rs. 1,137-4-8 on the pensions, gratuities and compassionate allowance grant, Rs. 151-11-11 will be required during 1891-92 to meet unpaid pension and compassionate allowance claims.

The whole of the available balance of Rs. 4,460-10-6, under Commissioner's Discretional allowance, will have to be renewed to meet cost of repairs to Love Grove Pumping Station machinery, erection of a stand pipe on the flats for flushing drains and for other works sanctioned but not completed in the past year.

The saving of Rs. 627-6-5 under rent of Municipal Office was entirely due to the sanctioned amount of the landlord's claim for refund

of service rates under the terms of the lease granted by him to the Municipality, not having been passed and paid during 1890-91.

Rs. 1,39,525-11-11 of the large saving of Rs. 1,91,805-12-3 under new works shown in detail below will have to be renewed for completing works in progress and those not taken in hand. Thus the actual saving on completed works and on those not required at all or not likely to be taken in hand within a year or two will be Rs. 52,280-0-4.

			Rs.	a.	p.
(1)	Amount required for payment of bills for completed works and for the completion of works in progress		97,542	9	9
(2)	Do. do. do. not taken in hand ...		41,983	2	2
		Rs.	1,39,525	11	11
(3)	Savings on completed works ... ...Rs.	14,471 2 9			
(4)	Provision for works not required or not likely to be taken in hand within a year or two ...	37,808 13 7			
			52,280	0	4
		Rs.	1,91,805	12	3

Under Police, Election Expenses and Cost of Addresses, &c., to H. R. H. Prince Albert Victor and other illustrious personages there were small savings, aggregating Rs. 336-14-6.

On the Fire Brigade provision there accrued savings aggregating Rs. 39,619-5-6 under the following sub-heads :—

		Rs.	a.	p.
I.	Establishment (on account of the full Schedule salaries and strength not being in force during the whole year)	1,897	14	5
II.	Rent, repairs and miscellaneous	3,315	8	2
III.	Purchase of Stock (in consequence of tendered rates being more favorable)	10,675	2	7
IV.	New Buildings (owing to the unappropriated balance of the grant for the construction of the Saukli Tank not being required, provision for the construction of all Fire Stations having been made in the proposed Fire Brigade Loan)	23,730	12	4
		39,619	5	6

Of this large saving only Rs. 474-3-5 will have to be renewed for payment of sundry stores and contingent, &c., bills not presented during the past year.

Rs. 36-11-7 on account of the interest estimated to be realized on the Municipal Buildings Fire Insurance Fund investment remained uninvested, as only 9½ months' interest became payable during the past year on the sum of Rs. 3,000 invested on 15th March 1890.

I have shown below the entire savings of the Water Works Department, as also the sums required to be renewed for unpaid contingent and repairs charges and for completion of new works, including the

savings and renewals for Water Works Debt which have already been given above in detail under General Debt :—

	Rs.	a.	p.	Rs.	a.	p.
Actual savings on establishment, labour, contingencies, repairs and renewals.				13,142	11	8
Actual savings on materials				25,925	6	11
Actual savings on maintenance of Powai Pumping Engines				13,989	1	2
				53,057	3	9
To be renewed for unpaid contingent charges and for completion of repairs, &c., alterations to public wells, tanks, fountains and Tulsi pipe embankment				5,885	2	2
				58,942	5	11
New Works—

				1,37,932	14	5
Debt (already shown under General Debt)—						
Unpaid Interest on Tansa Loan to be renewed	22,315	7	8			
Saving on account of Interest on Tansa Loan short paid by the Bank ..... Rs. a. p. 0 0 1						
Do. do. do. on Water Works portion of the 35 Lakhs Sanitary Works Loan for the reasons explained under General Debt 25,017 15 11						
	25,018	0	0			
				47,333	7	8
			Total...Rs.	1,85,266	6	1

The net result of the working of the Municipal Workshops during the past year was a loss of Rs. 4,072-7-2 as explained in detail at page 88 of this report. Owing to the Budget expectations of the year 1890-91 of the whole of the Workshop expenditure being covered by recoveries from Loan and other sanctioned grants not having been realized, this was the only item of expenditure in the accounts which showed an excess over authorized grants.

Of the sum of Rs. 1,31,829-15-2 advanced for the execution of works in the Municipal Workshops, only Rs. 1,23,241-10-1 were recovered during the past year as stated at page 47 of this report, thus leaving the above net deficit of Rs. 4,072-7-2 after taking into account Rs. 4,515-13-11 for past year's unrecovered bills and for incomplete works to be adjusted and recovered during the current year.

	Rs.	a.	p.

Deduct—			
Loss on the Municipal Workshops ..... Rs.	4,072	7	2
Rs. ..	10,11,893	5	5

I have given in the margin the principal heads under which the large saving of Rs. 10,15,965-12-7, referred to in Statement C, was derived. The loss of Rs. 4,072-7-2 on the Workshops reduced the saving to Rs. 10,11,893-5-5.

	Rs.	a.	p.
General Superintendence	1,073	13	9
Assessment and Collection	2,500	0	0
Engineer's Department	2,08,497	3	6
Public Gardens	16,017	3	9
Health Department	4,528	9	4
Markets and Slaughter-houses...	4,633	1	7
Debt	83,440	2	9
New Works	1,39,525	11	11
Fire Brigade	474	3	5
Water Works	77,651	10	2
Miscellaneous	11,139	13	5
Total grants renewed..Rs.	5,49,481	8	7

I have also shown in the margin the chief heads for which grants aggregating Rs. 5,49,481-8-7 have to be renewed during the current year.

In the following table I have contrasted the actual opening Balance, Income and Expenditure, with the Estimates :—

Particulars.	Estimate.			Actuals.			Better than Estimate.		
	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
Opening Balance	5,00,000	0	0	13,31,321	8	3	8,31,321	8	3
Revenue	54,07,300	0	0	58,61,182	6	4	4,53,882	6	4
	59,07,300	0	0						
Expenditure { Original Estimate ...	58,00,194	0	0						
Expenditure { Subsequent, as per Statement B....	65,64,924	13	6	55,53,031	8	1	10,11,893	5	5

The large excess in the opening balance was due to its including the lapsed grants of Rs. 4,77,861-1-5 for 1889-90 renewed during the beginning of the past year. The difference of Rs. 3,53,460 has already been appropriated in the current year's Budget.

Rs. 1,20,000 only of the surplus revenue were anticipated at the time of framing the Budget for 1891-92 and consequently have been appropriated in that Budget.

Rs. 50,000 were similarly anticipated and appropriated on account of the above large savings in expenditure which, however, include Rs. 5,49,481-8-7 required to be renewed during 1891-92, to meet unpaid liabilities of the past year and for completion of works in progress or not taken in hand.

The following details show how the surplus funds, excluding adjustments, &c., have been utilized, how much of them have already been appropriated in the Budget for 1891-92 and what remains available for our future wants :—

							Rs.	a.	p.
Actual Cash Balance							3,30,157	11	7

From the above large surplus of about 13 lakhs nearly 5½ lakhs of the lapsed grants for the last year will, as already explained in detail in preceding paras., have to be renewed during 1891-92, leaving a net sum of 7½ lakhs to be still appropriated, provided Rs. 2½ lakhs paid for Victoria Garden improvements, filling in Roman Catholic Cemetery at Sewree and the survey for pipe sewers in Oomercarry and other districts, which had been sanctioned by the Corporation to be advanced temporarily from Surplus Cash Balance, are refunded or adjusted out of Loan Funds. Should it, however, be hereafter decided that all these sums should be met from current revenue, this balance of 7½ lakhs available for re-appropriation in the Budget for 1892-93 would be reduced to 5

lakhs or, say, 4½ lakhs after allowing for additional grants sanctioned up to date, amounting to Rs. 48,206-8-3 for the construction of the Garden bungalow and refreshment room, for Census charges, &c., &c. This satisfactory result of the great improvement in our revenue and of the large savings in expenditure, together with the Tansa Interest Account surplus of 7½ lakhs referred to in my No. 3599, dated 3rd March 1891, the increased duty on grain already sanctioned for 1891-92 and the enhanced revenue (including arrears) to be derived from the revised valuation of Government Buildings and Lands will, I have no doubt, enable us to avert further extra taxation for 2 or 3 years notwithstanding the increased provisions required for Tansa and other Debt, and for Police charges from the year 1892-93.

APPENDICES.

Nos. 1 A and B.—From the former statement, it will be observed that a bond of Rs. 500 was paid off during the past year to a Bombay holder, and that only one local holder of Rs. 500 remains unpaid, owing to his having lost the original debenture, whereas two London holders of Rs. 3,500 did not return, during 1890-91 as in the previous year, their bonds for repayment. The latter statement shows that the unpaid interest on account of these 6 per cent. debentures on 31st March 1891 was Rs. 140-13-4 against Rs. 204-5-3 at the close of 1890-91.

Nos. 1 C and D.—These Statements show that of the sums repayable during 1889-90 and 1890-91 on account of the 5 per cent. debentures of the Drainage and Water Works Loan of Rs. 26,94,000, Rs. 500 and Rs. 4,000 remained unredeemed in consequence of the holders not presenting them for repayment on or before 31st March 1891 and that outstanding interest at the end of last year was Rs. 14,325 against Rs. 11,575 at the close of 1889-90.

Nos. 1 E and F.—It will be seen from the former that Rs. 51,000 of the 5 per cent. Sanitary Works Loan debentures were paid off in July 1890 and the invested Sinking Fund on account of this loan amounted to Rs. 2,17,339-0-7 and from the latter that the outstanding interest on 31st March 1891 was Rs. 16,800, *i. e.*, Rs. 12-8-0 less than on 31st March 1890.

Nos. 1 G, H, J and K.—These show the relative amounts of Sinking Fund and outstanding interest on 31st March 1891 of the 12 lakhs Drainage and Water Works, the 7 lakhs Sanitary Works, the 10,08,500 Miscellaneous Works, and the 2,48,000 Agripada House Sullage Water Connections Loans.

No. 1 I shows the amount of interest due on the various instalments of the Tansa Loan, aggregating Rs. 1,22,00,000, paid by the Municipality and the Bank. It also shows that the unpaid interest on 31st March 1891 amounted to Rs. 22,033-8-9 against Rs. 6,918-14-9 at the end of 1889-90.

No. 1 L.—It will be noticed from this statement that, with the exception of Rs. 3,471-5-9, the interest that accrued on the various sums aggregating Rs. 34,12,500 raised between 25th September and 14th November 1890 on account of the 35 lakhs Various Sanitary Works Loan of 1890 was fully paid during the past year.

No. 2 gives as usual the total amount of Town Duty levied on various articles as provided under Section 192 (1) and the refunds allowed on the export of the same articles under Section 195 (1).

The opening and closing balances, the revenue and refunds, &c., of 1890-91, have been contrasted below with those of the preceding year:-

	1889-90. Rs.		1890-91. Rs.	
Opening Balance	5,825		13,876	
Revenue	12,61,317		17,67,748	
		12,66,642		17,81,624
Deduct—				
Refunds	5,85,701		7,87,959	
Closing Balance	13,876		14,145	
		5,99,577		8,02.104
Net Revenue		6,67,065		9,79,520
Less—Cost of Collections, &c.		48,338		60,922
Net Receipts after payment of Collection Charges	Rs.	6,18,727		9,18,598

Owing to the enhancement of the duty on Sugar from 6 to 8 annas per cwt. and on Ghee from 6 to 8 annas per Bombay maund, the gross Revenue for 1890-91 was estimated at Rs. 15,94,000 and the refunds at Rs. 7,87,000. A net revenue of Rs. 8,07,000 was therefore budgetted.

The gross yield, however, was Rs. 1,73,748 and the refunds were Rs. 959 more than the respective estimates. The closing balance was Rs. 269 larger than that at the beginning of the year. The net receipts were thus Rs. 1,72,520 in excess of the Budget provision as stated at page 44 of this report.

The gross yield during 1890-91 of the duty levied on the various articles authorized by the Act is compared in the margin with that of the preceding year. It will be seen from these figures that there was a net increase of over 5 lakhs, chiefly under Sugar and Ghee. The increases under grain, flour, beer and timber do not, like the decreases under wines and spirits and firewood, call for any particular remarks. The increase

Articles.	Actuals for 1889-90.	Actuals for 1890-91.	Increase	Decrease.
	Rs.	Rs.	Rs.	Rs.
Grain	2,41,378	2,55,144	13,766	...
Flour	7	44	37	...
Wines & Spirits	2,04,537	1,94,466	...	10,071
Beer	14,412	18,233	3,821	...
Sugar	4,79,547	9,24,613	4,45,066	...
Ghee	1,88,840	1.88,668	49,828	...
Timber	1,08,166	1,15,651	7,485	...
Firewood	74,430	70,929	...	3,501
	12,61,317	17,67,748	5,20,003	13,572

Net Increase... Rs. 5,06,431

under Ghee was due to the enhanced duty of 2 annas per maund sanctioned by the Corporation to be levied on this article as already stated above. Of the large increase of Rs. 4,45,066, owing to heavy importations(which are stated to be the largest on record),principally of German Beetroot Sugar, Rs. 83,134 were derived by the increased duty of 2 annas per cwt. sanctioned by the Corporation and Rs. 83,746 on account of larger consumption in the City. The balance of Rs. 2,78,186 had to be refunded owing to the very large exports of the cheap German Sugar for up-country use. The refunds allowed on such up-country exportations during the past year were Rs. 5,92,076 on 12,20,243 cwts. against Rs. 3,13,890 on 8,37,040 cwts. in 1889-90.

No. 3 is the usual Cash Account giving in detail the entire transactions of the past year, from which it will be seen that the ordinary income of the year, exclusive of Water Works and Stock adjustments,exceeded the ordinary expenditure by Rs. 5,76,834-5-11 as per margin.

Income (exclusive of Water Works and the nominal item of profit on Stores) ...	Rs. 47,11,984	4	1
Less—Expenditure (exclusive of Water Works) ...	„ 41,35,149	14	2
Surplus...	Rs. 5,76,834	5	11

This sum was nearly 3½ times the aggregate sum of Rs. 1,68,844-13-9 shown in Statement C for payment towards (1) reduction of Debt, (2) Building Fund Investments, (3) Fire Insurance Fund, and (4) Investment of Interest realized on the Insurance Fund.

Owing to further advances from Municipal Fund, the Water Works Accounts owed the former Rs. 14,43,468-10-3 on 31st March 1891 against Rs. 8,62,245-5-4 at the close of 1889-90.

It is unnecessary to show this debt due by the latter to the former fund under the provisions of the present Municipal Act. It would, therefore, be well to obtain the decision of the Standing Committee as referred to at page 77 of my last report, on the suggestion made at page 75 of the Administration Report for 1888-89 regarding the manner in which the Water Works Accounts should be kept in future.

LOAN WORKS.

The further expenditure of Rs. 125-5-8 on Intercepting drain from Pydhoni to Bellasis Road and Storm-water entrances raised the total expenditure on Surface Drainage works at the end of last year to Rs. 13,15,898-15-4.

Rs. 10,043-14-2 were expended in 1890-91 on the pipe sewer from Clare Road and the ovoid sewer from the Crawford Market. Thus the expenditure on Drainage works sanctioned to be carried out of the Loan of Rs. 20,88,000 (one of the 3 Sanitary Works Loans) aggregated Rs. 4,01,080-11-5 as per following details :—

			Sanctioned Grant.			Amount expended up to 31st March 1890.			Amount expended during 1890-91.			Total.

From the following statement it will be seen that the total expenditure up to 31st March 1891 on Drainage works authorized to be carried out of the 12 lakhs Drainage and Water Works Loan, amounted to Rs. 6,62,152-7-11, owing to Rs. 3,44,610-0-7 having been spent last year on Pipe Sewers, House Connections, Establishment and Contingencies as under :—

	Sanctioned Grant.	Revised estimate sanctioned under Standing Committee's Resolution No. 9276 of 17th Decr. 1890.	Amount expended up to 31st March 1890.	Amount expended during 1890-91.	TOTAL.

The value of Drainage works authorized to be undertaken out of the Miscellaneous Works Loan of Rs. 10,08,500 amounted to Rs. 54,941-0-11 at the close of last year, taking into account the further expenditure of Rs. 7,186-0-7 incurred in 1890-91 on the following works :—

	Sanctioned Grant.	Amount expended up to 31st March 1890.	Amount expended during 1890-91.	Total.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.

9" Pipe Sewer along Bellasis Road, Foras Road and Gilder Street	29,822 0 0	15,113 5 4	2,177 2 9	17,290 8 1
Total... Rs.	87,007 0 0	47,755 0 4	7,186 0 7	54,941 0 11

The sum expended up to 31st March 1891 on Agripada house sullage water connections, out of the loan of Rs. 2,48,000 sanctioned for the purpose, was Rs. 27,183-15-0, including Rs. 470 spent in the preceding year.

Further payments in the past year amounting to Rs. 2,073-13-0 for compensation of land bought from the Indian Manufacturing Co., and Solicitors' charges, brought up the cost of the Ripon Road to Rs. 1,41,107-4-2.

Including Rs. 3,623-15-6 spent in 1890-91, the expenditure on the Cross Road at Mahaluxmi from Clerk Road to Haines Road, sanctioned to be constructed out of the Miscellaneous Works Loan of Rs. 10,08,500, amounted to Rs. 14,155-10-8.

Rs. 1,61,120-11-7 were expended last year on Matunga and Sewree Cemetery Roads, which, with Rs. 37,738-11-8 spent in the preceding year on the former Road, enhanced the cost of Roads at Agripada and elsewhere sanctioned to be constructed out of the 15 lakhs provision in the 35 lakhs Various Sanitary Works Loan to Rs. 1,98,859-7-3.

Rs. 7,832-0-7 were expended in the past year on the enlargement of the Dhobies' Lines at Mahaluxmi. The total expenditure on the following miscellaneous works sanctioned to be carried out of Rs. 20,88,000 (one of the three Sanitary Works Loans) aggregated Rs. 87,110-9-6.

	Sanctioned Grant.	Amount expended up to 31st March 1890.	Amount expended during 1890-91.	Total.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.

Establishment Charges	8,803 2 6	8,803 2 6	....	8,803 2 6
Total..Rs	1,05,807 14 7	79,278 8 11	7,832 0 7	87,110 9 6

The sum of Rs. 1,98,913-8-8 advanced in 1889-90 for purchase of land on the flats was recovered out of the 35 lakhs Various Sanitary Works Loan raised during the past year. Rs. 181 were expended in 1890-91 for printing contract forms for the construction of the Halalkhor Chawl in Cursetji Suklaji Street. I have contrasted below

the sums expended up to 31st March 1891 on the miscellaneous works decided to be paid out of this loan with the sanctioned provisions :—

	Sanctioned Grant.	Amount expended up to 31st March 1890.	Amount expended during 1890-91.	Total.
	Rs.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Purchase of land on the flats for the disposal of Town Sweepings.....	2,00,000	1,98,913 8 8	....	1,98,913 8 8
Bullock Stables and Quarters for Scavengers	1,50,000	....	....	....
Chawl for Halalkhores in Cursetji Sookhaji Street	86,000	....	181 0 0	181 0 0
Purchase of land at Arthur Road	23,676	....	....	....
Total..Rs.	4,59,676	1,98,913 8 8	181 0 0	1,99,094 8 8

A further expenditure of Rs. 46,239-9-0 was incurred on the Erskine Road Market extension. Together with the sums spent on this extension, as also on the extension of the Arthur Crawford Markets, the total cost up to end of last year of the market extensions sanctioned to be met out of the 10,08,500 loan reached Rs. 3,33,825-6-2.

In addition to Rs. 2,13,638-0-2 paid in 1889-90 for the purchase of land for the Bhuleshwar Market extension, Rs. 25,871-9-2 had to be disbursed in the past year. Rs. 47,206-3-11 for the value of the area added to the Bhuleshwar and Bhoewada Roads were, however, transferred to Street Improvement charges. Thus the net amount paid for the site for extending the Bhuleshwar Market during the past two years out of the 35 lakhs Various Sanitary Works Loan was Rs. 1,92,303-5-5.

The total disbursements up to 31st March 1891 out of the Municipal Building Fund investment for the site, foundations, and superstructure of the new Municipal Offices, &c., amounted to Rs. 4,40,321-5-5, including Rs. 2,53,933-5-7 expended during the past year.

With the payments of Rs. 1,36,668-12-7 made in 1890-91, the advances for Victoria Garden improvements aggregated Rs. 2,29,868-12-7.

As sanctioned in Corporation's Resolution No. 7739, dated 13th March 1890, Rs. 7,787-13-5 were, pending final adjustment of the amount hereafter, advanced from Surplus Cash Balance, for filling in rocky, &c., parts of the Roman Catholic Cemetery at Sewree.

The advances to Municipal Officers were reduced from Rs. 3,42,883-6-4 on 31st March 1890 to Rs. 18,977-14-5, owing chiefly to the adjustment in 1890-91, of advances made in the preceding year for Tansa contingent and pipe remittance charges.

The balances of stock in the hands of the various departments of the Municipality on 31st March 1891 aggregated Rs. 17,53,873-11-3 against Rs. 17,74,273-12-3 at the end of 1889-90. This decrease was more than accounted for by the issue of pipes, &c., to Drainage contractors out of the Drainage Engineer's stock.

It is very satisfactory to observe that by the adjustment of large amounts of Workshop and other departmental works bills, and the writing off of Rs. 6,649-10-6 on account of irrecoverable and time-barred private works bills, the outstandings on private and departmental

works and workshops were reduced from Rs. 1,64,762-2-6 on 31st March 1890 to Rs. 19,862-13-3 at the end of last year; and I am quite confident that the recent order issued by you on the subject will enable us to keep the private works outstandings to a very low figure and the departmental works outstanding will be almost nil as was the case prior to 1879.

No. 4, Liabilities.—The balance due to Government at the close of last year on account of the Surface Drainage and the 2nd 15 lakhs Loan was Rs. 14,91,455-12-7 against Rs. 15,36,999-7-11 on 31st March 1890. Including Rs. 31,79,542-6-5 shown under Statement No. 7 as due on account of the 40 lakhs Tulsi Loans, the total sum owing to Government on account of the consolidated loan on 31st March 1891 was Rs. 46,70,998-3-0.

One local holder of a Rs. 500 debenture of the 6 per cent. Municipal Loan was paid off during the past year, leaving Rs. 4,000 still unpaid of the House Rate and Market Loans of 1867-68 for the reasons given at page 70 of this Report.

Bonds of the 5 per cent. 27 lakhs loan of 1878 of the value of Rs. 34,000 were redeemed (Rs. 19,894-9-3 from Municipal Fund and Rs. 14,105-6-9 from Water Works Account) during 1890-91.

Debentures for Rs. 51,000 of the 44 lakhs Sanitary Works Loan were similarly redeemed in July 1890, they having become repayable on the 1st of that month (Rs. 28,989-12-6 from Municipal Fund and Rs. 22,010-3-6 from Water Works Account).

Of the balance of Rs. 1,54,000 of the Agripada loan of Rs. 2,48,000, Rs. 6,000 were allotted for the Sinking Fund at par, and of the remainder Rs. 75,000 were raised from the public at 104 and Rs. 73,000 at 104½ during the past year.

Rs. 34 lakhs (29 lakhs at 103 and 5 lakhs at 103¼) were raised during 1890-91 on account of the 35 lakhs Various Sanitary Works Loan. Rs. 44,000 and Rs. 3,000 were respectively allotted at par to Sinking and Municipal Buildings Insurance Funds, reserving Rs. 53,000 for similar allotment to Sinking Fund in the current year.

Rs. 36,500 have already been allotted to that Fund up to date and the balance of Rs. 16,500 will be allotted as soon as other investments on account of the Fund become due.

The net amount of premia, amounting to Rs. 1,20,115-2-10 obtained last year on the raising of the above two loans and the fifth instalment of the Tansa Loan, was credited to the respective loans (Rs. 64,261-10-6 Municipal Fund and Rs. 55,853-8-4 Water Works Account) as per Corporation Resolution No. 5294, dated 19th November 1888. The sums so credited to the different loans during the past three years and which will be available for meeting any excess on the loans or for reduction of the amount to be borrowed hereafter as may from

time to time be sanctioned by the Corporation under the terms of the above Resolution are given below :—

The deposits from contractors, &c., stood on 31st March 1891 at Rs. 2,44,855-11-4 against Rs. 1,30,834-10-3, chiefly on account of deposits for the new Municipal Office and other works and to our having received from Government Rs. 53,405 for diverting the 32″ water main from the site of the new Byculla Station.

The sum of Rs. 2,025-10-5, collected in March 1891 on behalf of Government on account of Income Tax, was paid into the Government Treasury during the current year.

Rs. 31,712-7-8 remained available at the credit of Loan Works Establishment at the close of 1890-91.

The total liabilities of the Municipal Fund (exclusive of those incurred on account of Water Works, shown under Statement No. 7) amounted to Rs. 1,19,96,281-4-9 against Rs. 92,47,127 at the end of the preceding year.

No. 5, *Assets.*—The recoverable advances were reduced from Rs. 7,37,961-13-8 on 31st March 1890 to Rs. 2,59,050-7-1 at the end of last year.

The invested funds of undrawn loan balances, Surplus Cash, Building, Sinking and Insurance Funds and Contractors' and other deposits, aggregated Rs. 71,35,864-3-6 at the end of last year against Rs. 48,51,734-13-8 at the close of 1889-90. The details of the Sinking Fund investments of the various 5 per cent. Loans are given below :—

Plant, Stock, &c., of the value of Rs. 17,53,873-11-3 was in possession of the various heads of Departments on 31st March 1891.

Property of the value of Rs. 51 lakhs (Rs. 45½ lakhs as per valuation lists of 1883-84 and Rs. 5½ lakhs for properties, &c., acquired subsequently) remained unbooked as in previous years. The lists framed in 1883 and revised in 1887 will require considerable further revision. I think the matter should be settled at an early date, as pointed out in my last Administration Report.

The cost of overbridges, roads, drainage and other works, executed up to 31st March 1891 out of Loan Funds, &c., aggregated Rs. 76,39,217-0-9.

ASSETS.					
Advances, Investments and Cash Balance			Rs. 77,25,072	a. 6	p. 2

LIABILITIES.					
Municipal Fund		Rs.	1,19,96,281	4	9
Water Works' Account		„	2,22,59,983	11	3
Total Liabilities		Rs.	3,42,56,265	0	0

From the marginal contrast of the entire Assets and Liabilities of the Corporation, it will be seen that the former (not including property, &c., worth over 8¼ lakhs acquired since 1883-84) exceeded the latter by over a crore and a half of rupees.

For the reason already given at page 72 of this report, I have continued to show the Water Works accounts in the usual form in Statements Nos. 6 and 7.

No. 6 shows that the difference between the Income and Expenditure (including repayment of Capital and invested Sinking Fund), amounting to Rs. 99,838-9-11, had to be made good from Municipal Fund receipts.

From *No.* 7 it will be seen that a further instalment of 25 lakhs, which was raised from the public during the past year at 102, brought up the total amount borrowed on account of Tansa works to Rupees one crore and 22 lakhs. The net premia obtained on this instalment, as also on the Water Works portion of the 35 lakhs Various Sanitary Works Loan were credited to the respective loans under the terms of the Corporation's Resolution referred to at pages 79 and 80 of this report. Excluding Rs. 2¾ lakhs expended since 1883-84 on mains and other Works, the cost of the entire Water Works of the City up

to the end of last year was nearly Rs. 2½ crores against the liability on account of Loans, &c., of about 2¼ crores.

No. 8, *Garden Fund.*—This statement is given for the first time, the Corporation in their Resolution No. 7057, dated 17th February 1890, having approved of the following being credited to a separate head in the Municipal Accounts :—

"All grants made by the Corporation for the maintenance of the "Victoria Gardens and the Zoological collections therein, as well as "all fees for admissions, all donations, subscriptions or gifts to the "gardens and the zoological collections and all garden receipts, such "as sale of plants, flowers, leaves, fruits, &c., &c, and that the "budgetted expenditure on the Gardens and Zoological collections be "debited to such fund alone."

From the statement it will be observed that Rs. 15,852-11-10 remained unexpended out of the sanctioned budget grants and sanctioned appropriations of donations and garden receipts which will have to be renewed during the current year for the completion of the purposes for which the grants were made. There was, likewise, an unappropriated balance of Rs. 9,127-9-5 from the garden receipts and fees, including Rs. 300, contributed by H. R. H. the Duke of Connaught and His Excellency Lord Reay. This sum can be appropriated with the sanction of the Corporation for further improvements in the gardens during the current year.

STORES.

A further reduction of over twenty-two thousand rupees in the balance of stock in charge of the Inspector of Stores was effected during the past year. The gradual reduction made during the last eight years amounted to over 2 lakhs as detailed below :—

		Rs.	a.	p.
Balance on 1st March	1884	2,72,834	12	0

The principal items of stock at the end of last year, contrasted with

| | | |

The large reductions mentioned above were due (1) to the transfer to the proper Department of the articles purchased for Water Works; (2) to the sale of all unserviceable stores as directed by the Corporation; and (3) to the strict adherence to the rules introduced by Mr. Ollivant in 1883-84.

Stores, &c., of the value of Rs. 453-9-11 were sold to private parties.

Unserviceable and surplus stock (not useful for Municipal purpose) was sold by public auction and realized Rs. 1,036-11-9.

The auction and private sales above referred to, the issues of available stock to the Municipal Workshops, Water Works and the Health Departments, and the loss in book-value by auction sale resulted in the total reduction of Rs. 22,187-6-0 in the stock balance referred to in the opening remarks.

Earthenware pipes of the book-value of Rs. 53,590-2-3 as per items marked A were again put up to auction last year in convenient lots, but no bid was offered for their purchase.

These pipes, as already stated in my No. 239, dated 21st April 1891, have been in our stock for nearly 22 years, and they have been pronounced by the Executive Engineer to be utterly useless for drainage purposes; but if these pipes are utilized as proposed in my above letter, the balance of stock would be reduced to Rs. 13,000, about the minimum absolutely necessary for the efficient working of the Municipal Workshops and the Health Department.

As stated in my last report, rules similar to those in force at the Workshops framed for observance at the Bellasis and Chinchpoogly Stores, were, with your sanction, introduced during the past year. The result has been satisfactory, inasmuch as the Inspector of Stores has been enabled, while taking stock, to discover several discrepancies in the Drainage Stock, owing to certain issues, &c., remaining unadjusted for a long time. As soon as they are adjusted and proper explanation furnished for certain deficiencies I shall report to you separately on the subject.

The Chinchpoogly Store Books having only been received nearly at the end of 1890, and as the whole year's postings, &c., had to be done within a very limited time, the Inspector of Stores was unable to take the Stock in conjunction with the Water Works Staff as he had done at the Workshop and the Bellasis Stores. He has, however, been directed to supervise the taking of Stock before the close of the current year, and the result will be reported to you.

The present mode of framing the Water Works Stores Accounts, and the Annual Stock Return, will have to be improved upon to bring it in keeping with those in force at the Drainage and General Stores and in other Departments of the Municipality and to facilitate the closing of Stock Accounts, which was on this account considerably delayed this year. It also prevented the submission of this report earlier, although it was otherwise completed on the 5th instant. I have discussed this

question with the Deputy Engineer, Water Works, who has kindly agreed to make certain modifications to meet the requirements of this Office.

WORKSHOPS.

I have contrasted below the Municipal Workshops' receipts and expenditure and outstanding balances of the past year with those of 1889-90:—

	1889-90.		1890-91.	
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
To Balance of last year's account		46,045 8 9		1,10,933 3 7

				2,38,690 11 7
Loss.....		.....		4,072 7 2
Total...Rs.		2,15,610 13 10		2,42,763 2 9

The decrease of about Rs. 33,000 in the outlay of the past year was entirely due to portions of Erskine Road Market extensions and heavy repairs to the Love Grove Pumping Station Engines, &c., having been executed in the shops in the preceding year.

The sum charged to all Departments and private parties over and above actual charges for labor and stores at the fixed rate of 25 per cent.

to cover shop and supervision, &c., charges amounted to Rs. 26,520-14-2, as will be seen from the following details :—

Nature of Works.	Actuals.	Amount charged including 25 °/c, &c.	Profit by the charge of fixed percentage, &c.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
Private works	141 13 6	681 10 5	539 12 11
Departmental works	98,297 2 8	1,24,278 3 11	25,981 1 3
Add—			26,520 14 2
Sale of old iron, &c.....			598 14 8
Total Earnings.....			27,119 12 10
Scavengering carts	6,717 15 2	8,397 7 0	1,679 7 10
Drain carts	8,299 15 2	10,374 14 11	2,074 15 9
Night-soil carts.....	6,724 11 8	8,405 14 8	1,681 3 0
Watering carts	6,678 3 3	8,347 12 1	1,669 8 10
Scavengering, drain and night-soil carts	21,742 10 0	27,178 4 7	5,435 10 7

The cost of repairs to Municipal carts aggregated over one-fourth of the total amount of work turned out in the shops.

From the total earnings obtained by the fixed percentage charged as above, it was estimated that the following expenses would be fully met and hence the Workshop receipts were entered in the Budget at the same figure as the estimated expenditure :—

	Rs. a. p
Supervision Establishment...	12,922 6 9
Workshop Stores	1,135 0 0
Shop Charges	12,596 4 6
Repairs, &c.	4,385 10 8
Retrenchments	152 14 6
	31,192 4 0

These charges, however, being in excess of the gross receipts, amounting to Rs. 27,119-12-10, obtained by the fixed percentage charged for all works executed in the shops, &c., the working of the shops in the past year shows a net deficit of Rs. 4,072-7-2.

The outstandings, I am glad to observe, were reduced from Rs. 1,10,933-3-7 on 31st March 1890 to Rs. 6,146-5-10. This last-mentioned sum is composed of outstandings of Rs. 1,630-7-11 from 1881 to 1889-90, those of Rs. 2,126-5-8 for the past year and Rs. 2,389-8-3 for incomplete works; and I fully believe almost the whole of it will, probably, be adjusted before the end of the current year.

GENERAL REMARKS.

The entire payments made through the Paymaster during the past year aggregated Rs. 14,89,033-12-9 and the net unpaid wages credited to Savings and Deposit Account amounted to Rs. 5,671. These sums were the largest as compared with any previous year, as will be observed from the following contrast from 1873, the year in which a General Paymaster was first appointed :—

Year.	Payments.	Net Unpaid Wages.
	Rs.	Rs.
1872	In this year there was no Paymaster.	2,177
1873	8,40,451	3,098

Adjustments	„	1,86,40,291 0 9
Total	Rs.	5,14,05,689 0 7

The figures given in the margin show that the aggregate receipts and disbursements of the past year, together with adjustments, amounted to over Rs. 514 lakhs. Similar annual figures from the year 1874 are given below, which show that last year's transactions were the largest of all former years :—

Rs.	383	lakhs in	1889-90
„	503¼	„	1888-89
„	400¼	„	1887-88
„	500	„	1886-87

1889-90	22,064	5,85,700	11	0
1890-91	27,891	7,87,958	10	0

I have shown in the margin the number and amount of Town Duty claims passed and paid from 1873 to end of last year. It will be noticed therefrom that, except in the 2 years during which duty was levied on Kerosine oil and that levied on grain was 5 annas, the number of claims has been the largest since 1873.

The following figures show the number of receipt and disbursement vouchers scrutinized annually by this Department from 1876:—

Year.	No. of Receipt Vouchers.		No. of Disbursement Vouchers.		Total including Journal Vouchers.
1876	4,862	+	12,073	=	16,935
1877	5,013	+	14,410	=	19,423
1878	5,511	+	18,783	=	24,294
1879	5,626	+	26,163	=	31,789
1880	5,677	+	24,314	=	29,991
1881	5,917	+	27,030	=	32,947
15 months. {1882 1st qr. of 1883}	7,839	+	34,085	=	41,924
		or 33,540 proportionately for 12 months.			
1883-84	6,352	+	25,819	=	32,171
1884-85	6,942	+	32,872	=	39,814
1885-86	6,855	+	31,008	=	37,863
1886-87	7,040	+	36,966	=	44,006
1887-88	7,197	+	42,283	=	49,480
1888-89	6,527	+	42,989	=	49,516
1889-90	6,358	+	36,468	=	42,826
1890-91	15,329	+	44,022	=	59,351

Both the Receipt and Disbursement vouchers were largest of those annually adjusted from 1876. The very large increase in the Receipt vouchers was due to all fees of the License and Engineering Departments being paid, as decided by Mr. Ollivant, directly into this office from last year, instead of to the Departments concerned.

The number of Inward letters received (exclusive of 44,022 vouchers and 24,295 Ward Remittance Reports) and of outward letters despatched (exclusive of 898 intimations to parties to call for receiving payments) during the past year were, respectively, 17,647 and 4,007 against 14,683 and 3,192 in the previous year and 2,250 and 1,301 in 1875.

Bonds for the 5th instalment of 25 lakhs of the Tansa Loan, the balance of Rs. 1,54,000 of the Agripada House Sullage Water Con-

nections Loan of Rs. 2,48,000 and for Rs. 34,47,000 of the 35 Lakns Various Sanitary Works Loan were issued as under :—

FIFTH INSTALMENT OF THE TANSA LOAN.

150	bonds of	Rs.	10,000	each	Rs. 15,00,000
800	,,	,,	1,000	,,	,, 8,00,000
400	,,	,,	500	,,	,, 2,00,000
1,350					Rs. 25,00,000

BALANCE OF THE AGRIPADA HOUSE SULLAGE WATER CONNECTIONS LOAN OF Rs. 2,48,000.

308 Bonds of Rs. 500 each ..... Rs. 1,54,000

PORTION OF 35 LAKHS VARIOUS SANITARY WORKS LOAN.

11	bonds of	Rs.	20,000	each	Rs. 2,20,000
60	,,	,,	10,000	,, ...	,, 6.00,000
224	,,	,,	5,000	,, ...	,, 11,20,000
40	,,	,,	2,500	,, ...	,, 1,00,000
1	,,	,,	2,000	,, ...	,, 2,000
662	,,	,,	1,000	,, ...	,, 6,62,000
1,486	,,	,,	500	,, ...	,, 7,43,000
2,484					Rs. 34,47,000

The above figures speak for themselves. The payments through the Paymaster, the gross outturn of the year, the receipts and disbursement vouchers and the number of Inward and Outward letters were all the largest of those in any of the former years.

Every member of the Establishment, with a few exceptions, have worked very hard and zealously for considerably prolonged office hours, and have assisted in bringing about the satisfactory results described in the preceding paras.

The Deputy Accountant, Mr. Maneckshaw Cawashaw Talyarkhan, acted during my absence on leave from 1st September to 20th October 1890 and with his usual assiduity kept up the prestige of this Department as he did on former occasions when he acted for me. Mr. Dadaji Bhanaji, the Head Audit Clerk, acted for the Deputy Accountant during the above period, and well conducted the duties of that post as before.

APPENDICES

TO THE

CHIEF ACCOUNTANT'S REPORT FOR 1890-91.

H. A. ACWORTH,

Municipal Commissioner.

REVENUE.

1. REPORT of the ASSESSMENT and COLLECTION DEPARTMENT by Mr. R. P. BRUNTON, Assessor and Collector, as forwarded with his letter No. 11944, dated 13th August 1891.

2. REPORT of the REVENUE and REFUND AUDIT DEPARTMENT by RAO BAHADUR VIRPRASAD TAPIPRASAD, Revenue and Refund Audit Officer, as forwarded with his letter No. 1674, dated 12th August 1891.

1.—*Assessment and Collection Department.*

I was absent on leave from the 1st June to the 30th November, and beg to express my thanks for the liberality with which I was treated.

In August, defalcations, amounting to Rs. 31,809-4-6 were found to have been committed by a clerk of A Ward. The details are found under Commissioner's No. $\frac{A}{13238}$ of 1890-91.

A Committee of the Corporation was appointed to investigate the questions referred to in the Commissioner's letter, but had not made its report at the close of the official year.

Another defalcation of Rs. 582-13-2 was committed by a clerk of E Ward in February last. The amount will be recovered from the surety, and a warrant for the arrest of the ward clerk is in the hands of the Police.

The appointment of Assistant Superintendents to some of the wards has acted as a material check on frauds by ward clerks, but it is to be regretted that the appointments were not for *all* the wards, and especially for C, one of the largest and most important of the series.

The whole of the duties laid down by the Manual cannot be performed by myself and subordinates, and in my evidence before the Defalcations Committee and, subsequently, under my No. $\frac{4493}{1891\text{-}2}$

I have made suggestions for the modification of some of the Manual's requirements. Additional hands are wanted both in the out-door and in-door establishments. These I will ask for in detail in the next Budget.

1. The total amount collected under all heads, exclusive of miscellaneous receipts, was Rs. 37,07,137-2-4 against the estimated amount of Rs. 36,55,000, being an increase over the estimate of Rs. 52,137-2-4.

2. This increase is due—

1st.—To the existing valuations of properties being increased.

2nd.—To the erection of new properties.

3. As compared with the total collections for the previous year, which amounted to Rs. 35,05,709-15-9, the increase for the year under report is Rs. 2,01,427-2-7.

4. This increase is owing—

1st.—To the reasons given in para. 2.

2nd.—To an additional $\frac{1}{4}$ per cent. being added to the previous General Tax of $8\frac{1}{2}$ per cent.

5. The total collection for the last five years, exclusive of miscellaneous receipts (*see* Table XVII) is as shown below :—

1886-87.....	Rs.	29,22,556	5	6
1887-88.....	„	29,77,206	9	0
1888-89.....	„	30,86,298	9	0
1889-90.....	„	35,05,709	15	9
1890-91.....	„	37,07,137	2	4

Registration of Properties.

6. At the close of the year there was a net increase of 448 properties made up as follows :—

New erections	675	
Buildings demolished	388	
		287
Subdivision of existing properties ...	161	
Total increase...		448

The following table gives the details of the number of properties on the Assessment Book for the last five years :—

Years.	Classification of properties according to description.					Classification of properties according to liability to pay General Tax.			
	Buildings.	Salt-pans.	Cocoa-nut plantations.	Vacant lands, including tanks, wells, &c.	Total.	Number assessed to General Tax.	Number exempt or compounded for on special terms.	Small plots of unproductive land, for which no bills are issued.	Total.
1	2	3	4	5	6	7	8	9	10
1886-87	31,369	199	1,283	15,619	48,470	33,888	5,642	8,940	48,470

Valuation chargeable with General Tax...	1,86,59,008	2,00,24,486	2,11,38,534	2,19,43,611	2,27,69,337
Valuation exempt from General Tax...	29,50,813	27,49,277	27,94,088	54,02,381	54,40,198
Valuation for which no General Tax bills issued	17,409	18,583	18,421	18,367	17,820
Total valuation...	2,16,27,230	2,27,92,346	2,39,51,043	2,73,64,359	2,82,27,355
Increase over preceding year's valuation	16,02,007	11,65,116	11,58,697	34,13,316	8,62,996

8. The increase is accounted for as follows :—

Years.	Rise in rents and correction of under-assessments.	Erection of new buildings.	Enlargements.	Adjustment of the difference between the Municipal Commissioner's valuation of Port Trust property and that finally adopted by Government.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.
1886-87	4,87,791	2,53,088	1,64,041	6,97,087	16,02,007
1887-88	3,78,827	4,96,187	2,90,102	.....	11,65,116
1888-89	3,89,484	4,65,890	3,03,323	.....	11,58,697
1889-90	*26,30,585	5,65,360	2,17,371	.....	34,13,316
1890-91	1,70,220	4,85,643	2,07,133	.....	8,62,996

* Of this amount, Rs. 19,83,427 represent the increase of valuation on account of Government properties not hitherto assessed.

9. The following tables show the increase in property taxes as compared with the previous year :—

1.—*General Tax.*

1889-90.			1890-91.				Increase.
8½ per cent. on Rateable Value.	Compounded sum payable by Government and Port Trust.	Total.	8¾ per cent. on Rateable Value.	Compounded sum payable by Government.	Compounded sum payable by Port Trust.	Total.	
Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
14,56,345 3 0	2,23,177 0 0	16,79,522 3 0	15,64,710 1 7	50,000 0 0	1,79,265 5 0	17,93,975 6 7	1,14,453 3 7

10. Of this increase of Rs. 1,14,453-3-7, Rs. 49,827-13-11 are due to the additional tax of ¼ per cent. and the balance of Rs. 64,625-5-8 to increase in the value of properties.

11. The amount of General Tax on properties, exempt under section 143 of the Act, does not appear in the above table. This amount, as contrasted with that of the previous year, is as follows :—

	Rs.	a.	p.
For 1889-90	4,13,282	2	9
„ 1890-91	4,28,415	10	6

2.—*Water Tax.*

3.—*Halalkhore Tax.*

1889-90.			1890-91.			Increase.
On Value.	Special service.	Total.	On Value.	Special service.	Total.	
Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
4,48,280 13 9	69,292 14 4	5,17,573 12 1	4,88,916 8 6	65,507 0 8	5,54,423 9 2	36,849 13 1

12. The total demand on account of property taxes for 1890-91 amounted to Rs. 34,75,897-15-4, to which must be added Rs. 18,918-2-5, demands on account of previous years, making a total demand of Rs. 34,94,816-1-9.

13. Of the above total demand, a sum of Rs. 16,605-0-7 was allowed as drawback under section 158 (2) of the Act, and the sum of Rs. 2,29,265-5-0 was the amount payable by Government and the Port Trust. For the recovery of the remainder, bills were issued from this office as under :—

Bills issued during the year 1890-91.

For what year.	Bills issued.		REMARKS.
	No.	Amount.	
		Rs. a. p.	
1886-87	4	76 2 0	
1887-88	8	240 0 0	
1888-89	13	530 3 6	
1889-90	303	18,071 12 11	Chiefly bills modified on account of Water and Halalkhore Taxes and alteration in valuation.
Total ...	328	18,918 2 5	
1890-91	74,121	32,30,027 9 9	
Total ...	74,449	32,48,945 12 2	

14. The outstanding balance on account of property taxes at the end of 1889-90, as shown in the Report for that year, was 5,297 bills, amounting to Rs. 2,97,277-12-9 ; consequently the total number of bills of all years for collection in 1890-91 was 79,746, amounting to Rs. 35,46,223-8-11, as against 80,051 bills, amounting to Rs. 33,40,439-6-5 for 1889-90.

15. At the end of the year under report the total outstanding was 6,294 bills for Rs. 4,15,800-10-1 as compared with 5,297 bills for Rs. 2,97,277-12-9 at the end of 1889-90.

The large increase in outstanding is due chiefly to bills disputed on account of Water and Halalkhore Taxes and one-fifth drawback. There is also included the sum of Rs. 25,552-1-5 due by the Port Trust and pending the settlement of the Assessment of the Trust's properties and Rs. 32,474-1-8 on account of the defalcations in August and February, which amount will be reduced when the sums recovered from the securities are adjusted.

Up to the 10th instant the sum of Rs. 1,79,640-0-8 of the outstandings have been recovered.

16. The following table gives details of the amounts which had to be collected during the year 1890-91 :—

Taxes.	To be collected.				Collected.			Uncollected.	Deduct Irrecoverable Bills.						Balance outstanding at the end of 1890-91.		
									On account of former years.				On account of 1890-91.	Total.

(a) But of this amount, Rs. 18,918-2-5 in 328 amended bills were issued for property.

Tax on Vehicles and Animals.

17. The total demand on account of the tax on vehicles and anima[illegible] for the year ended 31st December 1890 was Rs. 1,66,274-10 against Rs. 1,68,504-8-0 for the previous Calendar year.

The decrease is owing to the taxes being reduced from 1st April 1889. The taxes were charged for the quarter ended 31st March 1889 under the old Acts (1872 and 1878), which were higher than those levied under the present Act. The number of vehicles and animals taxed shews an increase. The total demand for the year was Rs. 1,76,953-12-2, which includes Rs. 10,432-9-2 outstanding balance, and Rs. 246-9-0 amount of bills for former years issued during this year. The total number of wheel tax bills issued was 11,605.

18. The amount actually collected during the year was Rs. 1,56,605-9-4. The amount collected in the previous year was Rs. 1,62,679-12-10.

Of the amount outstanding on 31st March, Rs. 9,108-1-0 were collected up to 10th instant.

The details are given in the following table :—

To be collected.			Collected			Uncollected.	Deduct Irrecoverable Bills.						Balance outstanding at the end of 1890-91.		
							On account of former years.

2.—*Revenue and Refund Audit Department.*

1. The Revenue Audit branch of the office was organized for the first time in the year under report, and the several members of its subordinate staff were appointed on different dates between April and June 1890. A majority of these men were entirely new to the systems followed and the Revenue Forms kept in the several Departments, and some time was necessarily taken up by them in studying these, and then in being put in the way of their audit. This report, therefore, cannot contain an account of a full year's work of the Revenue Audit branch of the office.

I.—REVENUE AUDIT.

1. Assessor and Collector's Department.

(*a*)—*Ward Offices.*

2. For the reasons above stated it was not possible to do the quarterly audit of the Ward Offices due on the 1st April and 1st July 1890 for the 1st and 2nd quarters of the year under report. The books and balances on 1st October 1890 and 5th January 1891 for the 3rd and 4th quarters respectively, in all the seven wards were, however, examined on due dates with the following results :—

Ward.	No. of Ward Clerks or sets of Books examined.	Balances examined on 1st Oct. 1890, 3rd quarter.		Balances examined on 5th Jan. 1891, 4th quarter.		Total examined.	
		No. of Bills.	Amount.	No. of Bills.	Amount.	No. of Bills.	Amount.
			Rs. a. p.		Rs. a. p.		Rs. a. p.
A	7	2,244	2,03,711 1 6	4,412	3,04,503 12 10	6,656	5,08,214 14 4
B	9	1,643	85,449 12 4	3,482	2,04,618 1 6	5,125	2,90,067 13 10
C	12	1,109	68,579 2 9	4,914	2,38,183 5 3	6,023	3,06,762 8 0
D	7	587	16,392 6 7	1,421	51,206 5 0	2,008	67,598 11 7
E	9	1,048	35,662 11 7	3,859	1,13,320 10 5	4,907	1,48,983 6 0
F	5	387	10,771 12 2	749	14,135 7 7	1,136	24,907 3 9
G	5	405	15,035 4 4	1,643	25,737 9 6	2,048	40,772 13 10
Total...	54	7,423	4,35,602 3 3	20,480	9,51,705 4 1	27,903	13,87,307 7 4

3. The 27,903 bills for Rs. 13,87,307-7-4 were checked in detail with the Ward Office bill-book, Form 16 (every entry in which was subjected to scrutiny), and in totals, which were themselves tested with the book kept under para. 9 at page 155 of the *Manual*, which,

in effect, serves as the Ward Clerk's Ledger, as also with the Head Office accounts, Forms 8 and 9, also in detail and in totals respectively. It was the striking irregularities discovered in the course of the above audit of the balances of Ward Clerk Manekjee Adarjee, of the E or Byculla Ward, to which the attention of the Assessor and Collector was drawn in this Office No. 3848 of 24th January 1891, that led to the detection of his defalcations before they could reach anything like the length of those committed by Jamsetjee Mancherjee Hakim.

4. In this year the Office was entrusted with the special work of examining the bill-books of Jamsetjee Mancherjee Hakim from the date of his entry into the Municipal service in 1884 up to the close of 1889-90. The quantity of work done is shown in the following table and the conclusions to which the state of his books led were submitted to you in a special report under this Office No. 3287, dated 16th December 1890, as required.

Years the Bill-Books of which were examined.	No. of Entries examined with Head Office Accounts.		
	On account of Property Taxes and Wheel Tax.	On account of Meter Hire.	Total.
1884-85	3,314	.....	3,314
1885-86	3,050	28	3,078
1886-87	2,904	36	2,940
1887-88	2,861	6	2,867
1888-89	3,198	59	3,257
1889-90	3,140	38	3,178
Total ...	18,467	167	18,634

5. On the 2nd March 1891 the books and balances of all the nine Ward Clerks in the E or Byculla Ward had to be subjected to a special audit in consequence of the defalcations of Manekjee Adarjee. The balances examined on this occasion amounted to 2,325 bills for Rs. 76,761-12-11, which were checked in detail and in totals with the Ward Office books and the Head Office accounts in the manner referred to in para. 3 above.

(b)—Head Office.

6. The 1,500 exemptions from the payment of the General Tax, under Section 143 (1) (*a*) of the Act, aggregating Rs. 60,707-15-6, as shown in the Assessment Book, Form 1, were duly scrutinized; while the charges for Water and Halalkhor taxes in Form 3, which

contained 50,425 entries, were in all cases carefully examined with a view to see that no property which was not entitled to exemption from the payment of them under the Commissioner's orders under Section 142 (2) in the case of the Halalkhor tax and under Section 141 in the case of the Water tax, escaped these taxes. Similarly 6,200 entries out of a total number of 14,490 in the Register of the Tax on Vehicles and Animals were checked with the quarterly returns from Ward Offices.

7. The alterations in value in the Assessment Book, Form 1, made through the Increase and Decrease Statements, Forms 11, 11A, and 11B, were checked with the authority for such alterations as contained in your orders in the Tabulated Ward Report, Form 13. The following table exhibits the details :—

Ward.	Total number of entries in Tabulated Ward Report.	Total number of entries in Forms 11, 11A and 11B.	Original valuation.	Revised valuation.	Difference.
1	2	3	4	5	6
			Rs.	Rs.	Rs.
A	254	556	39,85,903	42,01,282	2,15,379
B	404	677	3,51,010	4,17,004	65,994
C	1,062	1,220	9,30,762	12,29,070	2,98,308
D	582	734	5,25,613	6,99,881	1,74,268
E	615	745	4,13,328	5,39,978	1,26,650
F	560	695	2,45,951	3,53,868	1,07,917
G	463	562	2,20,145	3,58,952	1,38,807
Total...	3,940	5,189	66,72,712	78,00,035	11,27,323

Ten per cent. of the entries in column 3 of the above table were traced through all the Assessment and Collection Accounts.

8. The following table exhibits the number of $\frac{1}{5}$ Drawback Claims under Section 158 (2) of the Act, which were scrutinized by this office during the year under report :—

Ward.	1st Half of 1890-91.		2nd Half of 1890-91.		Total for the year.	
	No. of claims.	Amount.	No. of claims.	Amount.	No. of claims.	Amount.

9. 241 Irrecoverable bills, as per margin, were examined and submitted, in the Form prescribed, to you for action under Section 216 of the Act and were written off under the sanction of the Standing Committee, No. 13323, dated 18th March 1891.

Ward.	No. of Bills.	Amount.
		Rs. a. p.
A	39	336 1 7
B	56	904 8 3
C	16	151 0 4
D	31	362 6 5
E	46	225 14 6
F & G	54	1,605 13 9
Total ..	241	3,585 12 10

10. The number of complaints against valuations under Section 163 of the Act heard by the Acting Revenue and Refund Audit Officer during my absence on privilege leave was 109 in the A or Fort Ward and 308 in the C or Bhuleshwar Ward, giving a total of 417. In addition to this I had to attend to the disposal of 20 complaints against the assessment of Educational Institutions. The Election Roll was also scrutinized with a view to see that the requirements of the Municipal Act, as interpreted by the Municipal Solicitors, were duly complied with.

11. It will be noticed that the audit of the Head Office Accounts might have been more complete than it has been. The reasons may briefly be stated as follows :—

(1) The Assessor and Collector's Accounts for 1890-91 have not yet been finally closed and signed as required by the *Manual*, so that it has not yet been practicable to audit them in their totals, it being impossible to delay this report any longer.

(2) This office was engaged in laborious special work in the year under report in connection with defalcations.

(3) The full year was not available for audit purposes as explained above.

(4) Experience has shown that the number of audit clerks allowed, *viz.*, six, is not sufficient. Two out of the six are occupied with the monthly and quarterly audit of other Departments, and the remaining four have found it impossible to go through the large balances, the large number of books and accounts in the Ward and Head Offices of the Department, and the enormous number of transactions recorded in those books and accounts.

It may be stated, however, that what was done was thoroughly done, as numerous communications from time to time pointing out the errors and irregularities noticed which passed through you can show.

2.—Markets and Slaughter Houses.

12. The Registers and Accounts kept were duly checked with the counterfoils of receipts issued to stall-holders, &c., and with the other vouchers available. The following tables show the work done in detail :—

Market Revenue.

	Markets.	Number of Receipts or Vouchers examined.	Amount.		
			Rs.	a.	p.
1	Arthur Crawford Markets	3,420	80,186	10	5
2	Erskine Road Market	3,580	39,392	4	10
3	Bhuleshwar Market	500	7,704	1	1
4	Pedder Market	156	1,122	13	0
5	Fort Market	1,060	7,375	13	9
6	Pork Market	2	80	0	0
	Total...	8,718	1,35,861	11	1

Miscellaneous Revenue.

	Items.	Number of Receipts or Vouchers.	Amount.		
			Rs.	a.	p.
1	Slaughter Fees	365	96,196	9	0
2	Butchers' License Fees	2,754	11,393	0	0
3	Weights and Measures	3,444	5,945	8	0
4	Contributions from Private Markets	216	2,976	0	0
5	Miscellaneous	6	2,990	9	6
	Total...	6,785	1,19,501	10	6

The total number of vouchers was thus 15,503 for Rs. 2,55,363-5-7. The total revenue collected appears duly credited in the Chief Accountant's books.

3.—Health Department.

13. The Revenue books kept in the Health Office were duly checked each month with the receipts, vouchers, and other papers supporting the entries therein, the object of the audit being to ascer-

tain that the amounts collected as shown by the books were at the rates fixed under due authority and that they were all paid into the Municipal Treasury. The following table exhibits in detail the number of receipts or vouchers examined under each head of revenue and the amount of such revenue :—

	Head of Revenue.	Number of Receipts or Vouchers.	Amount.		
			Rs.	a.	p.
1	Digging Graves	4,269	2,658	8	0
2	Removal of Carcasses of dead animals... ...	6,389	4,948	4	0
3	Supplying Copies of Office Records, giving evidence, &c.	147	213	8	0
4	Rent of Mahalakshmi Dhobiwada	4,517	13,894	0	0
5	Rent of Reclamation Grounds and the right of taking Drain-water for Manuring purposes...	571	37,198	0	0
6	Rearing and Catching Fish, &c....		665	0	0
7	Grazing Cattle and Cutting Grass, &c.... ...		1,493	10	7
8	Sale of Bones, Manure, Waste Paper, &c. ...		1,035	8	0
9	Cleaning Drains		2,452	0	6
10	Sale of Tender Forms		24	0	0
11	Rent of Mody Bay Milch Cattle Stable ...		3,282	8	0
12	Rent of Kamatipura Milch Cattle Stable ...	511	8,532	0	0
13	Rent of Agripada Milch Cattle Stable... ...	378	3,517	4	0
	Total ...	16,782	80,014	3	1

4.—Engineer's Department.

14. The Revenue books kept in the General, Drainage, Streets and Buildings, and Water Works branches of the Engineer's Department were duly checked each month with the permits, receipts, vouchers and other papers supporting the several entries therein, the object of the audit being to see that the charges were correctly calculated at rates duly sanctioned and that the collections as shown by the books

were all paid into the Municipal Treasury. The following table shows the work done in detail:—

	Items.	Number of Vouchers examined.	Amount.		
			Rs.	a.	p.
1	Projections—Verandahs, Balconies, Rewas, Weather Frames, &c.	55	5,856	14	0
2	The erection of Scaffolding, &c., on public land.	270	2,733	8	10
3	Opening Roads	3,427	4,568	0	11
4	Temporary occupation of Public Streets on Marriage and other occasions...	479	3,407	6	6
5	Licenses issued to Plumbers	81	810	0	0
6	Licenses issued to Surveyors	22	1,650	0	0
7	Supplying Copies of Office Records and giving evidence...		248	12	0
8	Sale of fruit, right of drawing Toddy, Water, &c.		1,477	7	0
9	Sale of right of Catching Fish	2,385	3,192	8	0
10	Hire of Steam-rollers, Carts, &c.		1,146	0	0
11	Ground Rent		856	10	8
12	Sale of Building Forms under Section 337 ...		369	0	0
13	Sale of Repair Forms under Section 342 ...		285	0	0
14	Sale of Applications for Water Connections ...		597	0	0
15	Sale of right of Cutting Grass		1,569	4	0
16	Sale of Tender Forms	3,571	189	0	0
17	Sale of Pipes, Meters, Fittings, &c.		1,947	7	3
18	Meter Hire...		1,198	10	8
	Total ...	10,290	32,102	9	10

15. A comparison of the Engineer's accounts with the Audit note-book in this Office, which records your sanction in each case as it passes through this Office, showed that in 23 cases the fees, the levy of which had been sanctioned by you in the course of the year under report, were not collected and paid into the Municipal Treasury, even by the close of it, and these 23 cases were duly brought to the notice of the Executive Engineer in this Office No. 901, dated 4th June 1891, which was forwarded to him through you.

5.—Licensing Department.

16. Statement I, appended to this report, shows the number of Licenses for 1890-91, the issue of which was sanctioned by you under Section 394 of the Act for the several purposes mentioned in Schedule M with the amount of fees leviable therefor. Each of the 3,516 cases for Rs. 38,325 therein referred to passed through this Office and was duly scrutinized by it, particularly with reference to the amount of fee leviable, as also in respect of the Stamp Duty payable in the case of explosives. The Registers of the Superintendent were also checked each month with the Audit note-book kept in this Office, in accordance with your No. 3176 of 20th May 1890 and with the counterfoils of the receipts given by the Chief Accountant's Cashier for the purpose of

seeing that the full amount of fee leviable in each case was collected and paid into the Municipal Treasury. Statement II., hereto appended, shows that at the close of the year under report 281 Licenses, the issue of which was sanctioned by you within the year, remained to be issued and the fee outstanding on account of them was Rs. 2,560. The Superintendent's attention was drawn to these cases in this Office No. 1110, dated 22nd June 1891, which was forwarded to him through you.

17. As the monthly or quarterly (as the case might be) audit of the several Departments was made, the errors, irregularities, erroneous exemptions, omission to make charges or to issue bills, short recoveries, excess collections, &c., which were discovered in the course of it were brought to the notice of the Heads of Departments concerned by means of official communications addressed to them through you.

II.—REFUND AUDIT.

1. Assessment Department.

18. The subjoined table shows the number and amount of claims to Refund for Vacancy under Sections 174 to 179 of the Act and on account of over-collections which were scrutinized and sanctioned by this Office in the year under report :—

Ward.	Number of Claims.	Amount of Refund sanctioned in 1890-91.
		Rs. a. p.
A. Fort and Colaba	276	9,915 7 10
B. Mandvi	147	2,744 12 8
C. Bhuleshwar	261	2,425 5 8
D. Girgaum	251	4,316 8 10
E. Byculla	430	3,822 10 6
F. Parel	121	1,192 15 7
G. Mahim	95	850 14 6
Total... ...	1,581	25,268 11 7

The sum of Rs. 25,268-11-7, shown in the above table, was sanctioned under the following heads of Revenue :—

1. General Tax	Rs.	12,163	7	11
2. Water Tax.....	„	6,522	15	8
3. Halalkhore Tax	„	5,962	10	9
4. Wheel Tax.....	„	577	4	0
5. Process Fees	„	24	4	0
6. Meter Hire	„	10	7	3
7. Toll Fees	„	7	10	0
Total...	Rs.	25,268	11	7

2.—Town Duty Refunds.

19. Statements III. and IV. (A and B), submitted herewith as usual, show that the gross collections for the year under report amounted to Rs. 17,67,747-13-4 against Rs. 12,61,316-12-11 in the previous year, showing an increase over that year of Rs. 5,06,431-0-5 which is partly due to larger imports of all articles except Wines and Spirits and Firewood which have fallen off, and partly to the rates on Sugar and Ghee having been raised, from 6 to 8 annas per cwt. on the former, and from 6 to 8 annas per Bombay Maund on the latter article.

20. As regards refunds, there had to be granted this year, for the first time, in addition to the usual refunds on exports, refunds, under Section 194 (2) of the Municipal Act, on articles supplied in the city by contractors to Government. The total refunds, including those of the above nature, amounted to Rs. 8,11,653-0-0 as against Rs. 5,74,881-6-0 in the previous year, or Rs. 2,36,771-10-0 more. This is due to increased exports of all articles except ghee, which shows a falling off, and to the enhancement of the rates on Sugar and Ghee above referred to. The falling off in Petroleum is due to the fact that while in the previous year refunds had to be granted on exports of the oil which had been imported and had paid duty in 1888-89, no refunds were granted in the year under report on exports of the oil during the year, but only two disputed claims of the previous year were allowed in the year under report as sanctioned under your No. 8475 of the 24th July 1890.

21. The net revenue from all articles during the year was Rs. 9,56,094-13-4 against Rs. 6,86,435-6-11 in the previous year, being better than that year by Rs. 2,69,659-6-5. This is due to larger balances left for local consumption and stock of almost all the articles and to the enhanced rates for Sugar and Ghee. The following is a detailed account of the variations under each article :—

Grain and Flour.—As the imports of flour are insignificant compared to its exports, and as all the flour exported is that produced from grain imported into the city, it is convenient to treat of these two commodities together. The aggregate net revenue from these articles amounted to Rs. 1,02,448-8-5 as on candies 8,19,588 of grain against Rs. 94,714-12-9 on candies 7,57,718 of grain in the previous year. There was an increase of candies 1,10,520 in the imports of both articles together and of candies 49,126 in the exports.

Sugar.—This has yielded Rs. 3,32,536-5-3 as on cwts. 6,28,983 against Rs. 1,65,656-9-0 on cwts. 4,41,750 in 1889-90. This increase is due both to the enhancement of the rate of duty already referred to and to larger consumption, the imports having exceeded those of the previous

year by cwts. 5,70,435 and the exports by cwts. 3,83,202, producing a net increase of cwts. 1,87,233 in the balance left for local consumption and stock.

Wines and Spirits yielded Rs. 1,73,797-14-3 against Rs. 1,84,202-15-7 or Rs. 10,405-1-4 *less* than in the previous year. There was a decrease of gallons 40,284 in the imports and an increase of gallons 1,336 in the exports.

Beer.—The net yield from this commodity was Rs. 9,543-6-11 against Rs. 9,085-13-10 in the previous year. The increases were gallons 1,22,278 in imports and gallons 1,07,636 in exports.

Ghee yielded a net revenue of Rs. 1,72,955-2-9 on maunds 3,45,357 against Rs. 1,24,435-9-0 on maunds 3,31,828 in the previous year. The imports show an increase of maunds 7,097, while the exports have fallen off by maunds 6,432, the net result of these variations being an excess of maunds 13,529 in the balance, which, with the increased rate of duty already referred to, accounts for the increase in the net revenue.

Timber realized Rs. 93,965-3-6 against Rs. 92,652-6-0 in the previous year, or Rs. 1,312-13-6 more.

Firewood.—The revenue from this article fell off to the extent of Rs. 3,500-14-6, the amount realized being Rs. 70,929-0-3 against Rs. 74,429-14-9 in the previous year. This is wholly due to diminished imports, no refunds being allowable on exports of this article.

Petroleum.—The duty on this article was abolished from 1st April 1889 since when no revenue has been derived from it, but refunds to the amount of Rs. 58,742-10-0 had to be granted in 1889-90 on exports of the oil which had been imported in the preceding year, and as such refunds were not allowed in the year under report, the whole of the amount so refunded in 1889-90 represents a decrease in refunds in the year under report, with the exception of two old disputed claims, amounting to Rs. 80-12-0, settled in the latter year as stated in para. 2 above. The net decrease in refunds is thus Rs. 58,661-14-0, which, however, is no real gain as there was no revenue under this head.

22. Out of a total sum of Rs. 8,54,906-12-0 claimed as refunds during the year, Rs. 43,253-12-0 were retrenched. Of this sum Rs. 4,738-15-0 form the amount of rejections on account of claims being legally inadmissible, while the rest, Rs. 38,514-13-0, represents the excess of the amounts claimed over those actually due.

23. The number of claims disposed of during the year was 27,801 against 22,064 in the previous year. The increase which is spread over the whole year has been quite marked since January last, as will appear from the following table :—

Month.	Number of claims.		Increase in 1890-91.
	1889-90.	1890-91.	
April	2,388	2,487	99
May	2,413	2,621	208
June	1,827	2,118	291
July	1,323	1,417	94
August	1,282	1,641	359
September	1,269	1,815	546
October	1,519	2,482	963
November	2,344	2,458	114
December	1,754	2,527	773
January	2,294	3,330	1,036
February	1,829	2,572	743
March	1,822	2,333	511
Total ...	22,064	27,801	5,737

And the numbers still continue to increase considerably. This is due mainly to the very marked development that has recently taken place in the sugar trade since the introduction of Europe Sugar into India. Such development is apparently not confined to the through trade affecting merely the imports and exports, but the local consumption also seems to have increased in a marked degree, producing a corresponding improvement in the net revenue as shown in para. 21 above.

24. In addition to the above increase of work, the following items of work that used to be done in the Chief Accountant's Office were, for the first time, thrown upon this Department from the beginning of the year under report, *viz.*, (1) the checking of exporters' signatures to all Refund Receipts, before their presentation to the Chief Accountant for payment, with the specimens of such signatures taken in a book kept under Rule H at page 40 of the by-laws; (2) the recording of signatures of exporters in the said book; (3) the checking of the amounts of town duty collected by the Port Trust and the two Railways on each article, with the quantities imported, as detailed in monthly Cash Accounts furnished by these bodies to the Chief Accountant, who finally sends them on to this Office.

Conclusion.

25. In addition to the above work the Office had to deal with the revenue-earning or revenue-affecting correspondence of all Departments which passes through this Office, and the importance of which can scarcely be judged by the number of Inward and Outward references on the registers, which was respectively 4,596 and 4,829 in the year under report.

is by Mr. Nicholls, Chief Officer of the Fire Brigade, forwarded with his letter No. 79, dated 20th April 1891.

The report on **J.**—Gardens

is by Mr. G. Carstensen, Graduate, Royal Danish College of Agriculture, Copenhagen, forwarded with his letter No. 280, dated 27th April 1891.

The report on **K.**—The Victoria and Albert Museum

is by the Secretary and Curator, Dr. D. MacDonald, M.D., B.Sc., C.M., forwarded with his letter No. 108, dated 2nd May 1891.

A.—SEWERAGE WORKS.

1.—FIRST PORTION OF THE SEWERAGE SCHEME.

(*a*).—*Pumping Station, Love Grove, Warli.*

Three out of the four engines (Nos. 2, 3 and 4) were overhauled and put into proper working order before the commencement of the year under report, and engine No. 1 was completed in the early part of the year. During the S.-W. Monsoon months the four engines were in working order and were frequently all required.

The 18″ centrifugal pump proved of good service at times in keeping down the sewage when the engines had to be stopped for making steam pipe joints or for other trivial repairs.

The 10″ centrifugal pump and the portable engine for the working of it were delivered over by Messrs. Richardson & Cruddas. The engine was located in the engine-house erected for the purpose.

Daily reports showing the number of engines at work, the height of sewage every three hours, the approximate consumption of coal, and other particulars were regularly submitted, besides indicator diagrams taken every week to ascertain what amount of power was developed by each engine.

A Surveyor attended weekly at the station to take observations to determine the actual effective work done by the engines and pumps based upon the volume of sewage discharged.

Monthly reports were submitted showing the aggregate work of the engines and pumps at the station, the period during which the gasket packing lasted and other particulars.

The indicator diagrams were carefully studied and the slide and expansion valves reset from time to time in order to give the best working results.

A Committee was appointed by the Corporation to enquire into, and report upon, the efficiency of the machinery but had not completed its deliberations at the close of the year.

In December the pumps of engines Nos. 3 and 4 were damaged by an accumulation of sand in the delivery valve boxes of the pumps, and the repairs were entrusted to Messrs. Richardson & Cruddas.

The dynamo for the electric light, which was purchased for the use of the station, was put into thorough working order and started during the year. It worked fairly well but another superior type of dynamo with the latest improvements has been sanctioned, and on that being substituted, superior results are anticipated.

(*b*).—*House Connections.*

The main principles of house connections having been approved by Mr. Baldwin Latham, the Commissioner, in his No. 135,dated 2nd April 1890, gave orders to again invite tenders returnable in three months' time, with a view to the work being recommenced at the end of the S.-W. Monsoon.

Tenders receivable on 18th August were accordingly invited but none were submitted.

2.—QUEEN'S ROAD AND GIRGAM DRAINAGE SECTION.

(*a*).—*Marine Lines Pipe Sewer and Ventilation thereof.*

The report of the Government Committee and the letters of the Sanitary Commissioner were commented upon in the Executive Engineer's letter to the Municipal Commissioner, No. D. 4993, dated 19th July 1890, and all the papers having been printed and circulated, the matter does not appear to require further reference here.

(*b*).—*Ventilating Shafts in the District generally.*

A metal vent shaft, making eight in all, was erected by Messrs. Fakirji Pestonji & Co. The erection of the four masonry shafts has been entrusted to the same Contractors, but the work has not been commenced, the Contractors having taken exception to some of the estimated rates which they consider too low.

(*c*).—*Pipe Sewers and house connections.*

Contractors—MESSRS. BULKLEY & Co.

The work, though fast drawing to a completion, was not finished at the end of the financial year.

The Contract period of completion expired on 31st January 1891, but the delay was not altogether without some excuse the fault of the Contractors.

The work was not of an ordinary character and there were unavoidable delays in cases in which sec. 230 of the Municipal Act had to be brought into operation. In many instances, too, the houseowners delayed the work at their own houses, owing to their misunderstanding the optional notices, one of which was served in each case.

The cost of work, measured up and paid for to the end of the financial year, was Rs. 4,76,951.

3.—SEWERAGE OF KAMATIPURA.

House Sullage Water Connections.

The water connections to the remaining seven flushing tanks were taken in hand during the year and completed by the Water Works Department to which the work was entrusted.

4.—AGRIPADA DISTRICT.

(*a*).—*House Connections.*

Tenders receivable on 18th August were invited and two tenders were received, one from Messrs. Bulkley and Company and the other from Mr. Sitaram Lakshman.

The tender of Mr. Sitaram being lower than the other by Rs. 8,806 was accepted under the Standing Committee's Resolution No. 5397, dated 10th September 1890.

The contract was signed on 13th October and the work was commenced about the 20th idem. The contract period for the completion of the work is two years, which expires on 15th October 1892.

Fair progress has been made with the work, and there is no reason to anticipate but that the whole will be completed within the contract time.

The 9″ pipe sewer in Victoria Cross Lane was first taken in hand and was completed about the end of December.

A new 9″ pipe sewer in Arthur Road was found necessary during the progress of the work, as the house connections there between the Chinchpokli Railway Station and Parel Road were cut by the 48″ Tansa Main, and the carrying out of the further house connections under Mr. Sitaram Lakshman's contract were prevented by the position of that main. The cost of this auxiliary pipe sewer (estimated at Rs. 4,689) was sanctioned as a debit against the Tansa Water Works Grant, and the laying of it was entrusted to Mr. Sitaram Lakshman, as an addition to his contract.

The total number of houses connected in the Agripada District during the year was 113.

(*b*).—*Bridge over Agripada open drain.*

The cost of this bridge, the completion of which was reported in the last Annual Report, has been Rs. 2,515-0-4 against the grant of Rs. 2,245. The small excess was due chiefly to the soft ground under the foundation which necessitated more excavation and more masonry than had been originally provided for.

5.—SEWERAGE OF THE FORT (PIPE SEWERS).

Contractors—MESSRS. FAKIR MUHAMAD BABUNBHAI & Co.

The work was continued departmentally and virtually completed.

The value of the work executed during the year amounted to Rs. 3,418-14-6.

(6).—PIPE SEWER AND BRANCH PIPE DRAINS IN BELLASIS ROAD, FORAS ROAD AND GILDER STREET.

Contractors—Messrs. Fakir Muhamad Babunbhai & Co.

The final bill, amounting to Rs. 14,109 for this work which was reported as completed in the last Annual Report, was passed during the year.

7.—STORM-WATER DRAIN FROM PAREL ROAD (AT JUNCTION OF BELLASIS ROAD) TO SHEPHERD ROAD AND A STORM-WATER DRAIN ALONG A PORTION OF RIPON ROAD, TOGETHER WITH WATER ENTRANCES AND MANHOLES TO BOTH DRAINS.

Contractors—Messrs. Bhumaji Shivaji & Co.

The cost of this work, as per final bill, was Rs. 32,110.

8.—NIGHT-SOIL DEPÔTS ON DeLISLE ROAD.

The original proposal to construct a depôt at the south end of the road having been finally abandoned, as stated in the previous Annual Report, it was proposed to utilize the grant for the intended similar depôt at the north end of the road.

Neithôr of the tenders received in response to the first invitation was accepted, and on a second invitation no tenders were received.

An objection was taken also to this northern site by the David Mills Company and the Commissioner directed, in his No. 9502, dated 6th August 1890, that no further steps should be taken in the matter.

An entirely new site has since been approved of by the Commissioner. It is intended to reclaim a piece of land sufficient for the depôt from the water-hole or tank at the north end end on the west side of DeLisle Road at its junction with Parbhadevi Road. Detailed estimates are being prepared, and as soon as they are ready, the work will be proceeded with in the usual course.

9.—SEWERAGE OF FRERE ROAD.

Contractors—Messrs. Rahimtula Bhaijibhai & Co.

The Contractors satisfactorily completed the vent shafts, water entrances and manholes comprised in their contract within the contract period of five months.

The work was commenced on 18th December 1889 and completed on 5th May 1890.

As there was a saving in the sanctioned grant, fifteen extra water-entrances were constructed.

The cost of the work was Rs. 15,538.

10.—STORM-WATER DRAIN FROM THE NORTHERN PART OF CHARNI ROAD TO GRANT ROAD; STORM-WATER DRAIN IN THE NORTHERN PART OF HORNBY ROAD; STORM-WATER DRAIN ALONG A PORTION OF LOVE LANE; AND STORM-WATER CONNECTING DRAINS AT PAIDHONI TO RELIEVE THE ABDUL RAHIMAN STREET DRAIN, TOGETHER WITH WATER-ENTRANCES AND MANHOLES TO ALL THE DRAINS.

Contractors—MESSRS. RAHIMTULA BHAIJIBHAI & DATTAJI SAKHARAM.

Tenders receivable on 10th February were invited, and out of six tenders received that of the abovenamed Contractors was accepted under the Standing Committee's Resolution No. 7982, dated 28th March 1890.

The Contract was signed on 17th June 1890.

The work was carried on with energy and completed with despatch, notwithstanding the death of Mr. Rahimtula while the work was in progress. It was commenced on 29th September 1890 and finished on 28th January 1891.

The cost of the work was Rs. 14,924.

11.—DRAINAGE OF BOMBAY GENERALLY.

Mr. Baldwin Latham's report on the sanitation of Bombay, having been printed, was circulated in the month of July. The most important suggestion he makes is that the main sewer outfall should be at Colaba, though as an alternative he proposes improvements in the present outfall at Warli. In July a representation was made to Government on the subject of the location of an outfall at Colaba, and Government thereupon appointed a Committee to consider the question. The members of the Committee are as follows:—

Colonel Merewether, R. E., Chairman; Mr. T. D. Little, M. Inst. C. E., Chief Engineer, Northern Division; Deputy Surgeon-General Cates; Colonel Twemlow, R.E.; Mr. H. A. Acworth, C.S., Municipal Commissioner; Surgeon-Major MacRury, Sanitary Commissioner; Captain Sir Henry Morland; Mr. Thomas Blaney; Mr. G. E. Ormiston, M. Inst. C. E.

The Committee has not yet completed its investigations and made a report, and it is obvious that until the future position of the outfall is determined no serious or comprehensive effort can be made to extend and complete the sewerage system upon the lines suggested by Mr. Latham.

A staff of 15 surveyors was appointed to make surveys and estimates for the drainage of storm-water as proposed by Mr. Latham. Owing to the difficulty of obtaining suitable men the work was not commenced until 15th January, and then only with a smaller staff than had been intended.

12.—STORM-WATER RESERVOIR ON THE FLATS.

After the rains of 1890 were over, the water was completely run out and the reservoir allowed to dry. This was found to be preferable to the system previously obtaining, when portions of the banks were alternately wet and dry according to the rise and fall of water in the reservoir, as it was partially let out and re-admitted from time to time. Sluice gates working on horizontal pivots were constructed on the south side of Clerk Road Bridge, the object being by occasional flushes to keep the Channel clear from Clerk Road Bridge to the Love Grove Sluices.

13.—LATRINES AND URINALS.

The construction of the following latrines was completed during the year :—

(*a*) One 12-chamber latrine at Kharatalao.

(*b*) One 8-chamber latrine at Valpakhadi.

(*c*) One 4-chamber latrine and a 3-chamber urinal at Haines Road below Byculla Bridge.

The work of erecting latrines and urinals at the undermentioned places was stopped, as the proposed sites were considered objectionable.

(*a*) At the junction of Old Nagpada Street and Jakaria Masjid Street.

(*b*) At the Mumbadevi carriage stand.

The proposed 8-chamber latrine at the Arthur Crawford Markets, the construction of which was postponed for want of funds, has now been provided for in the Budget for 1891-92.

The erection of the following latrines and urinals was sanctioned during the year and the work was entrusted to the Petty Work Contractors, Messrs. Fakirji Pestanji & Co.

(*a*) One 20-chamber latrine at Sewri.

(*b*) One 10-chamber latrine at the Bandra Slaughter House.

(*c*) One 2-chamber latrine at Love Grove Pumping Station.

(*d*) One 2-chamber latrine in the Municipal Workshops Store-yard on Paltan Road.

(*e*) One 3-chamber latrine and a 4-chamber urinal in Marine Street, Fort.

(*f*) One 10-chamber latrine at Mahim Fort.

(*g*) One 12-chamber latrine on Walkeshwar Foreshore.

(*h*) One 12-chamber urinal on the east side of Arthur Crawford Markets.

(*i*) One 4-chamber urinal outside the north-east corner of the Jail.

(*j*) One 4-chamber urinal at the Junction of Bapu Khote Street and Kika Street.

(*k*) One 4-chamber urinal at the junction of Khoja Street and Grant Road.

(*l*) Three 2-chamber urinals on Masjid Bridge Road (south side) between Argyll Road and Frere Road.

14.—CARNAC BANDAR NIGHT-SOIL PUMPING STATION.

The station, as in previous years, has worked well during the year under report with its usual staff of one engine driver, one fireman, and two coolies, and the budgetted grant has not been exceeded.

The engine and machinery has been maintained in good working order by the engineman and there has been no difficulty whatever.

The accounts of the work of placing a foot-valve on the suction pipe, the completion of which was mentioned in the last Annual Report, were adjusted during the year and the total cost amounted to Rs. 2,806-9-10.

The supply of salt water to the tanks for flushing purposes is not as copious as could be desired, though the foot valve at the foot of Carnac Bridge has materially improved the supply. There are probably some leaks or perhaps a break in the suction pipe, which is the old night-soil discharge pipe, somewhere between the pumping station and the foot valve. The pipe is in some places from 10 to 12 feet under ground, it crosses the G. I. P. Railway lines and the B. B. & C. I. Railway yard, and is supposed to lie under a portion of the masonry of Carnac Bridge. It would be a difficult and uncertain task to open it up for the purpose of examination and it would probably be better to renew the whole length of piping laying it about 3 feet down below the surface.

15.—DRAINAGE SLUICES.

The sluices and penstocks at the following places, which are in charge of this Department, were satisfactorily worked during the year with the usual staff and within the Budget provision :—

(*a*) Dharavi.
(*b*) Warli.
(*c*) Love Grove.
(*d*) Flats.
(*e*) Bellasis Bridge.
(*f*) Queen's Road.
(*g*) Carnac Road.
(*h*) Mint Road.

The renewal of the sluice flaps at Love Grove was commenced but was not completed at the end of the financial year.

16.—MISCELLANEOUS DRAINAGE.

The works under this head consisting of repairs, alterations, construction, cleaning and flushing of sewers and drains generally and the erection of latrines and urinals were carried out satisfactorily under the able supervision of the late Mr. Baker, Chief Inspector of Drains.

The work of superintending the drainage of new buildings, which in former years was performed by the Drainage Inspectors, was transferred to the Building Inspectors from 20th July 1890, in accordance with Mr. Ollivant's Minute, dated 20th March 1890, drawn by him when he inspected the drainage of the Khetwadi District. It was very properly observed that it was a waste of time to have one Inspector supervising the building of a house and another Inspector the drainage of the same house. In this Minute, Mr. Ollivant defined the duties of the Drainage Inspectors in respect of new houses as being to watch the maintenance in an efficient condition of the drainage of every new house after having been first passed by the Building Department. It should be added that the Inspectors of Drains have a similar duty to perform with regard to every house which has once been efficiently drained by the Municipality and passed by an Inspector of Works.

There were before only two Inspectors of Drains to attend to this work and it was not done so satisfactorily as could be wished. They had between them to traverse the whole island and the district allotted to each was much too large for any one man to cope with. An additional Inspector, having been allowed, the range of the divisions has been much diminished, so that the work can be and has been performed far more satisfactorily. The new divisions were made from 20th September 1890.

It is with regret that mention must be made of the premature death of the Chief Inspector of Drains, Mr. A. Baker, which occurred on 25th March 1891. He entered the Municipal service on 7th April 1879 and performed his duties in the most exemplary manner throughout the whole period of his service. The Municipality has lost in him one of its most careful and zealous officers and it will be very difficult to fully replace him.

The following statement shows that 999 notices were served on house-owners for not complying with the requirements of various sections of the Municipal Act :—

Section of the Municipal Act.	Total number issued.	Complied with.	Not complied with.	Remarks.
231	413	139	274	
232	129	51	78	
234	11	1	10	
248	1	.....	1	
257	438	225	213	
258	6	2	4	
280	1	.....	1	
	999	418	581	

When the notices were not complied with by the house-owners proceedings were taken against them in the Magistrates' Courts. In the following statement the number of summonses taken out and the result are given :—

Sections of the Municipal Act.	Total number issued.	Number withdrawn.	Number complied with.	Amount of fines inflicted.			Remarks.
				Rs.	a.	p.	
229	3	.....	2	15	0	0	
231	198	58	109	222	0	0	
232	60	10	38	69	0	0	
234	64	8	57	150	0	0	
257	161	17	128	164	0	0	
258	6	.....	5	.....	...	...	
	492	93	339	620	0	0	

In addition to the above notices optional notices, numbering 846 and 319, were issued in connection with the Queen's Road and Girgam House-drainage Connection Works and the Agripada House-drainage Connection Works respectively. These notices gave the house-owners an opportunity of doing the work themselves before it was undertaken by the Municipality at the cost of the Municipal Fund, and were required in order to put the Municipality into a proper legal position.

17. The following statement shows the work done by the Manhole and Sewer Inspection Establishment during the year :—

Date.	Number of manholes inspected on pipe sewers.	Number of lampholes inspected on pipe sewers.	Manholes inspected on the ovoid sewers.
1890.			
March	119	44	.....
April	88	56	53

November	184	45	.....
December	184	54	.....
1891.			
January	114	33	.....
February	40	19	.....
Total.....	2,285	564	53

18. The following statement gives details of all miscellaneous works carried out departmentally under the supervision of the Chief Inspector of Drains :—

Consecutive No.	Locality.	Nature of Works.
	For Health Department.	
1	Sonapur Night-soil Depôt ...	...Ladi stone pavement repaired.
2	Pirkhan Lane	...Pipe drain opened.
3	Kamatipura	...Pipe drain of Milch Cattle stable cleaned.
4	DeLisle Road	...Pipe drain opened.
5	Argyll Road and Surat Street	...Pipe drain of urinal cleaned.
6	Agripada	...Pipe drain of Milch Cattle stable cleaned.
7	Agiari Street	...Pipe drain of urinal cleaned.
8	Arthur Crawford Market ...	...Pipe drain cleaned.

Consecutive No.	Locality.	Nature of Works.
	For Health Department—contd.	
9	Agripada	Stone pavement of latrines repaired.
10	Bori Bunder	Pipe drain of Bigaris' Chal cleaned.
11	Modi Bay	Pipe drain of latrines cleaned.
12	Agripada	Well at the Milch Cattle stable plastered.
13	D Ward Stable...	Pipe drain behind the stable opened.
14	Pinjrapol Street	Urinal cleaned.
15	Chimna Butcher Street	Pipe drain of latrine cleaned.
16	Kamatipura	Pipe drain of Milch Cattle stable cleaned.
17	Gilder Street	Ladi stones fixed.
18	Naran Dhuru Street	Pipe drain of urinal cleaned.
19	Bori Bunder	Pipe drain of Bigaris' Chal cleaned.
20	Mastan Tank Road	Urinal repaired.
21	Kamatipura	Pipe drain of Milch Cattle stable cleaned.
22	Kika Street	Pipe drain of urinal cleaned.
23	Masjid Lane	Do. do.
24	Agripada	Pipe drain of Milch Cattle stable cleaned
25	Kamatipura	Do. do.
26	Kika Street	Pipe drain of urinal cleaned.
27	Kamatipura	Pipe drain of latrines cleaned.
28	Modi Bay	Do. do.
29	Shaik Budan Kamodin Street ...	Urinal repaired.
30	Surat Street	Urinal cleaned and repaired.
31	Arthur Crawford Market	Latrine cleaned.
32	Carnac Road	Slab-covered drain opened.
33	Kamatipura	Pipe drain of Milch Cattle stable cleaned.
34	Arthur Cawford Market	Doors of latrine repaired.
35	Northbrook Street	Urinal repaired.
36	Memanwada	Pipe drain of latrine cleaned.
37	Agripada	Pipe drain of Milch Cattle stable cleaned
38	Mutton Street	Urinal cleaned.
39	Nakhoda Street	Urinal repaired.
40	Tantanpura Street	Do. do.
41	Bhangi Mohla	Pipe drain of latrine cleaned.
42	Bori Bunder	Pipe drain of Bigaris' Chal cleaned.
43	Naran Dhuru Street	Pipe drain of urinal cleaned.
44	Dongri Street and Carnac Bridge ...	Flushing tank of urinal repaired.
45	Erskine Road Market...	Foot-path opened.
46	Parel Road	Foot-path opened and repaired.
47	Kamatipura	Pipe drain of Night-soil Depôt cleaned.
48	Bori Bunder	Pipe drain of Bigaris' Chal cleaned.
49	Chinch Bandar Road and Bardan Street.	Urinal repaired.
50	Nakhoda Street	Do.
51	Naran Dhuru Street	Do.
52	Grant Road	Arched drain opened.
53	Kamatipura	Pipe drain of Milch Cattle stable cleaned.
54	Mastan Tank Road	Urinal cleaned.
55	Mint Road	Stone slabs over side-drain replaced.
56	Chandanwadi	Urinal cleaned.
57	Pirkhan Lane	Drain opened and repaired.
58	Bora Street	Urinal pan repaired.
59	Bardan Street	Pipe drain of urinal cleaned.
60	Mutton Street	Do. do.
61	Chimna Butcher Street	Do. do.

Consecutive No.	Locality.	Nature of Works.
	For Health Department—contd.	
62	Dick's Tank	Cesspool of latrine repaired.
63	Clare Road	Openings made in foot-path.
64	Memanwada	Pipe drain of latrine cleaned.
65	Argyll Road and Surat Street ...	Urinal cleaned.
66	Chimna Butcher Street	Do. do.
67	Bora Masjid Street	Do. do.
68	Erskine Road	Foot-path opened.
69	Agripada	Female latrine repaired.
70	Mumbadevi Street	Urinal repaired.
71	Grant Road	Foot-path opened.
72	Chandanwadi	Urinal cleaned.
73	Kamatipura	Pipe drain of Night-soil Depôt cleaned.
74	Do.	Pipe drain of Milch Cattle stable cleaned.
75	Memanwada	Pipe drain of latrine cleaned.
76	Kamatipura	Manholes constructed in the Night-soil Depôt.
	For Road Department.	
77	Junction of Grant Road and Falkland Road	Manhole lowered.
78	Haines Road	Manholes raised.
79	Junction of Bapu Khote Street and Khoja Street.	Water entrance shifted.
80	DeLisle Road	Manholes raised.
81	Alli Umar Street	Debris of fallen house removed.
82	Kaji Syed Street	Manhole and lamphole raised.
83	Carnac Bunder Road	Manhole raised.
84	French Bridge	Cesspool removed.
85	Dongri Street	Manhole raised.
86	Sarang Street	Do.
87	Gilder Street	Do.
88	Kaji Syed Street	Do.
89	Samuel and Thana Streets	Do.
90	DeLisle Road	Do.
91	Khetwadi 11th Lane	Do.
92	Khetwadi 3rd Lane	Pipe drain lowered.
93	Chakla Street	Manhole raised.
94	DeLisle Road	Manhole and lamphole raised.
95	Clerk Road	Manhole raised.
96	Karwar Street	Do.
97	Dongri Street	Lamphole raised.
98	Falkland Road...	Manhole raised.
99	Bhuleshwar Road	Do.
100	Apollo Street	Water-gully in front of No. 16 lowered.
101	Do.	Manholes raised and lowered.
102	Kandawadi Street	Trees cut down from the set-back ground taken from Mr. Kanji Khetsi.
103	Janjikar Street	Manhole raised.
104	Tardeo Road	Do.
105	Clare Road	Do.
106	Mazgaon	Do.
107	Jambli Street	Do.
108	Haines Road	Drain connection to Victoria-garistand.

Consecutive No.	Locality.	Nature of Works.
	For Road Department—contd.	
109	Hornby Road	Drain connection to Victoria gari-rank made.
110	Kaji Syed Street and Bhandari Street	Manholes raised.
111	Samuel Street and Abdul Rahiman Street	Do.
112	Bibijan Street	Do.
113	Mazgaon Road...	Do.
114	Falkland Road...	Manhole lowered.
115	Jambli Street	Debris from fallen house removed.
116	Junction of Kamatipura Bazar Road and 4th Street.	Water-gully removed and refixed.
117	Dongri Street and DeSouza Street ...	Manholes raised.
118	3rd Parsiwada	Manhole and lamphole lowered.
119	Chinch Bandar Road	Manhole raised.
120	Custom House Road and Forbes Road.	Manhole lowered.
121	Garibdas Street	Manhole raised.
122	Clerk Road	Do.
123	Erskine Road	Arched drain repaired.
124	Hamam Street	Manhole raised.
125	Ganbava Street	Masonry bunds around gully-trap removed.
126	Samuel Street	Manhole raised.
127	Gavalia Tank Road and Khambala Lane	Manhole lowered.
128	Custom House Road	House drain lowered.
129	Govalia Tank Road	Cocoanut tree in D Ward Office cut.
130	Bazar Gate	Pipe drain in Bazar Gate Garden lowered.
	For Markets and Slaughter Houses.	
131	Erskine Road Market...	Pipe drain cleaned.
132	Pedder Market...	Do.
133	Arthur Crawford Market	Do.
134	Fort Market	Do.
135	Bandra Slaughter House	Do.
136	Fort Market	Cast-iron grating replaced.
	For Water Works Department.	
137	Chinchpokli	Latrines of chals repaired.
138	Haines Road	Drainage arrangements made for the stand pipe.
139	Paltan Road	Drainage arrangements made for the stand pipe.
140	DeLisle Road	Pipe drain cleaned.
141	Lohar Street	Drainage connection to the old dipping well made.
	For Fire Brigade Department.	
142	Govalia Tank Road	Nahani connection made to the station.

Consecutive No.	Locality.	Nature of Works.
	Private Works.	
143	Military Square Lane...	Pipe drain of house No. 24 cleaned.
144	Rampart Row	House drain cleaned.
145	Modi Khana	Broken gully-trap replaced with a new one at premises No. 118.
146	Tardeo Road	Drainage connection to premises No. 7 made.
147	Esplanade Road	Drain of premises owned by Dr. DeCunha cleaned.
148	Naoroji Hill	Pipe drain of premises owned by Mr. Jalbhai Ardeshar Sett cleaned.
149	Medows Street	Pipe drain of premises owned by Bai Motlibai cleaned.
150	Kavasji Patel Street	House drain of premises No. 46 cleaned.
151	Bhuleshwar Road	Drainage arrangements made at the premises owned by Mr. Tulsidas Bhagwandas.
152	Church Gate Street	House drain of premises No. 7 cleaned.
153	Argyll Road	Pipe drain of premises owned by Mr. Justice Telang cleaned and repaired.
154	Grant Road	Chamber for the Railway Company's latrine constructed.
155	New Bengalpura	Drainage arrangements of premises Nos. 9 and 10 owned by Bai Awabai made.
156	Sleater Road	Drainage arrangements of premises owned by Mr. Jamsetji Sorabji made.
157	Frere Road	House drain of premises owned by Messrs. Sir Charles Forbes & Co. cleaned.
158	Bhuleshwar Road	Two gully-traps of premises No. 171 cleaned.
159	Bell Lane	House drain of premises No. 1 cleaned.
160	Malharraowadi...	Pipe drain of premises owned by Mr Chhaganlal Murlidhar cleaned.
161	Cavel Street	Pipe drain of premises No. 6 cleaned.
162	Esplanade Road	Masonry drain of premises No. 19 cleaned.
163	British Hotel Lane	Pipe drain of stable cleaned.
164	Bhoiwada 3rd Lane	Pipe drain of premises No. 99 cleaned.
165	Karsetji Suklaji Street	Side plates of urinals broken by a Victoria replaced.
166	Tardeo Road	Drainage connection of premises No. 21 made.
167	DeLisle Road	Drain of Mill premises of Anglo-Indian Spinning Company cleaned.
168	Cavel	House drain of premises No. 88 cleaned.
169	Agiari Street	Pipe drain of premises No. 38 cleaned.
170	Vithalwadi	Drainage connection of premises No. 46 made.
171	Mahalakshmi	Drain connection of the Railway Company's latrine made.
172	Clare Road	Manhole constructed for Messrs. Phillips & Co.
173	Naoroji Hill	Drainage connection of premises Nos. 90 and 91 made.
174	Khetwadi 4th Lane	House connection to premises Nos. 6 to 8 made.
175	Custom House Road	Drainage connection of latrine in Government Dockyard made.

Consecutive No.	Locality.	Nature of Works.
	Miscellaneous.	
176	Kochin and Kalikat Streets	Drainage connections of Municipal Buffalo stables and latrines made with the Municipal sewer.
177	Grant Road	Removing and replacing 18" stoneware pipe drain at the foot of Frere Bridge.
178	Falkland Road	New drainage connections for the Dharamsala made with the main sewer, and a manhole constructed.
179	Ripon Road	Masonry gully and catch-pit constructed.
180	Karsetji Suklaji Street	Drainage connections at the premises of the Edinburgh Hotel made.
181	Kamatipura	Flushing tanks in the District covered over with wrought-iron plates.
182	Victoria Gardens	Jaoli roofs put over the Tiger and Panther cages.
183	Medows Street	Cast-iron gullies put down in place of the 5-hole stones.
184	Love Grove	Shed erected over the portable engine at the Pumping Station.
185	Parel Road	New drain constructed along Parel Road from the Byculla Railway Station to the old Nesbit Road Corner.
186	Charni Road	Slab-stones over the side-drain between Queen's Road and Girgam Road shifted and close-jointed.
187	Junction of Chunam Kiln Road and Grant Road.	Two water gullies with a covered drain constructed.
188	Church Gate Street	Ventilating shafts erected at the premises of Mr. J. P. Watson and H. H. Aga Alisha.
189	Agripada	Brick-arching of the double-barrel drain removed and reconstructed.
190	Dadar	A 6" pipe drain laid and a cesspool constructed at the Ward Chauki.
191	Carnac Bridge	The western and northern sides of the small salt water reservoir plastered.
192	Parel Road	Drain connection with water-gullies made near the J. J. Hospital.
193	Nanabhai Lane...	Sides of the old drain lowered.
194	Love Grove	Inward leakages from the sluice gates stopped.

19. The following works were executed by the Petty Work Contractors, Messrs. Fakirji Pestanji & Co., under the supervision of the Chief Inspector of Drains :—

1. Cross drains with cast-iron gullies at the entrance to the Yacht Club on Apollo Pier.
2. Side-drain to the west of Naoghar Tank.
3. A 12-chamber latrine at Kharatalao.
4. An 8-chamber latrine at Valpakhadi.
5. A 4-chamber latrine and a 3-chamber urinal at Haines Road below Byculla Bridge.

6. Privy accommodation for the staff at the Bori Bandar stables.
7. Metal ventilating shaft at Khetvadi Back Road.
8. Masonry side drain at Kalachauki Road.
9. Sheds with corrugated iron roofs to shelter cast-iron fittings at Bellasis Bridge Pipe Depôt.
10. Pipe-drain with water-gullies at the junction of Gilder Street and Foras Road.
11. Storm-water drain and water-gullies at the junction of Tardeo Road and Forjett Road.
12. Two storm-water masonry gullies with masonry connecting drains in Bapty Road.
13. Repairing and replacing urinal at the junction of Bhajipala Street and Nagdevi Street.
14. Three 2-chamber urinals on Masjid Bridge Road (south side) between Argyll Road and Frere Road.

20.—STORES DEPÔT AT BELLASIS BRIDGE.

(a)—Stoneware.

The stoneware pipes and specials required for the Queen's Road and Girgam Sewerage Works continued to be supplied by Messrs. Richardson and Cruddas under their contract, dated 10th January 1889.

The same firm supplied also similar articles for the Agripada House Drainage Connections under a new contract, dated 11th November 1890.

The goods supplied under both these contracts were manufactured by Messrs. Doulton & Co., and were received into store after standing the stipulated tests.

The total value of pipes and specials received during the year was Rs. 70,885-2-8 and of those issued from the new supplies and from former stock, Rs. 1,31,874-15-6.

(b)—Cast-iron and zinc fittings.

The iron and zinc fittings for the Queen's Road and Girgam Sewerage Works, continued to be supplied by Messrs. Walsh, Lovett & Co., under the two contracts dated 24th September 1888.

Tenders for similar supplies for house-connection work in the Agripada District having been invited, two tenders only were received, one from the above named firm and the other from Messrs. Richardson and Cruddas. The latter being lower than the former was accepted by the Standing Committee under Resolution No. 4503, dated 13th August 1890. The execution of the contract was delayed as some alterations in the class of materials to be used in the vent-shafts were necessitated, having regard to the opinion expressed by Mr. Baldwin Latham at page 58 of his report, that the use of zinc for vent-pipes from sewers

should not be encouraged. It was therefore considered desirable that the design should be altered and that the materials to be used in the vent-shafts should be cast-iron and galvanized sheet-iron instead of cast-iron and zinc as hitherto, and Messrs. Richardson and Cruddas were requested to modify their tendered rates accordingly. The variations were sanctioned by the Standing Committee under their resolution No. 11571, dated 11th February 1891.

Several other fittings and castings were obtained from Messrs. Richardson and Cruddas, they being the annual supply Contractors for iron castings. The total value of fittings received and issued during the year amounted respectively to Rs. 56,670-6-7 and Rs. 64,679-4-9.

(c)—Cement.

The quantity of cement available for current requirements being insufficient, a proposal made by Messrs. Warden and Company for an extention of their contract was submitted to the Commissioner, but not approving of it, he gave orders for tenders to be invited. Accordingly tenders receivable on 6th November for 2,000 casks of cement were advertised for and of seven received, that of Messrs. John Fleming and Company being the lowest, was accepted under Standing Committee's Resolution No. 8,055, dated 11th November 1890. The rate of this fresh tender was very favourable, being Rs. 7-15-0 per cask of 3½ cwts. against Rs. 9-4-0 paid under the previous contract.

The manufacturers of the cement to be supplied under the new contract are Messrs. John Cubit, Gostling and Co.

The value of the cement received during the year was Rs. 28,068-1-8 and of that issued Rs. 29,931-14-4.

The whole of the stock in hand was checked by the Inspector of Stores during the year and was found correct, with the exception of some slight discrepancies of old standing, which occurred when the present Store Clerk was not in charge. They are merely book discrepancies and the requisite adjustments will be made.

Sheds covered with corrugated iron roofing were erected for protecting the cast-iron fittings and the pipe-testing machine from damage through exposure to the weather. The total cost of construction amounted to Rs. 3,148-2-10 against the sanctioned estimate of Rs. 3,340 and was paid from the contingent grant for the Queen's Road and Girgam Sewerage Works as the cast-iron fittings in hand were chiefly for those works.

The work was executed by the Petty Work Contractors under the supervision of the Chief Inspector of Drains.

A portion of the Depôt near Arthur Road requires to be fenced in and made more secure.

The following statement shows that the value of stores in hand at the commencement of the year was Rs. 3,84,063-14-10 and that the receipts and issues during the year amounted respectively to Rs. 1,55,623-10-11 and Rs. 2,25,600-8-3. It also shows the value of stock in hand at the close of the year to amount to Rs. 3,34,001-4-6.

SUMMARY.

No.	Particulars.	Value of stock in hand on 1st March 1890.	Value of receipts during 1890-1891.	Total of Columns 3 and 4.	Value of issues during 1890-1891.	Value of stock in hand on 1st March 1891.	Remarks.

B.—WATER WORKS DEPARTMENT.

1.—General.

THE VEHAR LAKE AND DEPENDENT WORKS.

Rainfall, 1890.

The monsoon of 1890 proved to be a very favourable one, the rainfall aggregating 100·04 inches or 22·2 per cent. above the average, which is 81·57 inches. The rainfall commenced unusually early, the first showers falling on the 31st May, and the total fall of 35·6 inches up to the end of June is the heaviest on record. The level of the water in the Lake on the 31st May 1890 was at 241·80 T. H. D., and the storage 4,913 millions of gallons. The storage on the 31st October 1889 was 8,658 millions of gallons, the loss during the dry season being 3,745 millions of gallons or about 17·7 millions of gallons daily. This quantity, 17·7 millions of gallons, is the total loss due to consumption, evaporation and percolation. About 12 millions daily was consumed and about 5 millions evaporated, the balance being due to percolation into the margin of the lake, for the supply of the vegetation growing thereon, and for the leakage of the dams. The storage of 4,913 millions of gallons on the 31st May was increased to 11,011 millions of gallons on the 31st October, the level of the water on the latter date being at 262·35 T. H. D. Of this increase, about 1,250 millions of gallons was derived from the overflow of the Tulsi Lake, where the registered rainfall (116·09 inches) was the highest on record and is noticed below. The collection was also increased by the outlet tower valves being entirely closed and the draw-off to the City stopped from the 11th of July to 12th September. During this period the entire supply to the City (except Tulsi) was given from the new Pawai Works, which continued up to the 30th November to supply about 7½ to 8 millions daily, the total supply from Pawai being 1,056 millions of gallons. The result of the favourable rainfall on the Vehar Lake and gathering ground, of the overflow from Tulsi Lake, and of the supplementary supply from Pawai was that the level of water in the Vehar Lake was seven feet higher on the 31st October 1890 than it was on the 31st October 1889, the respective levels on T. H. D. being 262·35 and 255·40, of this difference the supplementary supply from Pawai accounts for 3·15 feet. On the 15th July, the level of the water (248·70 T. H. D.) was lower than on any previous occasion at that period, except 1872, but the circumstances related above brought the level up to 263·50 T. H. D. on the 29th and 30th September, this being the point of overflow, but the overflow never actually commenced and the level gradually receded. Table No. 1 gives the rainfall at, and height of water in, the Lake, and

also in the Pawai Lake during the year 1890. Table No. 2 gives the various gaugings at the Lakes during the same period. Tables Nos. 3 and 4 give the temperature of the water and details of evaporation from the surface of the Lake. The experiments were only commenced in November 1890 but will be continued.

Conservancy and General.

2. The preservation of the sanitary condition of the Lake and its gathering ground has continued to receive strict attention. The decaying matter on the lake area down to the water level was all burnt before the monsoon burst; the fouling of the water and ground by straying cattle from neighbouring lands has been prevented as far as practicable and legal action was taken in one case of erecting a hut for temporary human occupation: the hut was duly removed. The dams, catch-water channels, filters, sluice houses, chawls and bungalows have been maintained in good condition. No work of importance was required in connection with them during the year.

Pawai Works, Introductory.

3. The Pawai Works were, as briefly stated in the report for 1889-90, sanctioned by the Corporation on the 25th November 1889, as a measure of insurance against the danger and loss, which would result in the event of the monsoon of 1890 proving unfavourable, the storage in the Vehar Lake being already low owing to the over-draft on its supplying capacity caused by the increasing demand for water in the City. The works, considered as permanent works, render the supply from Vehar safe, even if the two mains, 32″ and 24″, are drawn upon to the full extent of their delivering capacity in Bombay, so that a recurrence of the serious depletion in Vehar in years of average rainfall can be averted by the use of the auxiliary Pawai Works. The serious nature of the depletion will be clearly seen from the following comparison:—

Date.	Storage in Vehar Lake.
31st May 1887...	7,091 millions of gallons.
„ 1888...	6,836 „ „
„ 1889...	5,472 „ „
„ 1890...	4,913 „ „

With the actual experience of 1871, when the monsoon only yielded sufficient to provide for the draw-off and other losses *at that time* and left the level of the lake the same at the end of October as it was at the end of May, and with the experience of recent years, which show that 3,750 millions of gallons have been required to provide the admittedly insufficient supply in the City, it is clear that a grave risk would have been incurred if no steps had been taken to prepare for an unfavourable rainfall in 1890.

Pawai Works, capacity.

4. The Pawai Works situated about a mile below Vehar and 5 miles from Kurla, intercept the flow of about 2,300 acres above the site of the Goper Dam, 1,700 acres of this are above the Pawai Dam, of which about 1,335 acres are gathering ground and 365 acres the area of the Pawai Lake when full. The average rainfall of the adjoining Vehar gathering ground is 81·57 inches. The actual rainfall on the Pawai gathering ground was, this year (1890), 94·33 inches or about 5 per cent. less than Vehar. It will probably be safe to assume that on an average of years it will be about the same. Without going into any elaborate calculations, a good practical guide to the capacity of these works will be gathered from the following comparison :—

Works.	Area of Lake.	Capacity of Lake.	Area of gathering ground.	Total.	Average yield.
	Acres.	Millions of gallons.	Acres.	Acres.	Gallons per day.
Vehar Works ...	1,400	11,425	2,500	3,900	9 millions.
Tulsi Works ...	331	2,306	1,383	1,714	4½ "
Pawai Works ...	365	696	1,935	2,300	Assumed 4½ "

On the assumption that they will yield 4½ millions, they are equal in yielding capacity to the Tulsi Works or to one-half of the Vehar Works, but on account of the lower level of the Pawai Works, the whole City cannot be efficiently supplied by gravitation from them, and pumping is required to give the required pressure and to more fully utilize the works on account of the small storage capacity. Including Interest and Sinking Fund on the cost of the works and the depreciation of plant and cost of pumping the water is put into the Vehar mains at equal pressure with Vehar for 1 anna per 1,000 gallons.

Pawai Works, Summary of cost of Works and Land.

5. The amount of the loan sanctioned for the construction of the Pawai Works was Rs. 4,55,000, and this has sufficed, in spite of the foundations of the Pawai Dam proving very unfavourable, to complete the works. The cost of the land was separately dealt with and the amount to be paid for it has not yet been settled. It was acquired under the Land Acquisition Act and proceedings are still pending in the District Court of Thana. The area taken is, according to the survey made by the Collector under the Act, 454 acres 32 gunthas. Arrangements were made whereby the Kopri village, consisting of 23 huts, was removed by the 10th May 1890, the payment made as compensation for all rights and losses both of owners and tenants being Rs. 1,275, paid over to the owners of the Pawai Estate. The clearing of the site of the Lake of the timber standing upon it was carried out departmentally, but owing to the late date, 12th May, on which the Collector's proceedings were sufficiently advanced to allow of the clearing to be commenced, the whole area could not be entirely cleared and a portion of the work remained undone until the close of the year under report.

Pawai Works, Summary of Contracts.

6. The different works required were almost entirely carried out by Contract and were as follow :—

Description of Work.	Contractors, &c.	Cost.
		Rs. a. p.
Supply of 2 Worthington duplex, double acting, triple expansion Engines, each capable of lifting 4 millions of gallons through 100 ft. in 24 hours, together with 2 Babcock and Wilcox Boilers, each of 124 N. H. P., delivered free in Bombay Harbour within 5 months of date of order ; ordered 25th November 1889. Last shipment arrived 25th April 1890.	Messrs. James Simpson and Company, Grosvenor Road, Pimlico, London, S. W.	80,785 3 5
Fee for Inspection of Engines and Boilers in England	Major H. Tulloch, R. E. ...	1,271 14 9
Salary and passage money of Superintendent of Erection at Pawai.	Mr. C. Briggs, M. I. M. E....	4,738 11 10
Erection of Engines and Boilers, including carrying from Bombay to Pawai, Construction of Engine, Boiler and Coal Houses. Completed 15th July 1890.	Messrs. Richardson and Cruddas, Bombay.	45,482 5 7
Engineer's Quarters, composing upper-storied bungalow, cookhouse, 4 rooms for stokers and outhouse. Completed 31st October 1890.	Messrs. Hirji and Raoji ...	13,641 8 2
Pipes, sluices and minor fittings for Engines and Boilers.	Messrs. Richardson and Cruddas.	616 4 0
	Water works Department...	520 6 2
Total cost of Engines, Boilers, Engine and Boiler Houses and quarters for Staff		1,47,056 5 11

NOTE:—Taking the H. P. required to lift 8 millions of gallons daily 100 ft. high at 170 and adding 10 per cent. for friction—total 187 H. P.—the cost of Plant per H. P. is Rs. 786-6-0. For Engines and Boilers only delivered free in Bombay Harbour Rs. 432 per H. P. If delivery had been in 8 months instead of 5, the price would have been Rs. 64,628 and the cost per H. P. Rs. 345-6-0.

Pawai Main Dam, including excavation for foundations, concrete in foundations, rubble masonry, cement pointing and blue stone pavement. In use from 11th July 1890 ; accepted as complete from 30th November 1890.	Messrs. Hirji and Raoji ...	1,35,212 13 10
Pawai subsidiary Dam completed about 10th October 1890.	Messrs. Hirji and Raoji ...	2,104 1 0
Pawai Main Dam Outlet Works ...	Messrs. Framji and Jivanji for fixing Iron work.	405 0 0
2. Do. do. do. ...	Messrs. Richardson and Cruddas for Iron castings.	2,179 7 0
3. Do. do. do. ...	Water Works Department for Iron castings and labour.	2,154 14 9

Description of Work.	Contractors, &c.	Cost.
		Rs. a. p.
48 Inches Main from Pawai Main Dam to the existing Vehar 32" and 24" mains, including bridge on Pawai Nala. Completed (except connections with existing mains) on 13th May 1890.	Tansa Department for pipes.	45,327 5 0
	Water Works Department for special pipes, &c.	7,383 6 7
	Messrs. Framji and Jivanji for laying pipes.	14,341 6 0
	Messrs. Richardson and Cruddas for Iron girders.	4,447 4 7
	Messrs. Hirji and Raoji for Masonry work.	2,627 3 0
27 Inches Delivery Main from Engine House to existing Vehar Mains; Bridge over Goper River.	Tansa Department for pipes.	7,409 8 6
	Water Works Department for special pipes, &c.	3,246 8 0
	Messrs. Framji and Jivanji for laying.	2,284 5 0
	Messrs. Richardson and Cruddas for girders.	3,593 3 0
	Messrs. Hirji and Raoji for masonry work.	999 7 0
Goper Masonry Dam, completed 13th June 1890.	Messrs. Hirji and Raoji ...	14,734 1 6
	Messrs. Framji and Jivanji for carting Iron work.	15 0 0
	Messrs. Richardson and Cruddas for Iron work.	2,105 0 0
	Water Works Department for special castings.	854 8 6
32" Suction Main from Goper Dam to Pumps.	Messrs. Hirji and Raoji for excavation.	100 0 0
	Water Works Department for pipes and work done.	5,134 13 3
	Messrs. Richardson and Cruddas for Iron castings.	5,064 11 2
House over sluice valves at junction of Pawai and Vehar Mains.	Messrs. Hirji and Raoji ...	9,500 0 0
House over 48" sluice valve at Pawai Main Dam, Concrete flood channel, Pawai Main Dam.		
Verandah front of Engine, Boiler and Coal houses, completion of masonry foundations for Tower and Screens, completed 31st May 1891.		
Residuum Lodges in Pawai Lake and on Streams entering it in dry rubble.	Mr. Sitaram Luxumon ...	1,606 0 0
Raising Pawai Road, completed about 19th May 1891.	Messrs. Framji and Jivanji for earthwork and pitching.	17,245 4 0
	Messrs. Hirji and Raoji for masonry culverts.	1,077 0 0
Establishment for supervision of works, &c.—		14,810 4 10
Superintendents	Mr. H. Watson from 16th December 1889 to 4th March 1890.	
Do.	Mr. G. H. Davison from 10th March to 10th July 1890.	

Description of work.	Contractors, &c.	Cost.
		Rs. a. p.
Inspector	Mr. A. Rosen from 16th December 1889 to 30th June 1890.	
Do.	Mr. G. H. A. Shew from 11th March to 4th October 1890.	
Do.	Mr. Ramchandra B. Bhandare, L.C.E. from 16th December 1889 to 30th June 1890.	
Surveyor	Mr. Jagannath Ransord from 16th December 1889 to 31st July 1890.	
Do.	Mr. D. D. Daruvala, L.C.E., from 16th December 1889 to 31st July 1890.	
Do.	Mr. N. D. Katrak, L.C.E., from 16th December 1889 to 31st July 1890.	
Total Expenditure... Rs.		4,52,958 14 5

Telephone.

7. For facilitating the repairs to mains as well as general work, arrangements were concluded with Government, by which, for an annual payment of Rs. 740 per annum, Government constructed and will maintain a telephone communication between Chinchpokli Stores and Pawai Engineer's Quarters. There are double instruments also at Kurla, from which place messages may be despatched either to Bombay or Pawai. The length of the line is 12½ miles, and communication was established on the 12th June 1890.

Bhandarwada Reservoir.

8. On the 12th February 1890 the Standing Committee, by Resolution No. 6481, sanctioned the repairs of Filter No. 1, Bhandarwada Reservoir, with Indian Patent Stone (Garlick's Patent), a grant of Rs. 11,000 having been sanctioned for this purpose by the Corporation on the 23rd January 1890. The work was commenced on the 24th April 1890 and was carried out under Mr. Garlick's supervision and completed on the 12th May 1890. The floor was covered with 1 inch of the stone: all the joints of the walls were raked out from 1 inch to 2 inches in depth and then refilled with the stone. The floors and walls of the inlet and clear-water channels co-extensive with the filter, and a portion also of No. 2 were similarly treated, as was also the west wall of Filter No. 2 and about 10 feet on the northern and southern ends, adjoining No. 1. Filter No. 1 was fillled on the 13th May to the maximum working height. The vertical loss from the 14th to 21st (7 days) was 3 inches. This loss includes evaporation, for which about 2·1 inches may be allowed. The absorption of water by the walls and floors has also to be allowed for. About ⅛th of an inch is unaccounted for, and further work has been undertaken in the current year and has been completely successful. Com-

plete statements of results and evaporation will be given in the report for the current year, during which observations are being made. The basin was again tested from 13th to the 21st November (eight days); the loss was 3·75 inches and the fall per diem ·469 inches.

Tulsi Lake and Dependent Works.

Rainfall.

9. The rains commenced on the 31st May and the total fall up to the end of the year was 116·09 inches, being the heaviest yet recorded at Tulsi. On the 19th June the fall was 9·53 inches and on the 20th and 21st, 5·78 and 5·12 inches respectively. The fall for the week being 23·71 inches. In the corresponding week 18·99 inches fell at Vehar and 19·39 inches at Pawai. The Lake overflowed on the 2nd August and the total surplus quantity which passed down into the Vehar Valley to the assistance of Vehar Lake was about 1,250 millions of gallons. During the Monsoon and up to the end of the year under report the discharge into the main to Bombay was curtailed about 20 per cent., the full delivery being given only during the hot season.

General.

10. The dams and catch-water channels are in satisfactory condition.

Repairs of pipe embankment.

11. The portion of the pipe line crossing the Bandra Creek alongside the B. B. and C. I. Railway was repaired, as far as the available funds permitted, by contract with Messrs. Framji and Jivanji. The work is dry rubble with hand-packed face. The quantity placed was 121,444 cubic feet, and the rate paid Rs. 10-8-0 per 100 cubic feet—total Rs. 12,751-10-0.

Malabar Hill Reservoir.

12. The Corporation sanctioned the expenditure of Rs. 97,930 for improvements at Malabar Hill Reservoir under their Resolution No. 2486, dated 8th July 1889, as follow, as per recommendation of Sir John Fowler :—

	Rs.
For providing an asphalte or concrete surface to the floor of the settling basin	75,000
Provision of turbine overflow and sludge pipes	11,500
Cushions for outlets of filters	9,800
Repointing walls of distributing basin	1,630
Total ...Rs.	97,930

The sum recommended by the Standing Committee and the amount of the loan sanctioned to be raised in the budget of 1890-91 (Loan Works) is one lakh, and the revised estimates were prepared for the apportionment of one lakh.

Of the total grant of one lakh, Rs. 80,435-1-4 have been expended as follow :—

	Rs.	a.	p.
Sinking trial pits	1,736	12	9
Asphalte floor, &c., settling basin	51,450	2	9
Cushions for outlets of filters, partition wall ... ... Overflows from settling and distributing basin ...	15,973	0	1
For sluice valve on direct delivery main	400	0	0
Turbine and pumps	8,501	13	0
Removing old pipes	2,373	4	9
Total ...Rs.	80,435	1	4

This leaves a balance of Rs. 19,564-14-8, to which add Rs. 9,063-8-0 estimated to be realized for surplus engine, and asphalte and other materials, giving a total of Rs. 28,628-6-8, available for other repairs and alterations to be done during the current year.

A 25-inches diameter turbine has been fixed in the outlet well on the outlet main supplying the City. This turbine propels a duplex double acting pump with 12 inches stroke and 6 inches diameter cylinders. The suction main has branches into the distributing basin and inlet well and a 6″ Siemen's Meter is fixed upon it. Air vessels are provided, both on the suction and delivery sides of the pump and a pressure gauge on the delivery side. The pump is also provided with a stroke counter. The turbine commenced to supply the high-level district on the 9th January 1891, and since that time has practically displaced the steam pump, saving about Rs. 1,800 per annum in fuel. The turbine and pump were designed and manufactured by Messrs. Gwynne & Co., Essex Street Works, Strand, London, W. C., and with the exception of the pump valves and the bevel gearing have proved very satisfactory. The changes required to render the valves and gearing less noisy are being carried out in the current year. The cost of the turbine and pump, as delivered at Malabar Hill Reservoir by Messrs. Ewart, Latham and Co., was Rs. 8,275. The capacity of the turbine is 11,000 gallons per hour lifted 60 feet, provided there be 10 feet head of water to work the turbine.

Distribution and Maintenance.

New mains laid.

13. Table No. 6 gives the particulars of the new mains laid during the year. The total length is about 28,000 feet or nearly 5½ miles. The work of laying has been done by contract with Messrs. Kavasji Bhedwar & Co., the pipes being supplied by Messrs. John Fleming & Co., and made by Messrs. T. Edington & Co., Glasgow.

Renewal of old mains.

14. In several streets where the existing mains were corroded, the old pipes were displaced by new ones, the laying being done by contract with Messrs. Shapurji Hormusji and DeJesus. The details are given in Table No. 6.

Public supplies.

15. The number of free supplies on the 31st March 1890 was 174 being the same as in the preceding year. The principal change in their character was the conversion of dipping wells into supplies through taps. The details are given in Table No. 7.

Notices issued.

16. The number of notices issued during the year was 3180 against 4063 in the preceding year. The details are given in Tables Nos. 8 and 9.

Correspondence.

17. The comparative statement of correspondence for the 3 years, 1888-89, 1889-90, 1890-91, is :—

	1888-89.	1889-90.	1890-91.
Inward Letters	6,282	6,993	7,822
Outward do.	6,386	7,422	8,315
Total ...	12,668	14,415	16,137
Letters sent to Inspectors for report ...	3,929	4,425	4,282
Do. received from Inspectors with report	3,963	4,475	4,266
Total ...	7,892	8,900	8,548
GRAND TOTAL ...	20,560	23,315	24,685

Waste Prevention.

18. The work of waste prevention was kept up, but the special staff was reduced as far as practicable. Table No. 10 gives details of night readings.

Bursts repaired.

19. The repairs required during the year have been as follow :—

Diameter of Main.	No. of Bursts.	Remarks.
3″	68	The 32″ Main at Kurla failed twice during the year. In each case the metal was almost corroded away. For the apparently large number of repairs on 3″ and 4″ mains, it must be remembered that there are 90 miles of mains of these sizes with nearly 600 pipes per mile. The failures are 1 in 500 only.
4″	21	
5″	3	
6″	1	
7″	2	
9″	1	
10″	2	
24″	2	
32″	2	

Connection Work.

20. During the year 757 new connections were made for private parties and 187 for drainage flushing chambers, 208 services were disconnected, principally belonging to demolished buildings. The increase in connections during the year was 736, bringing the total number up to 17634 and being an increase of 4·4 per cent. The details are given in Table 11. There were in addition 705 transferred or altered connections.

Meter supplies.

21. The meters in use on the 31st March 1891 numbered 1184, being a decrease of 9, owing to many removals from properties having to pay on assessed value under the new Act during 1890-91. In 1890, 859 millions of gallons were metered against 865 in the preceding year, the reduction being partly due to the same cause as the reduced number of meters and partly to a reduced Monsoon consumption, the rains commencing on 31st May and continuing late. The details are given in tables Nos. 12, 13 and 14.

Stock valuation.

22. The valuation of the stock on the 28th February 1891 shewed a total of Rs. 4,13,233-9-8 against Rs. 3,94,140-8-8 (*vide* Corporation Annual Report 1889-90, Assets) in the preceding year. The purchases during the year aggregated Rs. 1,93,889-6-2 and the sales Rs. 1,71,389-3-3 ; the result therefore was a loss of Rs. 3,228-6-11. It should be noted that the price for cast-iron pipes receded during the year and that the sale price of those in stock was reduced to Rs. 105 per ton in place of Rs. 115 in 1890. Last year's valuation showed a large profit (Rs. 44,507-1-10), partly due to this advance on 1889, when the price was Rs. 105 per ton. The Siemen's Meters have this year been valued at their cost price, according to the books of the Chief Accountant (*vide* Municipal Commissioner's No. 26237, dated 17th February 1891), instead of the selling prices and in future years a deduction of 10 per cent. will be made from the present valuation to meet the depreciation by wear and tear.

B.—WATER WORKS.

2—Tansa Works.

(1) *Works at Tansa.*

The dam works were practically completed at the end of the year. Owing to the approach of the monsoon, work was suspended in the beginning of June 1890, and it was resumed early in October. The total quantity of masonry which had been executed at the commencement of the year was 7,509,564 c. ft., and at the close of the year it was 11,000,000 c. ft., making the out-turn for the year 3,490,436 c. ft. The out-turn of work for the month of January was 705,000 c. ft., which is the largest quantity executed in any one month during the progress of the works. The accompanying statement (Appendix A) shows the progress made on the dam works from the commencement of operations to the end of the year. At the commencement of the year (1st April 1890) the water in the Lake stood at R. L. 354·75, at the beginning of the monsoon it was at R. L. 353·37, and at the end of the monsoon it stood at R. L. 380·36, which gave a depth of 90·36 feet against the water face of the dam in the bed of the river. At the end of the year the water stood at R. L. 378·51 or 1·49 ft. below the sill of lowest outlet sluices. The observations made during the year to determine the loss by evaporation and percolation gave satisfactory results. The total vertical loss on the Lake surface from the 13th December 1889, when the flow of water escaping by the temporary waste weir was stopped, to the beginning of the rains was 3·13 ft. The rainfall of the year was gauged at the dam site and gave a total of 105·93 inches. The average of the previous five years is 103·33 inches and the average of the six years, including 1890, during which observations have been taken, is 103·76 inches. The flood waters of last monsoon were passed over a portion of the dam, 450 ft. in length, to the south of the river, which will eventually form part of the permanent escape or waste weir. Special arrangements, referred to in last year's report, had to be made for passing off the flood water, and they acted very efficiently. Careful contour surveys of the Lake at R. L. 380 (lowest outlet level) and R. L. 420 (full supply level) were in progress during the latter part of the year. The masonry of the outlet works, including the outlet basin, were practically completed. The erection of the outlet sluice gates was in progress and arrangements were being made for the screens across the outlet basin.

(2) *Duct Works.*

Satisfactory progress was made with the duct works during the year. At the commencement of the year, work to the value of Rs. 32,60,000 had been executed, and at the end of the year the value of work done was Rs. 46,70,000, making the value of

the out-turn of work executed during the year, Rs. 14,10,000. The length of tunnels driven during the year was 7,230 l. ft., making the total length driven 21,000 l. ft. and leaving the balance remaining to be driven, about 900 l. ft. In tunnel No. 2, the longest tunnel, 1½ miles long, only 240 ft. remain to complete the driving and this should be completed by the middle of May. There still remains a good deal of work to be done to this tunnel in the shaping of it or forming it to the proper section and timely arrangements have to be made, so that the work may proceed without interruption during the rains. The masonry conduits aggregating about 23 miles in length have been nearly completed, only a few gaps, making in all less than a mile, remaining to be done. During the last monsoon, experiments were made on an extensive scale to determine the qualities of the conduits as regards leakage. A number of places in the conduit varying in length from a few hundred feet to half a mile, were closed by cross walls and water was brought into them from hill-side streams and after the rains had ceased the daily loss was observed and recorded. The results varied considerably in different places. On the assumption that the average loss, as derived from the series of experiments made, may be considered as applicable to the whole of the line of finished conduit, the result is equivalent to a loss of about 4 per cent. on the water in its transit through the conduit from Tansa to Ghatkopar. Should the above assumption prove correct, the result may be considered satisfactory.

The laying of the 48″ pipes on all the siphon tracks except No. 1 was approaching completion. On siphon No. 1, which is 8 miles from Tansa, the pipes had not yet been delivered, but arrangements were completed for carrying them forward.

The accompanying statement, Appendix B, shows the progress made with the duct works from the commencement of operations to the end of the year.

(3) *Cast-Iron Pipes.*

The whole of the pipes required for the project, with the exception of a small number of special castings required for the Kurla Creek siphon, have been tested and passed at home.

The number of pipes still remaining to be delivered is small; all the pipes could have been delivered before this, had they been required.

The accompanying statement, Appendix C, shows the value of the pipes delivered by the contractors up to the end of the year.

(4) *Land Acquisition.*

All the land for the Lake and for the duct up to the boundary of the Island of Bombay has been acquired. In the case of two properties in the Island of Salsette the terms of compensation have not yet been settled and it is probable that they shall have to be referred to the Civil Courts.

(5.) *Health.*

There has been no serious outbreak of any epidemic on any part of the works during the year. As ususal there has been a great deal of malarious fever in the whole of the districts where the works are situated.

(6.) *Works from Ghatkopar to Bombay.*

The line was definitely laid out at the beginning of the year and a contract for the embankments on the tidal lands, which it was of importance, should be made before or during the monsoon, was let to Messrs. Bulkley & Co., and the work was completed in the rains.

The contract for the remainder of the work was let in December to Messrs. Sitaram Luximon & Co., and work was commenced in January. Progress on these works has not been altogether satisfactoy. The laying of the 48″ main along the Supari Bagh and Arthur Roads progresses but slowly, as in some places a good deal of rock is met with and the cutting of the trench in this is tedious. The works at the Kurla Creek are backward. The difficulties there are considerable and the Contractors have not yet been able to cope with them in a satisfactory manner.

Nature of work.	Contractors.	*Amount of Revised Estimate.	Amount of work done up to end of March 1891.	Balance of Estimate.	Date of Contract.	Date for completion under Supplemental Contract.
		Rs.	Rs. a. p.	Rs. a. p.		
Construction of the duct from the Tansa Dam to Ghat-Kopar.	Messrs. Walsh, Lovett, Mitchell & Co.	51,71,000	46,72,499 0 0	4,98,501 0 0	15th Sept. 1886.	1st March 1892.

* This includes enhanced rates payable on works executed before 1st November 1889, which amounts to Rs. 2,12,382.

APPENDIX C.

Nature of work.	Contractors.	Amount of Revised Estimate.	Amount of supplies paid for up to end of March 1891.	Amount remaining to be spent.	Date of Contract.	Date for completion. *
		Rs.	Rs. a. p.	Rs. a. p.		
Supply of pipes, &c.	Messrs. Macfarlane, Strang & Co.	†40,00,000	37 05,172 15 1	2,94,827 0 11	26th April 1886.	1st Oct. 1889.

* This date does not cover the delivery of pipes as per Schedule C (Clause 19 of the Contract). A further period of nine months was allowed for delivery of them. Delivery could have been completed within the time, but as the pipes were not required, the Contractors were informed that delivery need not be hurried.

† This includes certain pipes and special castings which have been obtained locally.

C.—MUNICIPAL BUILDINGS.

Construction and Repairs.

CHINCHPOKLI FIRE BRIGADE STATION.

The construction of this Station was given out by contract to Mr. Ardeshir Framji for Rs. 23,099, including 15 per cent. contingencies, as sanctioned under the Standing Committee's Resolution No. 7065, dated 6th March 1889.

The work completed by the Contractor amounted to Rs. 19,543-9-5, *viz* :—

	Rs.	a.	p.
On account of the contract works	17,540	5	6
and for the construction of the boundary wall and fencing which were extra works not included in the contract ...	2,003	3	11
	19,543	9	5
A small portion of the boundary wall is being done departmentally, the sanctioned grant of which is	1,237	9	5
The expenditure on account of contingencies for this work was.	1,043	2	8
The expenditure for Establishment was	1,274	10	6
Purchase of land	20,186	3	0
The total cost would thus be Rs. ...	43,285	3	0

EXTENSION OF ERSKINE ROAD MARKET.

This work which it was decided should be done departmentally was constructed under the Supervision Inspector, Mr. Baker, and the Superintendent of the Workshops. The former had charge of the foundations, pavement, masonry, &c., and the latter the fitting up of the iron work of the superstructure, construction of stalls, &c.

	Rs.	a.	p.
The amount sanctioned for this work was	69,217	12	9
The actual cost was :—			
Work done by Mr. Baker...	14,762	15	7
Cast-iron stancheons purchased from Messrs. Gahagam & Co.	2,542	3	6
Work done by Superintendent of Workshops	45,411	4	9

EXTENSION OF MAHALAXMI DHOBIWADA.

As mentioned in the last Annual Report this work was completed about the beginning of March 1890, excepting the 9″ pipe sewer work, which had to be postponed as our stock of pipes of this size was exhausted. As this item did not form a portion of the contract work, the Municipal Commissioner decided under his No. 20567, dated 14th March 1890, that it should be done departmentally, and it was completed accordingly during the year under report.

The Contractor for this work was Ghamaji Balaji, whose tender, amounting to Rs. 37,446, including 15 per cent. for contingencies, was accepted under the Town Council's Resolution No. 1234, dated 24th November 1886. The work, however, had to be stopped as the B. B. & C. I. Railway Company required a portion of the ground, on which the extension was to be built, for the purpose of improving the approach to the Mahalaxmi Railway Station. The work was resumed on the 1st May 1889 and completed as above mentioned in March 1890.

1. RAISING THE LEVEL OF THE GROUND OF THE ARTHUR ROAD HOSPITAL.

2. FILLING IN MUNICIPAL GROUND NEAR THE ELPHINSTONE ROAD CHURCH.

3. RAISING LOW GROUND AT VICTORIA GARDENS.

The contract for the above works was given to Messrs. Framji and Jeewanji, whose tender was the lowest of ten teuders received for these works, as sanctioned by the Standing Committee under its Resolution No. 8983, of 10th December 1890.

The following is a comparative statement of the amounts of the grants for the work and the amounts at which the contract was given :—

	Amount of Grants.	Amount of Contract.
	Rs. a. p.	Rs. a. p.
Arthur Road Hospital	10,000 0 0	9,615 15 0
Elphinstone Road Ground	1,278 0 0	1,167 13 0
Victoria Gardens Ground	7,392 14 4	7,390 8 0
Total Rs. ...	18,670 14 4	18,174 4 0

In the case of Victoria Gardens the work has been reduced to Rs. 5,469-5-4 so as to bring the cost within the amount of the available balance of the Grant, portion of which having been already expended.

D.—REGULATION OF STREETS AND BUILDINGS.

The number of applications for permission to either build or re-build during the year under report amounted to 1,287. Out of these, 939 were passed, and the remaining 348 were unconditionally disapproved on sanitary or other grounds.

The undermentioned notices, 7,559 in number, were served on house-owners under various sections of the Municipal Act, regarding removal of inflammable materials, building contrary to Municipal requirements, making projections over streets, &c., &c.

Statement of notices issued under different sections during the year 1890-91.

Section of Municipal Act.	Particulars.	Number of Notices.
349	To remove inflammable materials in external walls and roof covering	1,939
351	To submit plans	441
257	To remove buildings erected contrary to provisions of the Act...	39
353	To remove privies built without permission	164
311	To remove or alter doors or windows opening over the public road	155
231	To provide rain-water troughs and pipes	339
309	To remove old projections	431
308	To remove new projections	193
354	To pull down ruinous houses	676
383	To cut and trim trees	19
315	To remove temporary projections or obstructions	71
329	To fence or enclose wells, tanks and dangerous places	8
488	Of intention to enter houses after 24 hours	2,916
299	Of intention to take possession of land outside buildings for street improvement	60
305	To level, metal, drain and provide lights	99
232	To provide proper drainage to new buildings	4
234	Do. do. do.	4
258	Do. do. do.	1
	Total	7,559

On failure of house-owners to comply with notices, proceedings were taken against them in the Police Courts.

The number of summonses issued for different offences committed under the Act was 282.

In 246 of these cases, the parties complied with the Municipal requirements before service or return of the summonses, and convictions were obtained in the remaining 36 cases.

In 32 of the convictions obtained, the parties were simply warned and discharged by the Magistrates on account of their having carried out the Municipal requirements immediately after service of the summonses.

In the remaining 4 cases, fines were inflicted, amounting in all to Rs. 46-0-0.

The following statement shows the different sections of the Act under which offenders were prosecuted and other details of the prosecutions :—

The amount allowed for street improvement was Rs. 1,00,000 and to this sum was added the unexpended balance of the previous year, amounting to Rs. 1,24,894-3-3 *plus* extra grant of Rs. 30,000 subsequently sanctioned ; thus making total of Rs. 2,54,894-3-3. The total amount actually expended was Rs. 1,21,746-13-9.

The expenditure of the full amount of the sanctioned grant depends upon the number of set-back cases effected in the year and also upon the number in which terms have been concluded.

The following statements, marked 1 to 7, give details of ground taken up and added to streets in each ward during the year under review.

1

A Ward.

E.—ROADS.

This Report deals with the above subject in the following order :—

		Page.
(*a*)	Road Repairs...	306
(*b*)	Road Watering	307
(*c*)	Paving footpaths	307
(*d*)	Steam-rollers	308
(*e*)	New roads—	
	(1) Mahalakshmi Cross Road	309
	(2) Road through Naoroji Hill from Elphinstone Bridge to Dongri Street	309
	(3) New road between Lady Jamsetjee Road and Matunga	310
	(4) New road from Jakaria Bunder Road to Sewri Cemetery	310
	(5) Overbridge at Falkland Road	311
(*f*)	Extension of Retaining Wall at Walkeshwar ...	312
(*g*)	Tramway	312

ROAD DEPARTMENT.

The following statement shows the grant allowed for (*a*) Road Repairs and (*b*) Road Watering, under each of the Budget Sections, together with the amounts actually spent on each section and the savings and excesses under each head :—

(*a*)—ROAD REPAIRS.

STATEMENT of Expenditure for 1890-91 of the Road Repairs Grant.

Section.	Heads.	Amount of Grant as revised.	Expenditure.	Saving.
		Rs. a. p.	Rs. a. p.	Rs. a. p.
1	Purchasing of Materials, Road Metal, Sandstone, Kerb-stones and Water-tables	1,60,824 10 10	1,39,217 13 5	21,606 13 5
2	Cart-hire and Labour, including Road Scraping	1,74,480 2 8	1,46,015 7 9	28,464 10 11
3	Paving Footpaths	85,104 9 8	33,700 5 2	51,404 4 6
4	Maintenance of Steam-rollers, Carts, and share of Persian Wheels	42,584 6 6	37,973 5 5	4,611 1 1
5	Stores and Contingencies	28,142 12 7	29,142 13 6	.....
6	Ground Rent	3,279 0 8	2,361 0 11	917 15 9
7	Water-supply to Chowkies at Null Bazar, &c., *plus* rent of Meters	256 0 0	197 4 8	58 11 4
8	Purchase of 4 Steam-rollers ...	25,000 0 0	24,754 8 4	245 7 8
9	Purchase of 9 Carts for Liquid Road Scraping	.....	.....	.....
10	Repairs to Bridges, Culverts and Road side Retaining Walls and annual repairs to Chowkies...	4,800 0 0	1,910 10 3	2,889 5 9
11	Tree Guards for Road-side Trees	3,500 0 0	2,771 0 5	728 15 7
	Total for Road Repairs...	5,27,971 10 11	4,18,044 5 10	1,10,927 6 0

(*b*)—ROAD WATERING.

STATEMENT of Expenditure for 1890-91 of the Road Watering Grant.

Section.	Heads.	Amount of Grant as revised.	Expenditure.	Saving.
		Rs. a. p.	Rs. a. p.	Rs. a. p.
1	Bullocks and Bhisties	11,403 0 0	6,844 7 2	4,558 8 10
2	Water Carts.....	61,533 8 8	49,443 6 7	12,090 2 1
3	Repairs to Persian Wheels, &c...	4,853 9 0	4,008 8 8	845 0 4
4	Proportion, $\frac{7}{8}$ of cost of Cart Repairs.....	8,820 0 0	7,304 4 5	1,515 11 7
5	Purchase of new Water Carts...	7,474 3 11	5,274 3 11	2,200 0 0
6	Purchase of new Water Tanks...	10,088 15 7	368 15 4	9,720 0 3
	Total for Road Watering...	1,04,173 5 2	73,243 14 1	30,929 7 1

Fifteen hand water-carts were made at the Municipal Workshop during the last year at a total cost of Rs. 2,400 to facilitate the work of repairing and patching roads.

(*c*)—PAVING FOOTPATHS.

The work which remained to be done out of the grant of Rs. 50,000 for 1889-90, was completed during the year under review.

The following footpaths were paved in addition to those mentioned in the last report :—

	Square yards.
Apllo Pier	... 1,010·76
Esplanade Road	... 1,681·00
Mayo Road, Queen's Statue, College, &c.	... 30,636·73
Grant Road	... 3,476·26

The total work finished by Contractor, Mr. Fakir Mahomed Babanbhai, was as under :—

Quantity.	Particulars.	Rate.	Per	Amount.
		Rs. a. p.		Rs. a. p.
81,479·66 s. ft.	Bluestone pavement flags, set in 4" of concrete, laid and dressed according to specification, including the removal of excavated material	40 0 0	100 s. ft.	32,591 13 9
7,000·00 r. ft.	Bluestone kerbing according to specification.....	0 7 0	1 r. ft.	3,062 8 0
81·65 c. ft.	Bluestone, perforated	2 8 0	1 c. ft.	204 2 0
400·00 „	Rubble and lime masonry	16 0 0	100 „	64 0 0
100·00 „	Blue chisel-dressed slab-stones for drains covers	2 0 0	1 „	200 0 0
8,000·00 s. ft.	Fixing Table stones, 1½' long, laid on 4" of concrete	45 0 0	100 s. ft.	3,600 0 0
5,500·00 „	Set pavement on 6" of concrete.....	80 0 0	„	4,400 0 0
	Total Rs...			44,122 7 9

A sum of Rs. 50,000 was sanctioned in the Budget for 1890-91. The tender of Mr. Sittaram Luxumon for this work was accepted by the Standing Committee, (*vide* their Resolution No. 8056 of the 11th November 1890).

On the 28th of January 1891, under No. 3331 G, Mr. Sittaram Luxumon was informed that the following footpaths were to be paved under his contract :—

1. From Scotch Church to Forbes Street.
2. North-east entrance, Government Telegraph Office.
3. From Sir Dinshaw Petit's Library along Bank Street to Green Street along Harbour side.
4. Frere Road east from Fort Street to Chiplun Street.
5. Apollo Pier (a double carriage entrance).
6. Hornby Road from the Municipal Hall to the junction of Carnac Road.
7. Frere Road from Poona Street to Ahmedabad Street, south side.
8. Thanna Street between Frere Road and main entrance of the Prince's Dock.
9. Thakurdwar Road between Girgam Road and Parsee Sanitarium.
10. Parel Road, corner of Old Nesbit Lane to the entrance of Byculla Station, east side.
11. Parel Road from Shepherd Road towards Byculla Bridge, west side.

The contractors commenced the work, but no progress was made worthy of notice during the year.

(*d*)—STEAM-ROLLERS.

The number of steam-rollers at work during the year was 16, *viz.*, one of 15 tons, one of 12½ tons, 3 of 10 tons and 11 of 8 tons.

Four new steam-rollers, *viz.*, 1 of 20 tons, 1 of 15, 1 of 12½, and 1 of 10 tons, were purchased during the year, making the total number of 20 steam-rollers.

The total area of roadway rolled by steam-rollers was 7,643,165 square feet, at a total cost of Rs. 34,703-1-7.

(*e*)—NEW ROADS.

1. *Mahalakshmi Cross Road.*

As stated in the report for 1888-89, Rs. 23,000 were sanctioned for this work.

The contract was given to Mr. Bhomajee Shivajee for Rs. 21,935, and the work was commenced on the 15th February 1889.

The contractor failed to complete the work, and it was ultimately taken out of his hands and completed by the Municipality at his risk and expense.

The final accounts, however, were not made up during the year under report.

2. *Road through Naoroji Hill from Elphinstone Bridge to Dongri Street.*

As mentioned in the last annual report, the Municipal Commissioner under his No. 1248 of the 24th April 1890, made an application to the Collector of Bombay to acquire the land under the Land Acquisition Act.

The Government, under their Resolution No. 5127 of 22nd July 1890, sanctioned the issue of notification and the Collector to take orders for the acquisition of land. The notification was published in the Bombay *Government Gazette* on the 24th July 1890, in which the several plots of land to be acquired were mentioned.

On the 23rd August 1890 the Collector intimated to the Municipal Commissioner (*vide* his No. $\frac{\text{L. R.}}{1620}$ of 1890) the dates fixed for the hearing of the several cases and requested to send some one to represent the Municipality.

On the 10th of October 1890 the Municipal Solicitors informed the Municipal Commissioner that the enquiry in reference to the aquisition of land in question was progressing before the Collector and that an arrangement had been come to between the Municipality and Mr. Jalbhai Ardeshir Sett for the purchase of his interest in the land for Rs. 1,50,000, subject to certain concessions which he was to make.

In arriving at this arrangement it was understood, as alleged by Mr. Jalbhai, that he had an absolute interest in all the land and the tenants of the various properties were entitled only to the value of the buildings upon them.

During the proceedings before the Collector, however, a number of claimants appeared, represented by Mr. Sayani, and they disputed the correctness of Mr. Jalbhai's statement. The Solicitor applied to the Collector to adjourn the enquiry *sine die* and referred the matter to the Commissioner, explaining that, in case the Collector awarded the

sum of Rs. 1,50,000 as agreed with Mr. Jalbhai as the value of the land, it would, of course, in no way bind the claimants, and, in the event of their going to law, the Municipality would be called upon to pay large sums in satisfaction of such claims. The matter stops here for the present.

3. *New Road between Lady Jamsetjee Road and Matunga.*

It was mentioned in the last report that the Corporation in their Resolution No. 6867 of the 13th February 1890 sanctioned the demarkation of the lines for this road. The actual construction has not been taken in hand.

On the 28th of April 1890, in their Resolution No. 881, the Corporation sanctioned the purchase of additional land on the sides of this road. They also resolved that where the owners of land give the ground required for making the roadway free of charge, the Corporation undertake the construction and leave the frontages to the owners, but that where the whole expense, both of construction and acquisition, devolves on the Corporation, the Commissioner should secure the frontages as well as the actual road area.

There have been certain difficulties in acquiring land for this road, and it is not unlikely that the alignment will have to be altered. It is not probable that the construction will be taken in hand at an early date as there are several others of greater importance which claim priority.

4. *New Road from Jakaria Bunder Road to Sewri Cemetery.*

On the 20th November 1888 the Executive Engineer submitted to the Municipal Commissioner under his No. 10325 A tracing of the proposed Sewri Road, showing regular lines of the street and requested that sanction be obtained for its construction.

In their Resolution No. 7580 of the 12th March 1890, the Municipal Corporation accepted the offer of Mr. Dorabjee Cursetjee Shroff to make over to the Corporation, free of cost, 16,000 square yards of ground or thereabout for the construction of a road, 40′ broad, on condition that it should be commenced within three months and completed within a year from commencement.

On the 10th of April 1890 the ground was taken over from Mr. Dorabjee Cursetjee Shroff and on the 22nd May 1890 the Corporation in their Resolution No. 1484 sanctioned an expenditure of Rs. 37,419 for the construction of the road.

Tenders were invited and the Standing Committee, in their Resolution No. 4015 of 30th July 1890, sanctioned the acceptance by the Commissioner of the tender of Messrs. Amruta Babajee and Bhedwar & Co.

Order to commence the work was given to the contractors under this office No. 14899 B of 11th December 1890.

The following are the quantities of work done up to the end of year 1890-91 ;—

Description.	Quantity.	Brass.	Rate.	Per	Amount.
			Rs. a. p.		Rs. a. p.
Excavation in earth	4,767	...	1 0 0	Brass.	4,767 0 0
Filling in earth for road, including the filling in rubble in Jubilee Tank...	638	...	1 8 0	„	957 0 0
Excavation in rock	57	...	2 8 0	„	142 8 0
Rubble masonry wall erected near China Mill	24	...	14 0 0	„	336 0 0
Road metal supplied	675	...	4 4 0	„	2,868 12 0
Packing stone supplied ...	730	...	3 4 0	„	2,372 8 0
					Rs. 11,443 12 0

5. *Overbridge at Falkland Road.*

The Government of Bombay in Resolution No. 613 of the 19th March 1891 have resolved—

(*a*) To accede to the desire of the Municipality that the approaches of the bridge on the Gilder Street side should be at a slope of 1 in 28 instead of 1 in 40 as formerly settled.

(*b*) The original idea was that the bridge should be 30 feet wide, with two low level roads, each 20 feet wide, and sufficient land for that purpose was provided by Government. At the express desire of the Municipality, the width of the bridge was increased to 50 feet and the Governor in Council is not prepared to alter the views expressed in Government Resolution No. 469, dated 24th February 1890, that " any expenditure entailed in the acquisition of additional land, injury to property and allied charges must be met by the Municipality."

(*c*) Owing to the alteration in the gradient of one approach, modified designs of the bridge are now required, and the Chief Engineer of the Bombay, Baroda and Central India Railway Company and the Municipality should consult together and agree to the new design, so that at the outset it can be exactly understood what further land is required.

(*d*) His Excellency the Governor in Council will be pleased to order the commencement of the work as soon as the Municipality have signified their consent to pay for the extra land required."

The Municipal Corporation in their Resolution No. 3133 of the 22nd June 1891 have accepted the liability at a cost not exceeding Rs. 22,000 or thereabout for any expenditure entailed by the acquisition of additional land, injury to the property and allied charges in respect of the construction of the overbridge.

(*f*) EXTENSION OF THE RETAINING WALL AT WALKESHWAR ROAD.

A portion of the retaining wall was constructed during the year, but for want of funds the whole was not completed. Rs. 5,000 have been provided in the Budget for 1891-92, and the work which has been taken in hand will be further reported on next year.

LIST OF ROADS.

During the last year a properly classified list was prepared of all roads within the Island of Bombay divided into 1st, 2nd and 3rd class and private roads, showing the length, breadth and area of each road, the areas of the footpaths, the areas occupied by tramways, the approximate areas of ground to be still added to each road, the watering arrangements, the sewers, drains and lights in each road, &c.

(*g*) TRAMWAY.

There is no extension of tramway during the year under report.

On the 23rd March 1890 the Managing Director of the Tramway Company made an application to the Municipal Commissioner for approval, under Section III of the Bombay Tramway Act I. of 1874, for the extension of the Tramway from the present line at the corner of the Grant and Falkland Roads by a double track along Grant Road towards the east, crossing Parel Road and continuing to a point near Hancock Bridge.

The Municipal Commissioner submitted the application, with his No. 2028 of the 3rd May 1890, to the Bombay Government with a recommendation that sanction may be accorded subject to certain requirements to be exacted in points of Engineering detail where the track crosses sewers or water mains.

The Bombay Government, under their Resolution No. 1927 of the 14th May 1890, sanctioned the extension subject to the conditions mentioned by the Municipal Commissioner.

The Tramway Company, however, has not commenced laying their lines as yet.

F.—Lighting.

The gas lighting of the streets was generally satisfactory. The gas was supplied free from sulphur and other impurities, but its pressure was not maintained up to the contract strength.

On the 24th April 1890 the photometer was examined and its actual working was looked into so as to test the illuminating power as well as the pressure of the gas.

Certain discrepancies were found in the pressure gauge and the Manager of the Gas Company was addressed on the subject.

The automatic pressure gauge at the photometer house was removed and repaired, but as it did not work satisfactorily, and with the view to obtain accurate test of the pressure of gas in the different parts of the island, it was subsequently suggested that six new automatic pressure gauges should be purchased and fixed at different places.

These gauges, which are ordered out from England by the Gas Company, will be fixed as soon as they are received and the result of the pressure of gas ascertained from them will be reported on the next year.

The illuminating power of the gas was maintained during the year up to the contract strength.

The number of lamps in use at the end of the year was as follows :-

Gas lamps...	3,509
Kerosine oil lamps	1,371

The lighting with kerosine oil was not at all satisfactory and I had on several occasions to call the contractor's attention to the perfunctory manner in which they carried out their contract.

He was fined on several occasions by the Commissioner's orders, but as that did not improve matters and, with the view to stop the constant complaints from the public, it was decided to carry out the kerosine oil lighting during the current year departmentally.

G.—Workshops.

The following statement gives the monthly expenditure, amounts charged, &c., on account of work done and establishment entertained at the Municipal Workshops during the last year.

Charged for supervision of Love Grove and Carnac Bandar Machinery and Steam Rollers					2,400 0 0																	
Charged for shop charges for the construction of the Leper Home					800 0 0																	
Charged for bolting supplied to Love Grove Pumping Station					129 0 1																	
Charged for babulwood scrap handed over into stores					56 0 0																	
Total amount charged in 1894-94 ..					1,42,114 4 1																	

Allowance for supervision, Love Grove and Carnac Bandar Machinery and Steam Rollers 2,400 0 0

Allowance for shop charges, &c., for the construction of the Leper Home 800 0 0

Cost of Babulwood scrap handed over to the Stores 56 0 0

Cost of leather belting transferred to Love Grove Pumping Station 129 0 1

Amount realized from sale of iron scrap, unservicable stores, &c. sold by auction 593 14 8

Difference.. Rs. 2,836 14 11

From this statement it will be observed that the expenditure incurred under the different heads of the Workshops accounts were as follows :—

	Rs. a. p.	Rs. a. p.	Rs. a. p.
For Departmental Works, &c.—			
Labour		38,837 8 1	
Stores		54,507 8 1	
Total			93,345 0 2
For Workshops Stores—			
Labour		1,895 2 9	
Stores		5,588 5 6	
Total			7,483 8 3
For Shop Charges—			
Labour	2,216 7 9		
Stores	10,328 9 4		
Total		12,545 1 1	
For Tools and Repairs to Machinery, &c.—			
Labour	2,286 11 11		
Stores	2,141 0 4		
Total		4,427 12 3	
For Supervision Charges, Establishment, &c.—			
Establishment	12,480 14 9		
Contingencies	452 5 5		
Total		12,933 4 2	
			29,906 1 6
For Stores Establishment....			1,135 0 0
Total Expenditure during 1890-91... ...			1,31,869 9 11

The total expenditure during the last year on account of Departmental works, &c., and for Workshops Stores jobs aggregated, including the usual 25 per cent. supervision, Shop charges, &c.	Rs.	1,24,164 12 3
Add—Amount of incomplete jobs in the beginning of the year.	„	17,255 0 0
		1,41,419 12 3
Deduct—Amount of incomplete jobs at the end of the year		2,389 8 3
Thus leaving the amount of Rs. 1,39,030-4-0 on account of works completed and charged for during the year		1,39,030 4 0

The actual cost on account of supervision, Shop and repair charges, &c., amounted to			29,906 1 6
The amount recovered from the percentage charged for supervision, Shop charges, &c., on work performed was	23,336 3 10		
For supervision of Love Grove and Carnac Bundar machinery and steam rollers	2,400 0 0		
For Shop charges for construction of Leper Home ...	500 0 0		
For Babulwood scrap handed over into Stores	55 0 0		
For leather belting transferred to Love Grove Pumping Station	129 0 1		
For sale-proceeds of unservicable stores sold by public auction	598 14 8		
Total...Rs...			27,019 2 7
The net difference between the actual working expenses of the Shops and the amount recovered is thus...		Rs.	2,886 14 11

Notwithstanding the drawback which has been occasioned by the delay in the execution of some works at these shops, I am still of opinion that their existence is a great safeguard to the Corporation against excessive charges which would be made by competition in the market, if the Corporation was compelled to depend upon that source for the execution of the numerous and recurrent works which fall to the duty of the Municipal workshops to execute. Under the existing arrangement low prices in the market can be and are availed of, whereas without the Workshops to fall back upon the Corporation would be at the mercy of private individuals for carrying out all the repair works to the rolling stock of the various departments ; works the cost of which it is almost impossible to estimate before hand and which are very difficult to measure up after execution. The repairs to the rolling stock of the Health Department, the steam rollers of the Road Department, and the steam and manual fire engines of the Fire Brigade in themselves represent a large undertaking.

H.—GENERAL REMARKS.

CONTRACTS EXECUTED, RIGHTS SOLD, &c.

Contracts executed during the year 1890-91.

The following statement gives particulars of the contracts executed during the year 1890-91 for annual and other supplies and for the construction of various works :—

No.	Particulars of Contracts.	Names of Contractors.	Resolutions of the Standing Committee accepting tenders.	
			Nos.	Date.
	For Supplies.			
1	Petty stores	Messrs. Heptula Shaik Adam & Co....	7080	19th Feb. 1890
2	Hardware	Do. do. ...	7080	19th Feb. 1890
3	Timber	Messrs. Khimji & Kolah...	6644	5th Feb. 1890
4	Iron castings	Messrs. Richardson & Cruddas	7857	19th Mar. 1890
5	Coal and Coke	Messrs. Dadabhoy Hormusjee & Co. ...	6840	12th Feb. 1190
6	Road metal	Messrs. Fakirjee Pestonjee & Co.	Comr.'s No. 3567	27th May 1890
7	Sand stone, sand, shells and shingle.	Messrs. Vishnu Nursingrao and Tookaram Ranojee.	7387	5th Mar. 1890
8	Carts and bullocks, &c.	Messrs. Byramjee Jehangir & Co.	7388	5th Mar. 1890
9	Coke	Bombay Gas Company ...	3376	16th July 1890
10	Stoneware pipes, junctions, syphons, gully traps, &c., for the Agripada District	Messrs. Richardson & Cruddas	5685	16th Sept. 1890
11	Portland cement	Messrs. John Fleming & Co.	8055	11th Nov. 1890
12	Supply of fire hydrants	Do. do. ...	4504	13th Aug. 1890
13	Do. cast-iron pipes	Messrs. Ewart, Latham & Co.	10459	21st Jan. 1891

No.	Particulars of Contracts.	Names of Contractors.	Resolutions of the Standing Committee accepting tenders.	
			Nos.	Dates.
14	Turbine and Pumps for Malabar Hill Reservoir	Messrs. Ewart, Latham & Co.	420	16th Apr.1890
15	Asphalte at Malabar Hill Reservoir	Linner Asphalte Paving Company—Agents, Grindlay, Groom & Co.	709	23rd Apr.1890
16	Clothing for Water Works Sub-Inspectors	Messrs. H. Kassum & Co.	411	16th Apr.1890
17	Screens and iron work at Pawai ...	Messrs. Richardson and Cruddas	8839	3rd Dec. 1890
18	Steam fire engine, reel carts and appliances	Messrs. John Fleming&Co.	721	23rd Apr.1890
19	Street name boards	Mr. Sunkerao Baba Mandrupker	7186	22nd Oct. 1890
	For Works.			
20	Annual repairs, petty works, and supply of building materials ...	Messrs. Fakirji, Pestonji & Co.	7386	5th Mar. 1890
21	Filling low ground in the vicinity of Victoria Gardens	Mr. Ardesher Maneckji Vachagandhi	7079	19th Feb. 1890
22	Filling in the compound of Arthur Road Hospital, Municipal ground near Elphinstone Road and at the Victoria Gardens	Messrs. Framji & Jeewanji	8983	10th Dec.1890
23	Construction of pipe sewer in Victoria Cross Lane and branch pipe drains, syphons, gully traps, cast-iron and zinc ventilating shafts, &c., in Agripada District.	Mr. Sittaram Luxumon ...	5397	10th Sep. 1890
24	Construction of storm water drains from Churney Road, to Grant Road at Hornby Road Love Lane and Paidhowni	Messrs. Rahimtula Bhaijibhoy & Co.	7982	28th Mar.1890
25	Laying cast-iron pipes in Nagdevi and other places	Messrs. Bhedwar & Co. ...	7739	5th Nov. 1890
26	Laying cast-iron pipes at Warli and other places	Messrs. F. D'Jesus and Shapurji Hormusji ...	Comr.'s No 21007	21st Mar.1890

No.	Particulars of Contractors.	Names of Contractors.	Resolution of the Standing Committee accepting tenders.	
			No.	Date.
27	Construction of two sluice houses, flood channel below Pawai dam, masonry foundation for strainers at Pawai reservoir, outlet tower works and corrugated iron verandah and small Fitting Shop in front of Engine House... ...	Messrs. Hirji & Raoji ...	10462	21st Jan. 1891
28	Laying asphalte on floor of settling basin of the Malabar Hill Reservoir	Mr. Merwanjee Nowrojee...	1401	21st May 1890
29	Laying asphalte on floor of settling basin of the Malabar Hill Reservoir	Mr. Hormasjee Jivaji Desai.	1401	21st May 1890
30	Construction of quarters for the staff at Pawai Pumping Station;	Messrs. Hirji & Raoji ...	7858	19th March 1890
31	Erection of pumping machinery at Pawai	Messrs. Richardson & Cruddas	5760	3rd Jan. 1890
32	Covering floor and walls of filters at Bhandarwada (John Hay Grant) Reservoir with Indian Patent stone	Indian Patent Stone Company (Bird & Co., Agents)	11945	18th Feb. 1891
33	Repairing embankment for the Tulsi main between Mahim and Bandora...	Messrs. Framji & Jivanji...	8695	25th Nov. 1890
34	Lighting public streets with gas for 3 years	Bombay Gas Company.	Corpor. 3594	10th Sep. 1889
35	Lighting certain public streets with kerosine oil	Mr. Jungam Dharmajee ...	6642	5th Feb. 1890
36	Paving footpaths, laying water table stones, kerb stones, &c. ...	Mr. Sitaram Luskhman...	8056	11th Nov. 1890
37	Construction of a road in Sivri from Golangi Hill to Jakaria Bandar Road	Messrs. Amrita Babaji and Bhedwar Co. ...	4015	30th July 1890
38	Winding and repairing certain Municipal Clocks	Mr. Sorabjee Jamsedjee.	Comr.'s No. 12506	15th July 1890

The following list shows the leases of various rights for cutting grass, fishing in Municipal tanks, &c., sold during the year under report :—

Consecutive No.	Description of Right.	Period for which sold.	Sold to	Amount for which sold. Rs.	a.	p.
1	To cut grass from Municipal land at Vehar.	From middle of June to 31st October 1890.	Lalloobhai Nathuram...	490	0	0
2	Ditto ditto Tulsi.....	Do. ...	Muccoondrao Limbaji...	45	0	0
3	Ditto Vehar land, Tulsi pipe-line, &c.	Do. ...	Jao Antone DeMello ...	51	0	0
4	Ditto from pipe-line from Vehar to Bandora.	Do. ...	Nurmahomed Nanji ...	42	0	0
5	Ditto Bandora to Mahalakshmi.	Do ...	Ahmed Jusub	50	0	0
6	Ditto Ditto Vehar to Kurla.	Do. ...	Nurmahomed Nanji ..	50	0	0
7	Ditto from Municipal land at Bhandarwada (John Hay Grant) Reservoir.	Do. ...	Muccoondrao Limbaji...	28	0	0
8	Ditto from Municipal land at Malabar Hill Reservoir.	Do. ...	Gangaji Dhaku	20	0	0
9	Ditto ditto at Pawai ...	Do. ...	Behari Shiva Narayen..	350	0	0
10	Tapping cocoanut trees in the compound of the D Ward Office, Gamdevi Road, and gathering fruit from them.	From 1st Aug. 1890 to 31st July 1891.	Rama Visram	55	0	0
11	Tapping 20 date trees on Worli Road and Municipal ground at the Love Grove Pumping Station and palmtrees in the compound of Mr. Varjiwandas Madhavdas' bungalow at Worli.	Do. ...	Pema Kallup	30	0	0
12	To cut grass from Municipal ground near the south side foot-path of the Bellasis Road.	For 8 months from 1st Aug. 1890.	Dhaku Hansa	18	0	0
13	To cut grass from the Municipal ground near the foot-path on the east side of the Arthur Road and from the Agripada open drain from Agripada Milch Cattle Stable to Arthur Road Culvert.	Do. ...	Hassamia Balu	15	0	0

It will thus be seen that the correspondence work has increased about 82 per cent. within the last three years, the account work about 100 per cent. and the Inspectorial notices, &c., about 90 per cent. during the same period.

Thus, with an increase of work from 82 to 100 per cent. with, comparatively speaking, very insignificant increase in the establishment, it will readily be conceived what constant strain this Department has had to sustain to be able to get through the daily increasing work. The clerical staff has had over and over again to forego not only many of their well-earned holidays but even Sundays to enable them to cope with this heavy work. Notwithstanding this heavy work, it is but fair to notice, to the credit of the present management, that official business is conducted with greater expedition and method than it had been for some years past. There is also a marked improvement in the system of keeping accounts. Several new books and forms have been introduced and others improved at the suggestions of the Chief Clerk and Accountant and the account work of this Department has been conducted on a more satisfactory footing than in former years.

I am, however, working at a great disadvantage in these and several other improvements I should like to see introduced owing to this Department being considerably undermanned for the work it has to perform, and I have often to overlook cases of delays or inaccuracies, which under other circumstances would not be allowed.

I sincerely hope the Commissioner will see his way to allow this Department an increase in the establishment in the next year's budget to enable me to cope with the increased work.

I.—FIRE BRIGADE.

As in the year 1890 it was decided to raise the efficiency of the Fire Brigade, a short account of its more recent history may perhaps be desirable.

Prior to the year 1889 the establishment was under the administration of the Commissioner of Police for Bombay and its officers and men constituted members of the Police Force, whose services were utilized as Fire Brigade's men on the occurrence of a conflagration, but only the European members of the Brigade performed the duties of Police Officers, the Native portion of the staff being restricted in its duties as Fire Brigade only.

It was deemed necessary in the year 1887 that the European Police Officers attached to the Brigade should discontinue Police duty in order to allow them to carry out the duties of the Fire Brigade in a more efficient manner, and was accordingly carried into effect.

At this period the Fire Brigade establishment consisted of the following officers and men :—one Superintendent, three Engineers, and eighty-four Natives of all ranks.

In fulfilment of the scheme of organization the following changes and appointments were created :—

The present organization is :—

1 Chief Officer.
1 Superintendent.
6 District Foremen.
6 Engineers.
124 Natives of all ranks.

These changes have been subsequently partly carried into effect.

With regard to the condition of the appliances at this period, it was found necessary to incur considerable expense in making additions and renewals to them accordingly, as stated in Mr. Tomlinson's report for the preceding year. A budget grant was provided for an additional steamer, hose, &c., which were obtained from England ; and in addition to the above three fire escapes were also supplied.

On the whole it may appear that the expenditure was very heavy, but when we view the past it appears that the cost of appliances for a considerable number of years was abnormally low ; hence the general condition of the year was in a more or less deteriorated state, whereby it now becomes necessary to expend large sums as even yet much remains to be done in that direction ere the establishment can be brought to a state of thorough working efficiency. This will appear from the following facts :—

There are at present in the establishment 7 steam fire engines, 4 of which are of a pattern wholly out of date and the parts of which

have been, rom time to time, renewed as to leave but little of their original structure in existence ; moreover, their being kept in frequent use for periods of 25 and 23 years, the yare now in such a condition as to be deemed inadequate to sustain the pressure originally assigned for their working, such pressures now being restricted by the Boiler Inspection Act of Bombay ; further the old fashioned construction of the boilers is such that the shortest time in which a working pressure of steam can be raised is upwards of 20 minutes, whereas in the new engines a working pressure of steam can be easily raised from 8 to 10 minutes. This alone is a consideration of the highest importance and is manifested in the fact that in most cases the old engines arrive at the scene of a fire long before a working pressure of steam can be raised in the boilers, and when this is accomplished the reduced pressure assigned by the Boiler Inspector renders them less efficient in projecting powerful streams of water necessary when a large building is well alight. There are also in the service of the Brigade 7 manual engines, none of which are drawn by horses and which are all of a pattern more or less obsolete and too cumbersome for the Brigade men to handle, having, as they do, at times to encompass a journey of several miles before reaching the scene of a fire.

The first of these manual engines was procured for the use of the Municipality about the year 1840, and, although three others were purchased as recent as 1884, yet their type are the same as the one first procured.

These engines are only capable of delivering one small jet of water, and owing to their excessive weight and having to be drawn by hand, rarely, if ever arrive at the scene of a fire in time, to be of any practical use, as the men become exhausted before proceeding to any ordinary distance, whereby they have to rest and valuable time is therefore at times lost, and in 99 per cent. of instances one or other of the steamers arrive before the advent of the first manual, whence it must appear that the maintenance of this class of engine is an expense from which so little benefit accrues ; that the sooner they are abolished and lighter manuals of a more recent date or steamers are substituted for them, the better for the general safety of the City.

With regard to the fire escapes, they are of the old London pattern, none of which are in existence at the present time in the London Fire Brigade.

Their great weight, coupled with the fact that they have to be moved by manual labour, renders their rapid transit from place to place a matter of impossibility ; the lowest altitude that these machines can be moved along the road is such that frequent collisions with telephone wires take place, for at night, when they should be of the greatest service, it is impossible to see the wires overhead and on fouling a wire complications occur necessitating stopping the machine while a man

ascends and clears the wire from the head iron, and in the day time stoppages have to be made in order to dip the machine under the wires ; moreover, the greater number of the buildings in Bombay are so constructed as to render the pitching of such ladders as these quite impossible. Taking these discrepancies into consideration and the narrowness of a great number of the thoroughfares in this City, no confidence must be placed in these machines for life-saving purposes or for any use where speed in attendance and quickness in raising ladders to any great height are needed.

In consequence of these difficulties, I found it necessary to reduce considerably the length of the ladders, so that the structure might be brought under the control of a reasonable number of men, as well as obviate, as far as possible, the other difficulties. This has, of course, rendered the machines still less effective for life-saving purposes ; therefore, I would suggest the abolition of them, for sooner or later they will bring the Brigade into bad repute if relied upon, and I would futher recommend that the more useful and modern telescopic escapes of the pattern for which a budget grant has been provided be supplied in their place.

With regard to the existing stations, it would perhaps be difficult to select more suitable sites, with the exceptions of Duncan Road and Parel, the former of which is proposed to be removed to Bhuleshwar and the latter to Dadar.

The following is a description of the several stations at present existing in the Brigade :—

No. 1 Station is situated at Hornby Row, Fort, and is very badly adapted to our requirements, the station itself being situated on the western side of the buildings abutting the Esplanade and is reached by a private road. It consists of a tiled shed, which was originally used as a stable ; flooring of a very temporary character has been erected just beneath the tiles and is divided into small portions for the accommodation of most of the native staff, consisting of 15 men with their wives and families, the remaining portion being located on the ground level. The horses are also stabled in the same shed, which is very ill drained and worse ventilated.

The Foreman resides on the first floor of the house adjoining and which faces Hornby Row, part of these quarters being utilized as a store room for the Brigade.

The Engineer is located in a building, two doors from the Station, also facing Hornby Row.

No. 2 Station is situated at the corner of Gowalia Tank Road and Gamdevi Road and is a newly built structure ; accommodation is, however, required for the Engineer and several Lascars, the portion of the building erected for Native Quarters comprising only 8 rooms, whereas 4 more are required for the present staff and on the addition

of an escape an increase in the number of men will be necessary, when further house-accomodation will be required.

The Foreman is located in a Municipal building in the compound adjoining the station, of which the Engineer at present occupies a portion.

No. 3 Station is situated at the junction of Parel and Chinchpoogly Roads ; this is a newly built structure erected for Fire Brigade purposes, quarters being provided for the Foreman and 12 Lascars. None whatever are provided for the Engineer, who lives as near the station as he conveniently can. Several minutes' delay is therefore caused when turning out to a fire by this circumstance.

When other escapes are procured, one will be attached to this Station, when additional quarters for the Firemen will become necessary.

No. 4 Station is situated on the Parel Road, Byculla, at the Head Office of the Commissioner of Police and is Municipal property, having been established here when the Brigade was under the control of the Police, and since which time, there being no other accommodation, the old arrangement continues in existence. It was, however, decided in the year 1890 to erect a station at Sankli Tank in place of these quarters.

The Superintendent is at present located here in quarters over the engine-house.

The Foreman and Engineer reside in a house some three hundred yards from the station and detention is here necessarily caused when turning out to a fire.

There are 24 Native Officers and men attached to this station, the greater portion occupying quarters allotted to the Police situated in the compound of the establishment, others making shift as they best can in the engine-room.

No. 5 Station is situated at the rear of the Pydhonie Police Office, the engine-house being part of the Police building.

The Foreman is located in a Municipal building by the side of the station.

The Engineer is occupying rented apartments more remote from the station.

The horses are located several doors from the station, the stable being rented by the Municipality.

There is absolutely no accommodation here for the Native Staff ; therefore, they either have to sleep under or about the engines or pay house-rent themselves for such accommodation as they can procure near the station.

Here the delay, which necessarily occurs in answering a call of fire, makes it absolutely essential that this should be remedied as soon as possible.

No. 6 Station is intended to be erected at Colaba, when a suitable site can be obtained.

No. 7 Station is situated on Malabar Hill, near the reservoir, and is Municipal property, accommodation being provided for manual engine and 7 Firemen.

No. 8 Station is proposed to be erected on DeLisle Road, near Foras Road.

No. 9 Station, when erected, is proposed to be situated at Dadur, near Naigaum Tank, and the station at present situated at Parel will be abolished and the engine and men located as above.

No. 10 Station is at present situated in a hut adjoining the Police Chowkey at Mahim Bazaar. There is no accommodation whatever for the staff consisting of 7 men, who have to obtain their meals as best they can under the circumstances and sleep round about the Engine at night; it is, however, proposed to erect a station in its place at Mahim Municipal Gardens.

No. 11 Station, when erected, is propsed to be situated at Mazagon, near Pedder Markets.

No. 12 Station, when erected, is proposed to be situated on Buleshwar Road, corner of Parel Road, and the station at present located in Duncan Road will be abolished and the engine and men removed to the abovenamed station.

The distribution of engines and appliances are as follows :—

Station.		Engines.		Hose Reels.	Tenders.	Escapes.	Remarks.
No.	Name.	Steam.	Manual.				
1	Fort	1	...	2	1	1	
2	Gowalia Tank	1	...	3	1	...	
3	Chinchpoogly	1	...	3	1	...	
4	Byculla	1	1	2	1	1	
5	Pydhonie	1	...	2	1	1	
6	Colaba	1	...	2	1	...	These appliances are at present stored at the Fort Station.
7	Malabar Hill	...	1	...	...	...	
8	DeLisle Road	...	1	...	...	...	This engine is at present stationed at Chinchpogli.
9	Dadur	...	1	...	...	...	This engine is at present stationed at Parel.
10	Mahim	...	1	...	...	...	
11	Mazagon	...	1	...	...	...	This engine is at present stationed at Pydhonie.
12	Buleshwar	1	1	1	1	...	This engine is at present stationed at Duncan Road.
		7	7	15	7	3	

Delivery Hose.

There are at present in the establishment 335 lengths of canvas hose rubber-lined and each length fitted with instantaneous couplings of a pattern very favorouble to our work; the hose, however, in a climate such as India requires a considerable amount of attention to protect it from mildew and rot, especially during the monsoons, as there being no convenience for drying after it has been in use, it often remains wet for weeks together, which naturally deteriorates; this, however, will be greatly remedied when hose hoists are erected for drying purposes.

Then, again, the repairing process instead of rendering the hose more durable has considerably weakened it wherever it has been found necessary to repair a leakage, for, instead of a canvas patch being placed on the leak, it has been covered by a rivetted leather patch, the rivets cutting the fibre and naturally weakening the hose; this, however, I hope to overcome when the necessary articles are supplied for repairing purposes as are used in the London Fire Brigade, where a length of hose, when patched by a process of canvas and cement, lasts with ordinary wear for a space of 4 or 5 years; however it can never be expected for hose to survive such a lengthy period in this climate, as will be seen by a supply of hose in 1889, which is more or less unfit for heavy work.

Brigade Horses.

There are at the present time 14 horses belonging to the Municipality and attached to the Fire Brigade; they are of the waler class and most of them suited for the work. Several, however, are, although good horses for a light draught, in my opinion, too small for our work, as at times they refuse to collar when starting the engines, thus causing delay when turning out to a fire. Therefore, it is necessary that larger and more powerful animals of good breed be substituted for the smaller ones. There is also much room for improvement in the harness arrangement, which is very unsuitable for our purposes, for by its use much time is lost in turning out to a fire; this, however, I think can be obviated when other fittings are supplied from England, and for which a budget grant has been provided. With regard to the stabling arrangements, they are very inadequate excepting the new stations.

Brigade Uniform.

Hitherto the uniform supplied to the Brigade has been very inadequate for the requirements, none whatever having been supplied to the European Officers since their separation from the Police. The cost of the uniform supplied to the Native portion of the staff has been met by monthly deductions from their pay, but this uniform is quite unsuitable for the members of a Fire Brigade, where the feet and

head are so liable to injury, therefore it is highly essential that strong boots and suitable helmets be provided. This reform will be effected as soon as possible, as a tender for the supply of uniform has been accepted by Messrs. Cassum & Co., of Fort, Bombay.

Staff—European and Native.

At present the Officers of the Brigade are graded as follows :—

1 Chief Officer.
1 Superintendent.
6 District Foremen.
6 Engineers.

The Native Staff comprises—

14 Tindals or Native Officers.
97 Firemen of all ranks.
6 Coachmen.
6 Grooms.
1 Clerk.

Making a total of 138, including all ranks.

The staff of Europeans and engineers can be observed at once to be wholly inadequate to any emergency which is at all times likely to arise in our business, there being only sufficient District Foremen to take charge of steam stations, the engineers in charge of steamers being similarly situated. It is more often than not necessary to leave an European officer in charge of a fire after the engines have left, and it has been found necessary even to leave two in charge of a large conflagration ; this, of course, greatly weakens our staff, and were another large fire to occur their services would be seriously missed, especially as it is proposed that the Police confine their operations at fires to their legitimate duties in preserving general order, whereby the Brigade will have its work so much augmented as to make it, in my opinion, necessary that the European staff should be increased as early as possible, in order that they may pass through a course of training absolutely necessary to make their services efficient at fires.

Should steam stations become augmented, it will be necessary to strengthen the Native staff; and that more steam stations will be required, I have, after making an inspection of the island, become satisfied, the mill industry alone being one predisposing cause, and

although many of the millowners of Bombay have provided themselves with steam engines, yet it does not appear that any efficient staff has been appointed to take charge of them; hence they are rarely got to work in time to be of real service, and, in my opinion, the fact that these engines are in existence adds very immaterially to the safety of the establishments to which they belong and none whatever to the City at large, for even if they desired to render assistance they could scarcely do so at the most needed time, for no horses are kept for transporting the engines, therefore manual labour would have to be resorted to.

The class of Natives, I deem most desirable for Fire Brigade work, are such as have had some nautical training, for such training familiarises them with the usual and often dangerous positions into which it is necessary for Firemen to be placed; moreover they are of a better physique than the class of men at present employed, the latter often coming fresh from their native country are a long time ere they attain the requirements essential to a Fireman, and this I find instanced by a number of candidates who present themselves for service in the brigade declining to take up the appointment when asked if they will ascend the fire escape, the ladders of which are thrown for this purpose and many who make the attempt and reaching half the altitude of the machine visibly tremble so as to make it dangerous to allow them to ascend any higher ; however, I have to choose the best of these men for the establishment, as it is impossible to secure the services of sea-going men owing to the rates of pay not being high enough to tempt them to enter the service.

Water Supply.

The efforts now being made by the Municipality to bring into Bombay a constant supply of water will undoubtedly be a great boon, especially for fire-extinguishing purposes, for the supply being at present intermittent, means that when a fire occurs in a portion of the area when the water is being delivered elsewhere, that the sluice-cocks have to be closed and others opened to direct the water to the scene of its requirements and, owing to the unavoidable delay, a small fire at times assumes serious proportions, resulting in a large conflagration as instanced on several occasions of comparatively recent dates.

Up to the month of December 1890, it was for many years past the practice to enlist the services at fires of bullocks and hand-bhisties to aid in bringing a supply of water from wells and other sources and considerable expense has been incurred in remunerating them for their services, and though the employment of these persons may in times past have been of some value, yet I am of opinion that their services are no longer needed, owing to the augmentation of the Fire Brigade Staff and appliances, therefore it has been discontinued from the abovementioned date.

Intercommunication.

This is a subject where there is much room for révision, for although we are in a sense in telephone communication, yet the instruments are so placed in some cases that dependence has to be placed in the Police for information ; this, however, could be rectified by the removal of the telephones to more convenient places, but I do not recommend that this course be adopted until the erection of other stations.

The instrument situated at the Fire Brigade Station on Malabar Hill I consider inadequate to the requirements, as so much depends at times on the rapidity of a message being sent for the timely manipulation of the sluices, that, should a contact or other breakage in the line of communication take place at a critical moment, the consequences might be of a serious nature, and this being the only means by which a message can be received quickly, for that purpose I would recommend that a Telephone be established between the Exchange and the dwelling of the Officer in charge of the reservoir as soon as possible.

I also deem it necessary that a separate exchange be devoted to the exclusive use of the Fire Brigade and sluice stations, as it is often very difficult to effect communication owing to interruptions by other persons on the existing lines.

I would also propose that when the new stations are completed and the Brigade properly housed, that a system of Fire Alarm call-points be adopted throughout the City and Island, which will greatly decrease the delay at times caused by the distance which has to be traversed before a first alarm of fire can be given, and in the advent of a constant supply of water in the mains, Firemen and appliances can be stationed at alarms placed between intermediate stations in the City, by which means a greater security against large conflagrations will be given.

Report of Fires for the year 1890-91.

The Fires of 1890-91, compared with those of 1889-90, show an increase of 32, or, compared with the average of the past 10 years, an increase of 57.

The number of calls to fires during the year has been 120 ; of these 31 resulted in serious damage and 89 in slight damage.

The estimated damage to property during the year has amounted to Rs. 22,92,675-10-0, showing an increase of Rs. 30,554-8-0 as compared with the preceding year ; the fires, however, which took place in the early part of the year at the Nicol and Gordon Mills, which involved the almost total destruction of both buildings, engulfed the greater amount of loss, the former being estimated at Rs. 8,00,000 and the latter at Rs. 12,00,000 damage.

Monthly Summary of Fires for the period 1881 to 1891.

J.—PUBLIC GARDENS.

1. The undermentioned Gardens have been maintained for public use:—

(*a*) Victoria Gardens.

(*b*) Northbrook Garden.

(*c*) Falkland Road Garden.

(*d*) Dick's Tank Garden.

(*e*) Elphinstone Circle Garden.

(*f*) Bazaar Gate Garden.

(*g*) Sir Kavasji Jehanghir Garden, Mahim.

(*h*) Malabar Hill Reservoir Garden.

2. All the gardens have been extensively frequented by the public and seem to command general appreciation.

3. All the more important works of remodelling the Victoria Gardens having been completed before the beginning of the year under report, only minor works of improvement remain to be taken in hand. It has thus been possible to pay more attention to the general maintenance of the garden and to details. Though the results thereby obtained have been such as to prove very attractive and to present a vast improvement of the conditions existing previous to the remodelling of the gardens, it must, however, be regretted that the proposal made in the budget estimates for the ensuing year, for laying out the recently acquired land for extension of the gardens, was by a small majority rejected by the Corporation, so that the land in question, which is low-lying, uncultivated and flooded during the rains, will still remain a serious eyesore which cannot but mar the general effect of the gardens.

The revenue derived from entrance fees during the year was as large as could be anticipated and would undoubtedly have shown an increase from year to year, had it been continued.

By the Corporation's Resolution No. 12034 of 19th February last, it was however altered as follows :—

Mondays, Tuesdays, Thursdays and Saturdays free.

Wednesdays and Fridays 2 annas for each adult, and one anna for a child below 12 years.

Sundays 3 pies per head for adults and children.

This arrangement was brought into force from the 26th February, and judging from the amount realized during March, the probable revenue derived from this source will amount to about a third of that

taken under the previous arrangement. A circumstance which was presumably overlooked, when this arrangement was resolved that Wednesday is the one day of the week when the Museum is closed, is not favourable for a substantial revenue on that day. From the returns it will also appear that the number of visitors on Sundays after the new arrangement has not as yet in a single instance reached to one thousand, the average number of visitors on free days being about 2000.

According to your desire to that effect, the whole of the clerical staff, all being Christians, joined the Municipal Company of the Volunteer Rifles and have, whenever possible, had leave to attend drills, parades and shooting classes.

Regarding the zoological collection, this is slowly but steadily improving. The new cages mentioned in last year's report seem too highly suitable for the tigers, but several fatalities have occurred among the panthers housed in one of these cages, the reason probably being the want of sufficient shelter against the northern winds, the autopsy of the dead animals proving diseases of the respiratory system to be the cause of death. The bear cage, for which the foundation was built in the preceding year, had been almost completed at the end of the year and is certain to prove a great attraction to the garden. This cage was, it will be remembered, built at the expense of the Tramway Company, of whose donation of Rupees ten thousand a considerable balance still remains unexpended. A small octagonal cage intended for housing small mammalia and presented by Jalbhoy Ardaseer Sett, Esq., has been erected, while a large aviary for aquatic birds, the present of Sir Dinshaw Maneckjee Petit, is still under construction. A further donation of Rupees four thousand from H. H. the Maharaja of Bhownuggur still remains unexpended. Of presentations of animals and birds, a great many have been received from the Natural History Society. Two tame Himalaya bears and a wolf were presented by Captain Pollard, A. V. S., Bhopal, and a Bactrian dromedary by Mr. Fillis, while a number of small deer, monkeys, birds, &c., have been received from various private gentlemen and ladies. The crocodile enclosure, mentioned in last year's report, proved unsuitable for the purpose as the crocodile escaped and was killed, and no use has as yet been made of the structure. The ostriches were shifted from their old unsightly quarters at the back of the garden to a new and spacious enclosure, including an extensive lawn bordered by shrubberies. In this a neat shed with tiled roof was erected. A spacious shed was also erected in the deer park, affording full protection for the deer during the monsoon and at night. It has been necessary at times to separate certain of the stags by the aid of smaller enclosures; but, notwithstanding all precautions, several fatalities have occurred by the fighting of the deer.

The new ornamental lake, bordering on the deer park, was connected with the previously existing parks of ornamental waters, by a nine-inch earthenware pipe in order to retain an equal level and

prevent overflowing during the monsoon. The lake itself has been very attractive, specially during the monsoon and early part of the cold weather when adorned with numerous flowers of dark, red and white water lilies of extraordinary size and beauty.

The south-western corner of the gardens, reclaimed by filling in the tank facing Parel Road was suitably laid out turfed and planted during the year, and now presents a very pleasing appearance.

The banks surrounding the snake-pit were planted with choice and showy shrubs and plants, which have greatly added to create a harmony with the surroundings.

The ornamental border, surrounding the lawn at the entrance of the gardens was widened and entirely remodelled, now forming a continuous carpet bed, containing twenty-four various original designs, and has proved an object of great attraction to the visitors of the gardens.

The large circle has now become almost the centre of attraction in the gardens. When the pavilion used for last year's flower-show was demolished, the terraced banks were retained. These have been kept constantly filled with flowering and foliage plants in pots. While the fountain basin in the centre has been kept embellished with palms and other graceful plants, and the intervening space has been laid out with groups of plants in a manner which has been greatly admired.

The fountain in front of the clock tower was considerably improved by replacing the old ineffective jet by a new powerful jet fed by a 9" pipe.

The flower-beds and borders have been well kept up during the year and proved very attractive. Several new flower-beds were laid out and the show of flowers, principally of annuals, seems to be improved from year to year.

The collection of plants was as usually added to, chiefly by purchase. Among the plants acquired from England a very fine collection of caladiums and of chrysanthemums have proved most valuable additions. A large number of chrysanthemums were also raised from seed procured from France, among which a great number produced handsome and showy flowers. A consignment of flowering bulbs and roots was procured from Holland. Out of these, a few hyacinths came in flower but were very poor; tulips proved a complete failure; jonquils and tazettes did fairly well, while lilies of the valley and spiræas were most succesful and produced a beautiful show of flowers quite equal to flowers produced in England. From Japan a number of lily bulbs were acquired, which promise very well; also a collection of Japanese chrysanthemums, which have not as yet flowered, a collection of Japanese maples, which seem rather delicate, and a collection of fancy varieties of bamboos, which promise exceedingly well.

It is a pleasure to me again to acknowledge the valuable assistance I have had from the Foreman, Mr. Pinto, and the clerical staff, and the gradual improvement in the efficiency of the labouring staff.

4. The other Municipal gardens have been maintained in their usual order. The remodelling of the Northbrook Garden, according to my design sanctioned by the Commissioner, was commenced at the end of the year and half of it completed, presenting a very attractive appearance. The fountain in Elphinstone Circle Gardens was altered in a similar way as that in the Victoria Gardens. With reference to Bazaar Gate Garden, I beg to call renewed attention to my remarks in last year's report.

5. The budget allowances and the expenditure incurred during the year for the several gardens are shown in the following statement :—

	Name of Garden.	Total amount sanctioned.	Expenditure.
		Rs. a. p.	Rs. a. p.
(*a*)	Victoria Gardens	93,741 2 11	77,888 7 1
(*b*)	Elphinstone Circle Garden	4,564 15 6	4,322 10 7
(*c*)	Falkland Road Garden	807 11 9	508 14 8
(*d*)	Northbrook Garden	2,115 12 1	1,862
(*e*)	Sir Kavasji Jehangir Garden	513 0 0	452 15 4
(*f*)	Bazaar Gate Garden	973 10 3	877 5 0
(*g*)	Garden on the Flats	1,506 0 0	1,004 12 7
(*h*)	Dick's Tank Garden	321 1 11	230 4 11
(*i*)	Malabar Hill Reservoir Garden.....	668 0 0	656 14 1
	Total... Rs.	1,05,211 6 5	87,804 8 8

K—THE VICTORIA AND ALBERT MUSEUM.

1. In the division of Natural History several additions were made during the year. The following specimens were added to the department of Mammals :—Three dead panthers, *Felis pardus*; one dead sloth-bear, *Melursus ursinus* ; one white-fronted lemur, *Lemur albifrons* ; one dead palm-civet, *Paradoxurus niger* ; one dead Kangaroo, *Macropus major* ; three dead gazelles, *Gazella Bennettii* ; one dead black buck, *Antilope bezoatica* ; one skull of the striped hyæna, *Hyæna striata* ; and one Indian Mungoose, *Herpestes mungo*. These specimens excepting the Indian Mungoose, were all received from the Superintendent, Victoria Gardens. The panthers, bear, gazelles, and lemur had their skins cured and preserved at the Museum and their bones were prepared for mounting purposes.

2. The department of Birds received the following additions :—

Three Indian screech owls, *Strix javanica* ; two sparrow-hawks, *Accipter virgatus* ; one king-fisher, *Halcyon smyrnensis* ; one spur-fowl, *Galloperdix spadacous* ; one pond heron, *Ardeola grayii* ; one flamingo, *Phœnicopterus roseus* ; one painted partridge, *Francolinus pictus* ; and two young ostriches, *Struthio camelus* ; all from the Superintendent, Victoria Gardens. Some of these that came to us in good order were preserved and stuffed, while in the case of others the bones were prepared for mounting purposes. The additions made by purchase consisted of one pied hornbill, *Hydrocissa coronota* ; two great horn-bills, *Dichoceros homrai* ; one demoiselle crane, *Anthropoides virgo* ; one black adjutant, *Ciconia nigra* ; and one white adjutant, *Ciconia alba* ; along with twenty-four other skins of smaller birds. All these were stuffed and mounted at the museum.

3. In the department of Reptiles the following specimens were received :—

One ground lizard with a tri-coloured gular appendage, *Sitana ponticeriana*, from Lonowlie; two rat-snakes, *Zameniz mucosus*, from the Superintendent, Victoria Gardens ; two carpet snakes, *Lycodon aulicus*, from the Deccan ; three cobras *Naia ripudians*, two by purchase and one from the Superintendent, Victoria Gardens ; two Phursa vipers, *Echis carinata* ; one Russell's viper, *Vipera Russellii*, from Bandora ; and two green tree-snakes, *Dryophis mycterizans*, from Khandala. The skin of one of the cobras was preserved and dried with the hood expanded. The other specimens were all preserved and mounted in spirits of wine.

4. No important addition was made in the department of fishes excepting a few specimens of some of the common varieties.

5. In the department of Entomology were received four specimens of the butterfly, *Kallima albofasciata*, six of the species *Junonia*

lemonias, and eighteen other specimens representing four different varieties, all from Khandala and Lanowlie ; also two specimens of the beetle *Saperda calcarata*, as well as a small quantity representing several other species.

6. To the department of Geology were added ten specimens of soils, and seven maps, from the Konkan ; thirty-one specimens of soils, and ten maps from the Deccan ; ten specimens of soils from Khandeish, and nineteen maps from the Photo-zinco Department, Poona ; twenty-one specimens of soils, and seven maps from Gujarat ; and two specimens of soils and two maps from Sind. These specimens were all collected under the direction of the Survey and Settlement Commissioner, Bombay, and were received into the Museum agreeably to your memorandum No. 1949 of the 2nd May 1890, on letter No. 1692 of the 29th April 1890, from the Under-Secretary to Government in the General Department.

7. In the division of Anthropology the department of Ethnology, received the following additions :—

Two swords, one dagger, six hunting-knives, eight spear-heads and five bundles of arrows. These specimens were exhibited by H. H. the Dewan Saheb of Palunpur at the Bombay Art Society's Exhibition held in March 1890, and at the close of the Exhibition were presented to the Museum.

8. The department of Numismatology received one gold coin of Aurangzebe, from the Amraoti District ; one silver coin of Aurangzebe from the Amraoti district; five silver coins called *gadhia*, from Chopda, in Khandeish ; and four copper coins, three bearing the name Ahmednugger, found in Nassick ; and one of a Mahomedan dynasty, found in Belgaum. All the above coins were received from the Bombay Branch Royal Asiatic Society, agreeably to the resolution of the Government of India No. $\frac{46}{1668\text{-}82}$ of the 9th October 1884.

9. To the department of Artware there were added by purchase one silver address-case ; two Trichinopoly bracelets ; one attardani (otto-holder) ; and one Indian lota. Also by presentation from H. H. the Dewan Saheb of Palunpur, one velvet screen ; one highly carved walled bracket ; and one photograph frame. These specimens were exhibited by H. H. the Dewan Saheb of Palunpur at the Bombay Art Society's Exhibition held in March 1890, and at the close of the Exhibition, were presented to the Museum.

10. All the departments of Natural History had the usual attention paid to them during the year. Three small mammals were skinned, stuffed and mounted, and the skins of four others were cured and preserved, their bones also were prepared for mounting purposes. Forty-one specimens of birds were skinned and stuffed

and sixty-five more skins were stuffed and mounted. The specimens of reptiles and fishes were all examined from time to time, and, where necessary, the spirits of wine was changed. Fourteen new specimens were preserved and mounted in spirits of wine. The collection of butterflies, moths and beetles, was also looked into and was freely supplied with preservatives.

11. In the division of Anthropology the specimens of textile fabrics were occasionally taken out and examined, and their cases were frequently supplied with preservatives. The specimens in the other departments had also due attention paid to them to keep them in good order.

12. The want of scientific books referred to in my annual reports attracted the attention of your predecessor, E. C. K. Ollivant, Esq., C.S., C.I.E., and through his kindness we have been enabled to purchase a few of the standard books, to be used as works of reference. We have also just made a beginning with the printing of our labels at the Museum and during the year a large number of our specimens were classified, identified, and supplied with printed labels. This undertaking has considerably increased our work.

13. During the year under report the Museum was frequently visited by students from almost all the colleges, especially when the examinations were being held. The medical students come to study our drugs ; and the students of Biology for the sake of our marine specimens. The students from the Veterinary College have also visited the Musuem on one or two occasions with their teachers. The skeletons of wild animals formed their chief attraction. The students from the College of Science, Poona, also come to the Museum from time to time, especially for the sake of our Geological collection, which has been re-arranged. One or two of the professors and teachers of Chemistry from private colleges, as well as headmasters from Government and other High Schools have also visited the Museum to study our collection of metal ores and other Mineralogical specimens. And the managers and agents of some of the local trading firms occasionally visit the Museum to take notes of the names of the specimens, and of the localities in which they are obtained. This refers especially to the specimens of raw products, and of industrial arts. Two or three of them have also written to ask information with regard to certain raw products, and their requests were complied with in due time. The interest taken in the Museum by the public speaks for itself.

14. A statement showing how the annual and special grants were utilized will be found in Appendix A at the end of the report.

15. The Museum was open to the public for 313 days during the year. The visitors numbered 4,14,184 averaging 1,323 daily.

APPENDIX A.

Statement showing how the annual and special grants were utilized.

Natural History Grant.

		Rs.	a.	p.
1.	Spirits of wine and other preservatives	400	0	0
2.	Preparing and mounting skeletons	95	0	0
3.	Napththaline, benzine, turpentine, &c.	139	0	0
4.	Natural History specimens	80	0	0
5.	Miscellaneous work, &c.	58	10	0
	Total ... Rs.	772	10	0

Grant for Cases.

		Rs.	a.	p.
1.	Materials and labour for repairing old cases	94	3	0
2.	Polishing old cases, &c.	91	5	0
3.	Perches and stands for birds, &c.	75	0	0
	Total ...Rs.	260	8	0

Artware Grant.

		Rs.	a.	p.
1.	Silver-work	317	14	3
2.	Miscellaneous artware	34	0	0
	Total ...Rs.	351	14	3

Special Grant.

		Rs.	a.	p.
	Scientific books of reference	686	6	0
	Total ...Rs.	686	6	0

PUBLIC HEALTH.

1. REPORT of Dr. T. S. WEIR, MUNICIPAL HEALTH OFFICER, forwarded with his No. 13182, dated 17th July 1891.

2. REPORT OF THE SUPERINTENDENT OF LICENCES, forwarded with his No. 1596, dated June 1891.

3. REPORT of the SUPERINTENDENT OF MARKETS, forwarded with his No. 359, dated 15th May 1891.

4. RETURN OF STREET ACCIDENTS, forwarded by the COMMISSIONER OF POLICE, with his No. 3393-6, dated 13th May 1891.

1.—REPORT OF HEALTH OFFICER.

2. The abnormal conditions of a scanty rainfall in 1888 and 1889 were accompanied by unfavourable conditions of the public health and an increased mortality in the beginning of 1889 and an increasing number of stranger immigrants and a high fatality amongst these strangers.

	Number of Deaths.		
	1888.	1889.	1890.
Born in Bombay	11,154	11,128	10,041
Strangers	11,063	12,071	10,340
Unknown	204	179	153

3. The influence of abnormal conditions of season on the public health I have had frequently to examine, and in the past year a scanty rainfall in the season before excited apprehensions of a water-famine in this city, and to prevent that calamity, a dam was built at Pawai, and a new supply of water, now called the Pawai, formed. The quality of this new water-supply I had to give an opinion on. The question was practically this :—Was it better to drink a water not very impure and to save the water in Vehar and Tulsi Lakes for the hot season or to drink afterwards in the hot season water from Vehar and Tulsi—very impure ?

4. In February the following questions were put to me :—

1*st*.—Opinion as to the quality of the water which the Pawai Reservoir may be expected to supply, regard being had to local circumstances (*a*) that the catchment area and submerged land have been inhabited and (*b*) that fevers and cholera have generally prevailed in the district in which the catchment area and basin are situated.

2*nd*.—Opinion as to whether Pawai water may be delivered unfiltered to the city during the next season without proving injurious to public health, and if not, whether filtration will be sufficient.

5. I gave the following reply :—

1*st*.—The Pawai water will not be less impure than the water from Tulsi.

(*a*) The precautions taken, when the Tulsi water was at first delivered, to run the water off will have to be taken before the Pawai water is supplied.

(*b*) The filtration of the water so that the results in Albuminoid Ammonia will not be more than ·13 per million.

(*c*) The complete combustion of all refuse and grass and all that can retain impurities on the gathering ground.

(*d*) The removal of dwellings and of cattle and of all sources of pollution from the gathering ground.

2*nd*.—The complete filtration of the water is of the greatest importance, and unless the water is filtered to the degree I have indicated, it will not be a wholesome water-supply. Should a serious scarcity of rain occur, the first precaution I have mentioned could not for any time be continued. We can scarcely realize the calamity of a water-famine. Rules will be paid little attention to by the people. Should a serious scarcity of rain not occur, I am strongly of opinion that all the precautions I have described should be fully taken. These precautions are to briefly mention them again :—

(*a*) The purification of the ground on which the water will be collected and over which the water will flow.

(*b*) The distribution of the water at first for other purposes than human consumption.

(*c*) The complete filtration of the water for human use.

6. An analysis I made of a sample taken on the 29th June from Pawai Lake gave the following results :—

	Parts per Million.
Free Ammonia...	·01
Alb. Ammonia...	·18
	Grs. per Gallon.
Chlorine	·9

i.e., on the 29th June before the rains had well commenced, Pawai water was better than either Vehar or Tulsi would be in the hot season. This was satisfactory. On the 5th July the results were :—

	Parts per Million.
Free Ammonia...	·03
Alb. Ammonia	·15

7. Owing to rain and the use of the sludge pipe early in July, the Pawai water contained as little organic matter as Vehar and less than Tulsi. The results of the examinations were very favourable. The water was good enough in my opinion to be distributed unfiltered.

8. I suggested that during the rains Vehar water should be saved and as carefully distributed as possible up to the end of the rains, for it was possible that after the rains the Pawai water would not be so good as it was. The vegetable matter was then small, but as the water in the Lake fell it would increase.

9. The water was of better quality than I expected. I ascribed this to—

(*a*) the heavy rainfall;

(*b*) the use of the sludge pipe;

(*c*) the precautions taken before the rains to remove causes of impurity.

10. My last examinations showed the water to be of fair quality, judged by the standards of Vehar and Tulsi.

Pawai.

	Parts per Million.
Free Ammonia	·04
Alb. Ammonia	·13

Goper.

	Parts per Million.
Free Ammonia	·035
Alb. Ammonia	·15

11. Towards the end of August I was of opinion that the water could safely be delivered. The results of examinations of the filtered water were good. Even if the water had been more impure so great was the necessity of the Vehar Lake being well filled before the end of the monsoon, I should have recommended its use. Pawai water was four times more pure than Tulsi when Tulsi was first used, and it was even more pure than Vehar had been during the last hot season. It was of the greatest importance to the public health that the Vehar supply should be improved, and it could be improved, by allowing the lake to fill and by using at this season Pawai water, when Pawai water can most safely be used. On the 10th September, as the water in the Pawai Lake was less, and as I noticed an increase in the vegetable matter suspended in the water, I recommended that the distribution of unfiltered Pawai water be stopped and that Vehar water be again distributed.

12. The question at that time was simply this: Was it better to drink Pawai water as good as Vehar and better than Tulsi than to drink more impure, even dangerously impure, Vehar and Tulsi water in the next year? The result has shown that the opinion you came to was right and the best opinion in the interests of the public.

13. From absence of drainage the position of Malabar Hill is very serious. The population has increased very much. So long as the population was scattered the absence of drainage was not observed and it did not cause serious nuisances, but now that buildings are close, serious nuisances have arisen from cesspools and these nuisances cannot be abated. The population is now much greater than in 1881, and yet for an increasing population, drainage to remove the liquid refuse and to remove the water brought in pipes has not been constructed. By Malabar Hill I refer to Walkeshwar—for so the Registration district of Malabar Hill is called. To remove the liquid refuse from cesspools the following establishment is given :—

Carts	5
Bhungees	21

I need scarcely say that this establishment cannot remove every day all the liquid refuse and water distributed to a population estimated in 1881 to be 11,303. Some of the residents wish that the cesspools of their residences should be cleaned every day and others object to any portion of the refuse being used for watering the gardens. It appears to me that the time has come when the residents must be distinctly told that the cesspools cannot be cleaned every day. The amount of cleaning necessary may be taken as the amount of water delivered, *minus* the amount lost in waste. The establishment given can only remove a portion of this refuse. Moreover, I look on the removal of all liquid matters by carts and by hand as impracticable. The only practical solution is the construction of drains for the removal of the liquid refuse now received and collected in cesspools. As the completion of a drainage system will in any case take time, I suggest that the storm-water channels be cemented and used as drains.

14. Section 393 of the Bombay Municipal Act enacts that "no "person shall, without the written permission of the Commissioner, use "or employ in any factory or any other place any steam-whistle or "steam-trumpet for the purpose of summoning or dismissing workmen "or persons employed." A great and serious nuisance has been caused for years by the steam-whistles used in mills. It never seemed to me right that in mills, more than in any other places where labour was employed, steam-whistles, should be used to call labourers to work. The first point that had to be ascertained was as to whether steam-whistles were necessary, and inquiries were commenced, and we ascertained that a number of mills—of very large mills too—did not use steam-whistles but used bells, and we also ascertained that some mills commenced to whistle and to disturb the night by 4 o'clock. There are steam-whistles and steam-whistles, the soft-toned ones might perhaps have been suffered, but others—in shrillest and most discordant screams—startling the night, startling the sleeping, when sleep is soundest, were an intolerable nuisance. Some of these steam-whistles could be heard from one side of the island to the other. The comfort of people living near the mills was seriously affected, while the repose

of the whole city was disturbed by sudden screams and blasts—let forth to cause the greatest disturbance. I proposed the following conditions in giving permission to use steam-whistles :—

1*st*.. The whistle or trumpet shall not be used before the hour of 5-30 o'clock a. m. for the purpose of summoning workpeople.

2*nd*. It may be used to intimate the interval during the day allowed for meals, but only if the whole of the machinery is stopped.

3*rd*. It may be used to intimate the hour of dismissal of workpeople and stoppage of the machinery in the evening at any hour not later than 6-30 o'clock p. m.

4*th*. The period of sound shall in no case exceed 10 seconds.

15. I now proceed to examine the incidence of the mortality. The deaths by place of birth approximate more closely than in 1889. 10,041 were born in Bombay, and 10,340 elsewhere. We observe under epidemic febrile influences an increase of deaths both amongst Bombay-born and strangers in March and a fall in April. In March the deaths amongst Bombay-born rose to 450 and amongst strangers to 460.

RETURN SHOWING THE NUMBER OF DEATHS ACCORDING TO PLACE OF BIRTH IN 1890, EXCLUSIVE OF STILL-BORN.

Months.	Bombay.	Elsewhere.	Unknown.	Total.
January	759	1,048	14	1,821
February	733	913	14	1,660
March	1,183	1,373	23	2,579

Total...	10,041	10,340	153	20,534

16. Analysing the mortality by the chief death causes, we observe a decrease from small-pox, measles, cholera, diseases of the respiratory system, diarrhœa, dysentery, and an increase from fevers, phthisis, diseases of the nervous system, and accidents; therefore notwithstanding an epidemic of influenza, the mortality from the chief death causes has been less than in the year before and the public health has been better. This could scarcely have been anticipated in the week ending 11th March when the death-rate rose to 38·45.

RETURN SHOWING THE NUMBER OF DEATHS FROM DIFFERENT CAUSES IN 1890.

Causes of death.	Number of Deaths.	Rate per 1000 of Population.	REMARKS.
Small-pox	150	·18	These calculations are based on the approximate Census returns of 1891.
Measles	179	·22	
Fever	6,489	8·01	
Cholera	102	·12	
Phthisis	2,728	3·37	
Diseases of the Nervous System	1,936	2·39	
Ditto Respiratory System	3,335	4·12	
Diarrhœa	905	1·12	
Dysentery	507	·63	
Accidents	397	·49	
All other causes except Still-born	3,806	4·70	
Total...	20,534	25·35	

17. As in the previous year the mortality of male children under one year is higher than of females; while from one to four the mortality of females is higher; from 5 to 40 more females than males died. During the nubile period, between 12 to 40, the female mortality is 6·5 higher than the male. The high female death-rate at these periods is suggestive.

RETURN SHOWING THE DEATH-RATE AT DIFFERENT PERIODS OF LIFE IN 1890.

20. Amongst all the great classes of the population there is a reduction of mortality ; the lowest mortality is registered amongst Europeans 18·56 ; then follow Native Christians with a mortality of 19·31 ; Parsees 21·11 and Brahmins 22·27. These are very low

death rates. The mortality of the great mass of the Hindoo population is as low as 23·89. In the following return the mortality in these classes in 1889 and 1890 is contrasted :—

Classes.	1889.	1890.
Europeans	20·66	18·56
Native Christians	21·94	19·31
Parsees...	22·88	21·11
Hindoos (other than Brahmins, Bhatias, Lingaets and Jains)	28·02	23·89

RETURN SHOWING THE NUMBER OF DEATHS AND THE RATE OF MORTALITY AMONGST DIFFERENT CLASSES IN 1890.

Classes.	Population by Census of 1881.	Number of Deaths.	Per 1000 of Population.
Jains	17,218	852	49·48
Brahmins	35,428	789	22·27

Total...	773,196	20,534	25·35*

* This calculation is based on the approximate Census returns of 1891.

21. In the table following the mortality in four great classes of the population is shown. It will be observed that the health of each class compares favourably—considering that an epidemic of influenza passed across the city—with many years in the past. These calculations, be it remembered, are made on the population of 1881. The fatality in each class is less than in the year before. It will be observed that the European mortality since 1881 has very much improved; since 1881 the European mortality has only once been as high as 20 per 1000.

Return showing the Total Number of Deaths and the Rate of Mortality in the following Classes since 1877.

Per 1,000 of Population.

22. *Mortality by districts.*—The section of highest mortality is Parel. The section of highest mortality in the two previous years was also Parel; a district on the south of Parel (Byculla) has the 3rd highest mortality; and a district adjoining it (2nd Nagpada) has the 2nd highest mortality. In these three districts we have conditions that lead to common results,—impurity of the soil and air, foulness from imperfect drainage and absence of drainage. There has been in Parel and Byculla a great expansion of population, but when that expansion has been estimated, it will still be found that there is in these districts, in these suburbs, open and even yet, except in groups, not crowded, having much open ground, a great loss of life—a great excess of mortality which should not and need not be. In Parel and Byculla nuisances from pools of sewage, where there are no drains, or where there are drains but no connections made, poison the air and soil and offend the senses,—pollutions amidst dwellings and around the district, pools of sewage polluting ground and air and oozing to lowest levels. Outside the wall of the ground set apart for the Small-pox Hospital water sewage laden flows from chawls newly built. One portion of Byculla (Agripada) a new town-sewage from the buildings flows to the lanes and from the lanes to lower ground and to ditches. The condition of Parel and Byculla is but the condition of all the suburbs, lamentable as it is. Even within sight of the Municipal office, there is a street (the Colaba Causeway) which has no drains and all the drainage and all the water brought in pipes has to flow into cesspools and to pollute the ground, for it is hopeless to attempt to remove in carts all the water brought in pipes; further north near the Chinchpoogly station, there is a ditch of sewage which I described in the last Annual Report; that ditch is still festering and corrupting; further north, by the side of the Tulsi water-pipe, a pond of sewage from a mill; to the east, horrible collections and pools of sewage; from Ghorapdeo, where sewage has much abounded, oozing to lower levels—trenches in positions of most offensiveness had to be dug by the Health Department and by the side of the public street—sewage has to be lifted in buckets from side trench to side trench, or the public road will be flooded.

23. The mortality also indicates the conditions in each district hostile to health. We have in each section a mortality from diarrhœa about twice the general fatality for the whole city, and we have in each section a mortality from fevers ascending from 10·11 in 2nd Nagpada to 20·85 in Parel—far over the general rate for the city. We have a difference in the types and incidence of fatality as we have different developments of insanitary conditions in each section. In 2nd Nagpada, where we have the greatest house-crowding, as many as 67·18 persons collected in—15 families to each house—each crowded dwelling, we have a mortality from phthisis more than twice the mortality in Byculla—nearly twice the mortality in Parel and more than twice the average mortality in all the other sections of the city and a fatality from diseases of the respiratory system twice the fatality in the whole city. In 2nd Nagpada the pressure of population is greater than in the most crowded and dense

section of London. The extreme pressure in London is 222 persons to an acre, whereas in 2nd Nagpada it rises to 469.

Causes.	2nd Nagpada.	Byculla.	Parel.
Fevers	10·11	12·15	20·85
Phthisis	8·92	3·35	4·47
Respiratory diseases	8·54	7·48	7·65
Diarrhœa	2·83	2·05	2·96

24. In Nagpada we have a population in densest aggregation and imperfect drainage underneath the ground, such as we have in most of the old portions of the city built by waterways and channels rudely constructed and now built over.

* This calculation is based on the approximate census returns of 1891.

25. *Measles.*—The mortality from measles is favourable and much below the average; 179 deaths were registered, being 459 less than in the year before and 295 less than the average. As in former years, females have suffered more than males, the same order has been observed in the fatality from small-pox. The female death-rate is ·28 and the male ·19; the excess of female mortality in 1889 and 1890 being ·39.

1889	·30
1890	·09

The incidence of measles follows the seasonal periods influencing small-pox. The highest mortality occurred within the first two years of life, the mortality of males being 3·21 and females 2·62.

28. *Small-pox.*—From small-pox 150 deaths occurred, being 154 less than in the year before and 44 less than the average. The disease cannot be considered to have been epidemic. The deaths are distributed by months as follows :—

Months.	No. of Deaths.
January	5
February	23
March	46
April	24
May	17
June	11
July	12
August	4
September	1
October	4
November	2
December	1

29. The classes amongst whom the highest mortality occurred are Hindoo out-castes, Native Christians, and the mass of the Hindoo population. Amongst Eurasians, Jews, Bhatias, Chinese and Lingaets no deaths from small-pox occurred. In 1889, when small-pox was epidemic, the highest mortality occurred amongst Native Christians, and it was ascribed to the immigration of unvaccinated Native Christians from Goa, and the relatively large number of deaths amongst Native Christians this year is due to the same cause.

RETURN SHOWING THE NUMBER OF DEATHS AND MORTALITY FROM SMALL-POX DURING 1890.

Classes.	Population of 1881.	Number of Deaths.	Per 1000 of Population.

30. The mortality by sex follows the line of incidence of the former year, the female mortality being higher than the male; the female mortality is ·24 and the male mortality ·15. As in the previous year, the highest fatality occurred during the first year of life, falling heaviest on females. It is observed that, as in former years, the fatality decreases after the fourth year of life.

Do. died ...	7	17	1	Nil.

Abstract of Monthly Return of Vaccination by the Superintendent of Vaccination, Presidency Circle, Bombay, for the year 1890.

Months.	Total number of persons actually vaccinated.	Sex.		Primary Vaccine Operations.																						Revaccinations.						Primary Results seen after the Revaccination of the last Monthly Return					Remarks.
				Caste.								Age.						Results.								Total number of persons in column 1	Sex.		Results.				Number of persons in column 1					
				Christians.			Hindus.			Mussalmans.		Out-castes.		Under one Year.			Under 6 Years.			Upwards.			Under one Year.			Under 6 Years.			Upwards.			Total Results.																		

33. *Cholera.*—102 deaths were registered from cholera, being 360 less than in the last year and 243 less than the average. 134 cases were reported and 102 ended fatally, giving a mortality of 76 per cent. Cholera cannot be considered to have been epidemic during 1890. Most of the deaths occurred in January, February and July. Of the 134 cases, 87 were males and 47 females. The percentage of deaths to attacks being 73·5 amongst males and 80·8 amongst females :—

For 1890.	Attacks.	Deaths.	Percentage of deaths to attacks.
Males	87	64	73·5
Females	47	38	80·8

34. As in previous years the population not born in Bombay suffered most and most influenced the mortality. The influence of the immigrant population has been observed in former years, and in this year 110 out of the total 134 cases were born outside of Bombay. The following table is of interest :—

For 1890.	Attacks.	Deaths.	Percentage of Deaths to attacks.
Bombay	22	16	72·7
Elsewhere	110	85	77·2
Unknown	2	1	50·0

35. If the cases are grouped according to period of residence, it is found that 47 of the cases, 38 of which proved fatal, had not been 6 months in this city :—

Duration of residence in Bombay.	Attacks.	Deaths.
Under 3 months	31	26
Under 6 months	16	12

36. 113 of the cases occurred amongst persons who habitually used Vehar and Tulsi water. Although the number of persons who used well-water are few, the mortality as in former years is higher than amongst persons who used Vehar and Tulsi water.

For 1890.	Attacks.	Deaths.	Percentage of Deaths to attacks.
Vehar and Tulsi Water Consumers	113	89	78·7
Well-water drinkers	6	5	83·3
Unknown	15	8	53·3

37. 2 deaths occurred amongst Europeans; 9 in the Parsee community, and amongst Hindoo low-castes 9, giving a mortality in each class of ·18.

* This calculation is based on the approximate census returns of 1891.

39. The highest mortality as in the last year occurred in Girgaum; Kamateepoora, a district in which cholera has not generally been prevalent, had the next highest mortality, and then follow Chawpatty and Bhuleshwar in order of incidence. I hope for a reduction of mortality in Girgaum generally, as there has been through drainage

and sanitary work a reduction of mortality in localised portions of this district where cholera was once endemic. In Girgaum, as in the other portions of the City, where buildings have been improved and more opulent classes attracted and cesspools removed and drains constructed, fewer cases of cholera occur. In "wadies," where once Epidemics were expected every year, and preparations made for them, cases seldom now occur and when they occur others do not follow. That which I may describe as epidemic attraction has ceased.

* This calculation is based on the approximate census returns of 1891.

40. *Fevers.*—The mortality from fevers is equal to 8·01 against 7·99 last year, notwithstanding an epidemic of Influenza and the influence which that epidemic exercised on the mortality, increasing the deaths in March to the unusual number of 994. The total mortality from fevers is 777 less than in the year before and only 91 more than the average—the average including a period of exceptionally low mortality. Of the total deaths from fevers 55 per cent occurred in the first six months, the greatest Number being in March, following on a low mortality in February and the lowest Number in November. The mortality in 1890 and in 1889 is contrasted in the table below.

DEATHS FROM FEVERS.

Months.	No. of deaths, 1889.	No. of deaths, 1890.
January	655	581
February...	561	485
March	671	994
April	726	574
May	744	547
June	560	440
July	589	522
August	610	506
September	587	470
October	509	488
November	511	400
December	543	482
Total...	7,266	6,489

41. Of the total deaths from fevers 5,363 were referred to remittent fever, being 214 less than in the last year, and 478 more than the mean of the preceding five years; 315 were ascribed to ague, being 90 less than in the last year and 61 more than the average; 794 were referred to simple continued fever, being 465 less than in the last year and 449 less than the average; 17 were registered from enteric fever, being 8 less than in the preceding year and 1 more than the average.

42. Taking the figures of the Census of 1881, the highest mortality occurred in Parel; this high mortality, although ·64 less than in 1889, is in some measure due to expansion of population, for there has been a great increase of population in Parel and it is also in some degree influenced by insanitary conditions from imperfect drainage and absence of drainage. The mortality in Mahaluxmee is chiefly ascribable to increase of population. The sections, out of the total 32, in which the mortality is above the mean for the whole city are, Parel, Byculla, Mahalukshmi, Kamathipura, Khara Talao, Chuckla, 2nd Nagpada, Sewri, 1st Nagpada, Umercary, and Mazagon.

Return showing the Number of Deaths and the Death-Rate from Fevers during 1890.

43. The highest mortality by class occurred amongst a small and fluctuating community, the Negro-Africans ; the second highest mortality amongst Jains and the third highest amongst Eurasians. It is probable that these three classes have increased very much and that the fatality from fevers has not fallen so heavily on them as the returns show. The classes amongst whom the mortality rose highest in March were Jains, Brahmins and Native-Christians, and the classes least affected were Europeans and Parsis. There is one class living in hut and in crowded chawl and in crowded room, generally on ground floors and in dampest localities, which suffers most and is most stricken by febrile affections—Hindoo out-castes. The community amongst whom the lowest mortality has occurred are Europeans ; the mortality amongst Europeans is much below the average, and between Europeans and the classes having a mean death ratio we find the Parsi community with a low death-rate of 5·53, and Jews being the next lowest with a mortality of 6·92.

RETURN SHOWING THE MORTALITY FROM FEVERS BY CLASSES DURING 1890.

Classes.	Population of 1881.	Number of Deaths.	Rate of Mortality per 1000.
Jains	17,218	313	18·17

* This calculation is based on the approximate Census returns of 1891.

44. Females have suffered more than males. As in former years the mortality falls heaviest on females, and is highest during the first year of life although less than the male mortality at the same period; while the male mortality is 7·67, the female is 9·48. The incidence of the sex mortality by age periods gives the following results :—

	Males.	Females.
Under 1 year	80·66	71·45
1 to 10 years	9·74	11·60
10 to 40 years	3·40	4·35
40 and above	13·15	11·20

45. 2,728 deaths were registered from Phthisis. The mortality is 77 less than in the last year and 34 less than the average. The mortality is highest as in the 4 years before in the same district—2nd Nagpada—the district whose condition and whose house-crowding, the densest in Bombay, I have before in this report described. In the following return the mortality by sections is shown :—

DEATH RATE PER 1,000 OF POPULATION FROM PHTHISIS IN THE FOLLOWING LOCALITIES OF THE HIGHEST MORTALITY.

1888. Localities.	Per 1,000 of Population.	1889. Localities.	Per 1,000 of Population.	1890. Localities.	Per 1,000 of Population.

				1st Nagpada	4·37

46. *Digestive System.*—To disease of the Digestive System, 1,983 deaths were referred, being 292 less than in the last year and 202 less than the average. Of the deaths from diseases of the Digestive System, 905 were ascribed to Diarrhœa, being 194 less than in the last year, and 124 less than the average; 507 to Dysentery, being 118 less than in the last year and 92 less than the average. To all other diseases of the Digestive System, 571 deaths were referred, being 20 more than in the last year and 15 less than the average.

47. *Respiratory System.*—From diseases of the Respiratory System, 3,335 deaths were registered, being 607 less than in the last year and 571 less than the average. Of the deaths from diseases of the Respiratory System 2,008 were referred to Bronchitis, being 438 less than in the last year and 24 less than the average; 806 to Pneumonia, being 8 more than in the last year and 29 less than the average.

48. *Nervous System.*—From diseases of the Nervous System, 1,936 deaths were registered, being 186 less than in the last year and 123 less than the average.

49. *Circulatory System.*—To diseases of the Circulatory System, 180 deaths were referred, being 14 less than in the last year and 8 more than the average.

50. *Urinary System.*—To diseases of the Urinary System, 55 deaths were ascribed, being 6 less than in the last year and 8 less than the average.

51. *Generative System.*—From diseases of the Generative System, 198 deaths were registered, being 6 less than in the last year, and 3 more than the average.

52. *Organs of Locomotion.*—To diseases of the Organs of Locomotion and Cellular tissue, 74 deaths were referred, being 2 less than in the last year and 4 less than the average.

53. *Cutaneous System.*—To affections of the Cutaneous System, 19 deaths were ascribed, being 6 less than in the last year and 7 less than the average.

54. *Dropsy.*—To Dropsy, 106 deaths were referred, being 3 more than in the last year and 3 more than the average.

55. *Leprosy.*—From leprosy, 45 deaths were registered, being 1 less than in the last year and 25 less than the average. With the segregation of lepers in the excellent home at Matoonga and therefore the more correct registration of Leprosy we may expect and hope for more exact information and that a larger number of deaths will be registered from Leprosy. The number of deaths now registered is far below the number of deaths really due to Leprosy and the ills which come with this dreadful disease. This could not be helped, but now with a Leper Home, the more patients there are, the more correct will be the registration.

56. *Old Age and Debility.*—To Old Age and Debility, 1,771 deaths were referred, being 111 more than in the last year, and 332 more than the average.

57. *Accidents.*—397 deaths were registered from Accidents and Violence, being 18 more than in the last year and 27 more than the average. Of the deaths from Accidents and Violence, 58 were ascribed to poisoning, being 20 less than in the last year and 10 less than the average; of the deaths from poisoning, 36 were suicidal and 18 accidental, 3 were from snake-bite and 1 from mephitic gas; 70 were ascribed to drowning, being 28 less than in the last year, and 25 less than the average. The deaths from drowning are classified in the return below :—

Deaths from drowning in 1890.

Accidental	30
Suicidal	28
Homicidal	1
Unknown	11
Total...	70

58. The suicides by drowning were reported to have occurred under the following circumstances :—

(1)	Jumping into a well	11
(2)	„ „ tank	11
(3)	„ „ sea	5
(4)	„ „ pond	1

59. Of the dead, 13,683 were buried, 7,020 burnt, 1,113 carried to the Tower of Silence.

60. 15,568 living and 1,282 still-born births were registered. Of the living births, 7,965 were males and 7,603 were females, giving a proportion of 104·76 males to 100 females. Assuming that there were 100 females to 100 males, the corrected birth-rate would be equal to 30·33.

RETURN SHOWING THE NUMBER OF BIRTHS AND THE BIRTH-RATE IN EACH CLASS IN 1890.

61. The total expenditure on the Health Department came to Rs. 11,55,118-3-9, while the income of the Health Department amounted to Rs. 6,34,478-14-5.

62. The actual cost of the Health Department to the Municipality was Rs. 5,20,639-5-4 against Rs. 4,86,698-6-6.

63. On an average, 4,129·9 men and women and 788 scavengering and drain carts and 166 night-soil and cesspool carts were at work each day.

64. The collection of garbage or *kutchra* is greater than in the previous year by 13 tons a day; 309,482 tons of garbage, equal to 847 tons a day, were collected and removed and disposed of against 304,662 tons in 1889.

65. 131,836 tons of night-soil, equal to 361 tons a day, were collected and removed against 128,986 tons in 1889.

66. 192 miles of covered drains were opened and cleaned against 198 in 1889.

67. 3,327 notices and 3,290 summonses were issued against 3,255 notices and 4,607 summonses in 1889. The amount of fines recovered amounted to Rs. 2,367-0-0 against Rs. 1,824-8-0 in 1889.

68. For the use of the public Dhobiwada, Rs. 12,294-8-0 were recovered against Rs. 11,638-8-0 in 1889.

In the table following will be found a record of the important work done during the year 1890 :—

Ditto ditto tar & dammar ditto	394	15	...	...	15	.....
Total.....	...	2,576	3	54	2,633	2,367 0 0

There were 3,290 summonses issued, including repetitions, &c., &c.

69. I have now finished the examination of the sanitary state of the City and of the work done by the Health Department in the past year. The record is of good-work and, I think, the record indicates the excellence of the administration directed by the Assistant Health Officer, Mr. Leask, and the ward staff. There has been no interruption in departmental work—scattered and varied as that work is and difficult of supervision—in every Section, in every street, in every lane, in every gully in the Island, and considering the large number of men and women employed (4,129 in all), the work, and the interruption in it of one morning would agitate the City and cause a fearful foulness—has proceeded with a remarkable certainty and sureness.

Statement No. III.

STATEMENT showing the Number of NOTICES served under various Sections of Act III. of 1888, during 1890.

Requirements of Section.	No. of Section.	Complied with.	Not complied with.	Pending.	Cancelled.	Total.

Appendix A.

AGGREGATE AND MEAN VELOCITIES AND RELATIVE FREQUENCY OF DIFFERENT WINDS, 1890.

TABLE showing for the year 1890 the Sums of Velocities, in miles per hour, of the Winds which blew in each month, from each of the Sixteen Principal Directions, and also the number of Observations which those sums comprise; the latter number indicating the Relative Frequency of the same Winds (as to directions) in the several months, and of different Winds during the same month.

1890.	N.			NNE.			NE.			ENE.			E.			ESE.			SE.			SSE.

2.—LICENSE DEPARTMENT.

2. The system under which this department was worked during the year under report, though an excellent one, yet having regard to the very weak staff at my disposal, clerical as well as inspectorial, was found to be a great deal too unwieldy, so much so that on my representation of the situation, you were, after careful consideration of all the facts placed before you, kind enough to sanction the proposals I had submitted in regard to the future working of the License Department, and under which I am happy to say from present experience that the revenue is coming in much quicker, and with far less trouble to us than it did before, although the collection of revenue has to an appreciable extent been simplified by the introduction of the new system, yet the work in connection with the department in other respects is so heavy that I must say that at least two additional clerks are absolutely necessary if the work is to be done with efficiency. The present clerical staff consists of a head clerk, and two other clerks, who as a rule attend office from 10 a.m. up to 7 p.m., and frequently later. The keeping of all the registers, the filling in of thousands of summonses in the year, the preparation of court sheets, the filling in of the daily receipts for cashier, the copying of endless correspondences (marked "to be returned") for the files of this office, the filling in of thousands of licenses and other routine work, I would respectfully submit is more than what three men could reasonably be called upon to do. In regard to the Inspectorial staff, I would also point out that, considering the nature of the duties they have to perform an additional number of Sub-Inspectors would prove of great service, but as by the new system just introduced, I expect that to some extent their work will be lessened, I shall not at present suggest any addition to it. To this department there are attached seven peons. Every department of the Municipality, with the exception of the License Department has an havildar. I would suggest that the senior peon in this office be promoted to the rank of havildar on a salary of rupees twelve per mensem, his present pay being Rupees ten.

3. Appended is a tabulated statement giving the total of license fees collected under each head of licensable trades, premises, or commodities. As will be seen, the income from all these up to 31st March 1891 was Rs. 27,136-8-0, to this must be added the sum of Rs. 7,195 also for the year 1891 but collected during the current official year, *i.e.*, from the 1st April up to the 11th June 1891-92, making a total of Rs. 34,331-8-0, besides this there is still some fifteen hundred rupees more to be collected for last year, which I expect will be recovered during the current month.

4. To give some idea of the work carried on in the different Police courts, I would here mention that during the year under report I had conducted 2,676 prosecutions, out of which I am glad to say that the percentage of acquittals were very small. It is needless for me to dwell upon the responsibilities incurred and the labour and trouble I had to undergo in the prosecution of these numerous cases as I am in this particular instance fortunate in addressing one who has had considerable judicial experience and whose sympathy and appreciation I feel sure I can count on.

5. Lastly I would mention that the result of the experiences gained during the year under review has been the revision of the Schedule of License fees, and which, I must say, in several instances operated harshly upon many of those engaged in licensable trades. The operation of the revised Schedule, I have no doubt, will remove the great discontent which had existed among the class I have mentioned, and I also hope that under its operations the revenue for the current official year will, to some considerable extent be increased.

3.—MARKETS.

APPENDED hereto are five tabulated statements, *viz.*, Nos. 1, 2, 3, 4 and 5.

3. Statement No. 1 gives the number of Markets, with the amount of fees received from stall-holders, shop-holders, squatters and contractors in each Market, together with the amount of squatter fees, &c., derived from each Slaughter House during the year, and shewing the increase and decrease in the total amount of Markets and Slaughter House fees for the year under report compared with those of 1889-90.

4. Statement No. 2 shows the number of animals slaughtered at Bandora and in Bombay for public and private purposes during the year under report.

5. Statement No. 3 shews the amount of revenue derived from the Markets and Slaughter Houses during the last ten years, *viz.*, from 1881 to 1890-91.

6. Statement No. 4 is a record of the quantity of unwholesome food destroyed during the year under report.

7. Statement No. 5 shews the number of convictions by the Presidency Magistrates under the Municipal Acts and By-laws during the year 1890-91.

Remarks on Statements Nos. 1, 2, 3, 4 *and* 5.

8. On reference to Statement No. 1, it will be observed that there is an increase of Rs. 49-6-9 in the Fort Market which is chiefly due to the right of collecting squatters' fees having been sold by public auction for a higher amount than in the preceding year.

9. The increase of Rs. 337-8-0 in the Arthur Crawford Beef Market is due to the occupancy of some of the stalls that were vacant during the year 1889-90.

10. The decrease of Rs. 249-11-0 in the Arthur Crawford Fish and Mutton Market is due to some of the stalls remaining vacant during the year under report.

11. The increase of Rs. 1,672-4-6 in the Arthur Crawford Fruit and Vegetable Market is partly due to rise in rents and partly to the right of collecting scale fees having been sold for a higher sum than in the preceding year.

12. The increase of Rs. 313-4-0 in the Godown rents is mainly due to the rents of all the godowns increased from 1st January 1891.

13. The rents from Fowl Rooms shew a decrease of Rs. 4-2-0 due to the vacancy of one of them for a fortnight during the year under report.

14. It will be observed that there is a large increase of Rs. 5,050-0-0 in the amount realized from the sale of the right of collecting squatters' fees of the Erskine Road Fish and Mutton Market. This is due to the sale of the squatting right of the whole Market for the first time for the year under report, including all salt-fish sellers, mincers, and head sellers, who had formerly occupied stalls in the same Market and paid quarterly rents, only the mutton butchers having been accommodated in the new Mutton Market. It will also appear that the stallages shew a decrease of Rs. 2,671-8-0, thus shewing a net increase of Rs. 2,378-8-0 in the total revenue derived from the Markets. This large reduction in the amount of rents is due to the fact that several of the stalls in the new Mutton Market remained vacant for a greater part of the year in consequence of their rents being considerably high.

15. The decrease of Rs. 1,552-10-1 in the Erskine Road Fruit and Vegetable Market is due to the vacancy of a large number of stalls in the New Market during the year under report.

16. There is an increase of Rs. 301-10-11 shewn in the Bhooleshwar Market. This is due to an increase in the levy of squatters' fees from 1st January last.

17. The increase of Rs. 166-12-0 in the Pedder Market is partly due to the right of collecting squatters' fees having been sold for a higher amount than in the preceding year, and partly to the occupancy of some of the vacant stalls during the year under report.

18. There is an increase of Rs. 153-15-6 in the amount realized from the sale of Prices Current Forms. Out of this, a refund of Rs. 82-15-6 was made, as per Municipal Commissioner's No. 17078 of 1890-91. Thus the net increase from this head is Rs. 71-0-0. This is due to the discontinuance of the former practice of paying every month four annas per each copy out of the sale proceeds to a candidate for filling in the forms and keeping the Prices Current Register, a new clerk for this work having been appointed by the Municipal Commissioner from the beginning of the last financial year.

19. The very small increase of Rs. 3-5-0 in the amount of slaughter fees is due to the fact that few animals only were slaughtered in Bombay for religious purposes during the year under report.

20. The amount derived from Butchers' License Fees shows a large increase of Rs. 2,897-0-0, this is due to an increase in the levy of license fees from 1st January last.

21. The increase of Rs. 4 in the amount of Chawl Rents is due to the occupancy of one of the vacant rooms during the year under report.

22. The Fair Ground and Feeding Fees show an increase of Rs. 6,571-12-0. This is due to the right of collecting fair ground and feeding fees at Bandora having been sold for a higher sum than in the preceding year.

23. The decrease of Rs. 25 in the Revenue from Toddy Trees is due to the fact that the tapping right was not purchased by any one during the year under report.

24. During the year under report, Rs. 195 were recovered from K. D. Framjee, Esq., for the right of collecting and boiling blood at Bandora at the rate of Rs. 10 per month plus Rs. 5 for ground rent. The extra sum of Rs. 15 is on account of the instalment for the month of April 1891 having been paid by the Contractor in the month of March last.

25. The amount realized from verifying weights and measures during the year under report is Rs. 5,945-8-0. There has been a serious falling off in the revenue from this head day by day, all people knowing that the verification of weights and measures is not compulsory. The total amount derived from this head during the month of April 1891 is Rs. 223-8-0 only, and I fear that at this rate the total revenue during the whole of the current year will not cover the expenses even unless some provision is made for the same.

26. After deducting the total decrease of Rs. 1,936-6-10 for the whole year under report from the total increase of Rs. 20,872-8-8 under all heads, there is still a net increase of Rs. 18,936-1-10 for the whole year. The total amount of revenue from Markets and Slaughter Houses for the year under report is Rs. 3,48,106-5-7 against Rs. 3,29,170-3-9.

27. Statement No. 2 shews the number of buffaloes, bullocks, cows, calves, sheep, goats and pigs slaughtered for the Bombay Markets; also the number of sheep and goats slaughtered for Mahim and Bandora; the number of horned cattle as well as sheep and goats slaughtered by the Commissariat Department; the number of horned cattle, sheep and goats brought alive into Bombay for slaughter for religious purposes, &c., during the year under report.

28. Statement No. 3 is a comparative statement shewing the amount received under the different heads of Markets and Slaughter Houses revenue during the last ten years, *viz.*, from 1881 to 1890-91.

29. Statement No. 4 gives the amount of unwholesome food destroyed during the year, which amounts to 66 tons, 12 cwts., 3qrs., and 27 lbs. against 18 tons, 13 cwts., 2 qrs. and 2 lbs.

30. Statement No. 5 shows the number of convictions obtained before the Presidency Magistrates under the Municipal Acts, and By-laws. The total number of convictions were 27 against 58, and the amount of fines is Rs. 257 against Rs. 442.

31. During the year under report, European fruits and vegetables were plentiful, large, good and cheap in the Bombay Markets. Native fruits and vegetables were also plentiful and cheap as usual, and the Fruit and Vegetable Show about Christmas and New Year's time was really very good, excepting the supply of grapes which was poor and very small.

32. From November 1890 to March 1891, 1,233 baskets of Italian apples were imported for the Markets. They were large and nice to look at, but watery and tasteless.

33. During the year under report 1,330 baskets of grapes (Aurangabad),2,434 baskets of Muskat pomegranates, 1,097 baskets of grapes, (Cabool), 473 baskets of Cashmere apples, 320 baskets of Muskat moosoombi and 17 baskets of black grapes from Nassick, were imported for the Markets. Consequently the Markets were well stocked with fruits, and apples and pomegranates were very cheap. But some of the best apples that came into Bombay were from Mangalore and all the public market people and dealers seem well satisfied with the year's business, but I am sorry to say that there is no improvement in the Beef supply and the butchers and Dubashees are all clamoring to be allowed to slaughter more buffalloes for ship supplies. I must here point out that Phudkarees are still a very great nuisance to all Bombay by being allowed to remain at DeLisle Road, they should be turned out to Bandora as soon as possible. Private slaughtering can never be controlled as long as those people are allowed to remain in Bombay.

34. I have also to state that the number of squatters on the roads at Colaba as also around the Bhooleshwar Market are increasing and that the Parel Chawl Private Market is in a most filthy and dilapidated state.

35. The fish supply in all the Markets, Public and Private, was far below the average of former years ; said to be on account of the strong south-westerly winds and heavy sea that continued to run throughout the whole of the monsoons and the extremely cold weather that prevailed during the months of October, November, December, January and into March 1891.

36. In conclusion I have also to point out that the number of squatters removed by this establishment under sections 314 and 490 of the Municipal Act III of 1888, and as per Municipal Commissoner's order No. 16224 of 1888-89 dated 30th November 1888, from the public roads in the vicinity of the Public Markets were 1896 during the year under report.

No. 466 of 1891-92.

THE JOINT SCHOOLS COMMITTEE OFFICE,
58, HORNBY ROW, FORT,
BOMBAY, 13*th August* 1891.

FROM THE SECRETARY,
Joint Schools Committee.

To H. A. ACWORTH, Esq.,
Municipal Commissioner for the City of Bombay.

SIR,—I have the honor, by direction of the Joint Schools Committee, to forward to you herewith a copy of the report on the Committee's operations for the year 1890-91, which was adopted by them at their meeting held on the 6th instant.

I have the honor to be,
Sir,
Your most obedient servant,
N. B. MASANI,
Secretary, J. S. Committee.

REPORT ON THE JOINT SCHOOLS COMMITTEE'S OPERATIONS FOR THE YEAR 1890-91.

Under the City of Bombay Municipal Act, III of 1888, the primary schools of Bombay, which had been either maintained or aided by Government were transferred to the Municipality, and a Joint Schools Committee was formed, consisting of four members appointed by Government and four by the Corporation. Their names are as under :—

Appointed by the Corporation.

1. Dr. THOMAS BLANEY.
2. Hon. Justice K. T. TELANG, C.I.E.
3. KAIKHOSRO N. KABRAJI, Esq.
4. ABDULLA M. DHARAMSI, Esq.

Appointed by Government.

1. GRATTAN GEARY, Esq.
2. Hon. NOWROSJI N. WADIA, C.I.E.
3. GHANASHAM N. NADKARNI, Esq.
4. Rao Saheb VARAJRAI S. DESAI.

The Committee was charged with the control and administration of the schools, and a School Fund, to which both the Municipality and the Government contribute, was constituted for the purpose of maintaining, aiding and suitably accommodating schools for primary education.

The first meeting of the Committee was held on the 7th November 1888, when Dr. Thomas Blaney was unanimously elected Chairman for a year. He has since been twice re-elected. The Committee at once set about preparing themselves for the work entrusted to them, and with the aid of Mr. Kirkham, Educational Inspector, C.D., they framed By-laws under Section 461 (*a*) of the Municipal Act, defining the duties and functions of the Committee. The By-laws having been approved by the Corporation were confirmed by Government on 12th February 1890. A vote of thanks was passed by the Committee to Mr. Kirkham for the cordial and valuable assistance he had given to the Committee, particularly with respect to the preparation of the By-laws.

The arrangements for the transfer of the schools were not completed till the commencement of the official year 1890-91, when the balance of the Educational Fund, with which the School Fund was started, was made over by Government to the Committee.

The Government contribution to the School Fund for the year under report was Rs. 25,000, which is the amount fixed by them as their share of annual payment for a period of five years. The Corporation contributed Rs. 31,374, but on a representation from the Committee the amount was subsequently raised to Rs. 39,500.

The year's income from the Municipal and Government contributions and from School Fees and other miscellaneous receipts amounted to Rs. 85,550-1-0. With the balance of Rs. 11,053-10-4 available on the 1st April 1890, the total amount of receipts aggregated Rs. 96,603-11-4. The total expenditure during the year was Rs. 81,861-1-11 which left a balance of Rs. 14,742-9-5 to the credit of the School Fund on 1st April 1891. The annual cost per pupil in the Municipal Schools was Rs. 11-1-0 and was distributed as follows :—(1) Teaching, Rs. 7-4-0 ; (2) Rent, Rs. 3-1-0; (3) Miscellaneous charges, Rs. 6.

The Committee directed particular attention during the year to the sanitary condition of the schools, which is admitted, on all hands, to be extremely unsatisfactory, and at their request the Secretary carefully inspected every one of the 55 Municipal schools and submitted a detailed report giving the dimensions of each class room, the cubic and superficial area available per pupil, the quality and the direction of light in each class, and the privy accommodation and drinking water supply in each school. The result of the inquiry made by the Secretary was reduced by him to general observations,

which preceded his detailed report, and the Joint Schools Committee invite particular attention to those observations which have been annexed to this report as an appendix. (Appendix A.)

Besides the sanitary condition of the schools, the Committee have for some time past had under consideration the general question of the promotion of primary education and the provision of means for the physical education of the pupils attending the schools. At the Chairman's suggestion, the Committee have invited the opinion of the head masters of the Municipal schools and the managers of the aided schools on such questions as the effect of the school fees on the attendance, the means that should be adopted for providing physical training for the children, and the promotion of primary education among females, and the backward classes. Female education is making slow progress. There are eleven girls' schools under the Joint Schools Committee and they are all doing fairly well. But they have to contend with many obstacles in their way. In the first place, parents generally have not yet come to appreciate female education so as to co-operate heartily with the school authorities in looking after the education of their children. Girls are allowed to stay away from school on frivolous pretexts and the consequent irregularity of attendance tells against their progress. Irregular attendance and the early age at which girls are withdrawn from schools form constant themes of complaint by teachers in the girls' schools. Twelve or at the utmost thirteen is the age at which girls are made by their parents to leave school. The total number of girls attending eleven Municipal schools is only 940.

The number of Municipal schools is 62 and of aided schools 68, making altogether 130 schools under the Joint Schools Committee. The Municipal schools are purely vernacular, with the exception of seven, in which some English is taught. The number of pupils attending the Municipal schools this year was 6,134 as against 6,069 for the previous year. The subjoined table gives the number of pupils attending the Municipal and aided schools, and the unaided primary schools in Bombay :—

	Schools in 1889-90.	Schools in 1890-91.	Pupils in 1889-90.	Pupils in 1890-91.
Municipal	62	62	6,069	6,134
Aided..	67	68	7,846	5,210
Unaided	180	196	11,476	9,979
Total ...	309	326	24,891	21,323

According to the Census of 1881, the number of children between 5 and 12 years of age, which may be taken as the school-going age of pupils attending primary schools, was 1,12,634, consisting of 62,334

males and 50,300 females. The total number of pupils attending primary schools in Bombay during the year 1890-91 was, as far as could be ascertained, 21,323, being 15,684 males and 5,639 females. According to these figures, the number of children attending school is 18·9 per cent. of the population of school-going age. The percentage of male children under instruction is 13·9, and that of female children is 5. This shows that there is ample room for the extension of elementary education in Bombay.

The number of children, according to their sexes, attending the three classes of primary schools is as under :—

	Boys.	Girls.
Municipal	5,168	966
Aided	3,206	2,004
Unaided	7,310	2,669
Total...	15,684	5,639

The children in the Municipal and aided schools are divided according to their races as follows :—

Races.	Schools.		Total.
	Municipal.	Aided.	
Hindus	5,036	3,486	8,522
Musalmans	675	311	986
Parsis	322	1,109	1,431
Portuguese and Native Christians	34	153	187
Jews	58	124	182
Aborigines	6	27	33
Others	3	.....	3
Total.....	6,134	5,210	11,344

The sixty-two Municipal schools are divided into Marathi and Gujerati schools, the latter including two Urdu schools for Mahomedan boys.

	Marathi.	Gujerati.	Total.
Middle Schools	4	3	7
Primary for Boys	24	15	39
Primary for Girls	4	7	11
Night Schools	.....	5	5
Total.....	32	30	62

The middle schools teach from the 1st to the 3rd Anglo-Vernacular standard. The night schools are not as much availed of as they might be. They are attended mostly by the working classes, such as mill hands, office peons and others, who do not generally care to continue in the schools after they have learnt to read and write their vernacular, and also acquired in some cases a slight smattering of English. They leave as soon as they have learnt what they consider to be sufficient for their purpose, and consequently their attendance at school does not, for the most part, last longer than six months or a year. There are no Marathi night schools belonging to the Municipality; but this want has been fairly well supplied by the Theistic Association's night schools, which annually receive grants from the School Fund.

The schools have been reported by the Inspectors to have done, on the whole, satisfactory work during the year. Under the rules adopted by the Committee for the working of the Department under their control, the Inspectors have now more time at their command than while the schools were under Government, for the performance of inspectorial work, and it is expected that with more time at their disposal there will, in consequence, be better supervision. It may be mentioned here that every year there are awarded four Middle School scholarships, which are open for competition to all the schools of Bombay, and it is satisfactory to note that this year they were all won by pupils of Municipal schools.

The amount sanctioned in the Budget for the payment of grant-in-aid was Rs. 14,000, including the fixed grant of Rs. 5,000, paid annually to the Anjuman-i-Islam schools. As the total amount of grant for the schools, arrived at on the examination results, was somewhat in excess of the amount sanctioned in the Budget this year, the Committee had to reduce the grant about 3 per cent. all round. Many applications from school proprietors have been received for the registration of their schools under the grant-in-aid code, but they cannot be entertained until the funds at the disposal of the Committee for grant-in-aid were increased. The Committee consider that a larger grant is absolutely necessary for the purpose of giving adequate aid to private enterprise in Bombay.

The Joint Schools Committee recognize the fact that annually increasing expenditure will be necessary to place primary education in Bombay on a satisfactory footing. A larger grant is required, as has been already pointed out, for the encouragement of private enterprise. As for the Committee's schools, it is not only that they are for the most part badly housed, but they are also very poor in point of furniture and apparatus. There are no means available for carrying out such improvements in teaching as an introduction of the kinder-garten system for little children. There are no means available to enable the Committee to do anything for the physical training of the pupils.

It is necessary that the Committee should have adequate funds at their disposal for the progress and improvement of primary education in Bombay.

N. B. MASANI,
Secretary, Joint Schools Committee.

THE JOINT SCHOOLS COMMITTEE'S OFFICE,
BOMBAY, *17th July* 1891.

APPENDIX A.

BUILDING ACCOMMODATION OF MUNICIPAL SCHOOLS.

BOMBAY, *January* 1891.

In submitting a detailed report on the sanitary condition of the Municipal school buildings, as desired by the Joint Schools Committee, I beg to make a few general observations.

2. There are in all 55 Municipal schools under the Committee, 27 Gujerati and Urdu, and 28 Marathi. The total monthly rent for the Gujerati schools is Rs. 810, and for Marathi schools Rs. 699, aggregating Rs. 1,509 per mensem. This gives an average of Rs. 30 per school and Rs. 3-12-0 per pupil. The proportion of rent to total expenditure is nearly 28 per cent. There are four Marathi schools for which no rent is paid. The buildings of the Ghodapdeo and Varli schools were constructed by Government, part of the cost having been defrayed by means of subscriptions raised by towns-people, and they are now the property of the Municipality. The buildings of the Kamathipura boys' and girls' schools have been given by the Telugu community for the use of the schools free of rent.

Amount of house rent.

3. From a careful inspection of all the school buildings I can say that, with but a few exceptions, they are very deficient in point of accommodation and sanitary arrangements. Hundreds of children are receiving education in dark ill-ventilated and insanitary places, where I should not wonder if the health and eye-sight of not a few of these little ones are impaired. There are some schools in which the children are miserably cramped and crowded together, and there is scarcely a school in which the floor space in all the classes comes up to the minimum of 10 square feet per pupil, which is considered necessary for primary schools. The Kapad Bazaar, Nagpada, Jairajbhoy Peerbhoy and Rangari Street boys' and girls' schools present some of the worst cases of overcrowding. In the Nagpada school about 100 children are packed together in a dark and ill-ventilated room, giving but 4 square feet of accommodation per pupil.

Deficient accommodation and sanitary arrangements.

The Jairajbhoy Peerbhoy girls' school occupies one storey of a house in Mandvie. It contains four rooms, but only two can be used for the school, as the others are very dark. In one of these rooms are accommodated two classes, and the girls, about a hundred in number, are huddled together most uncomfortably, the accommodation being only 3 square feet per pupil. The accommodation is the same in the infant class of the Rangari Street boys' school, and the girls' school which occupies the same premises does not fare much better. But, perhaps, no school affords a worse instance of overcrowding than the Kapad Bazar School, in which the accommodation in the various classes varies from $4\frac{1}{2}$ to $2\frac{1}{4}$ square feet per boy. Here the capacity of the rooms for accommodation is strained to its utmost limit. The head-master, who is an experienced old teacher, is of opinion that if an additional floor were taken for the school, not only will the existing pressure be relieved, but we may easily get and accommodate 75 or 100 more boys, and the fees recovered from them will partly cover the additional expenditure. At present he has to refuse many applications for admission.

Privy and drinking-water arrangements.

4. Privy accommodation in many schools is not quite satisfactory, and in a few schools it does not exist at all. Where the privies are used by a large number of children they cannot be kept very clean without a special halalkor and water service. The Chandanwady Marathi and Gujerati schools occupied till lately a house in Kalbadevi, where the smell emanating from the drains and privies was simply horrible. They have now been removed to a place where the children are at least free from this nuisance. I am afraid in a few instances the fault lies with masters for neglecting to keep the privies as clean as they might be. In some cases they have a good excuse in the fact that the contingency allowance of two or three rupees per month does not enable them to employ a servant who may clean the privies, draw drinking water from the pipe, sweep the floor and dust the furniture. The contingent grant is, however, largely supplemented by a water fee of half or one anna per month levied in several schools from each of the boys, and where this is the case, sufficient provision can be made to secure the necessary degree of cleanliness. The water fee is levied in most of the Gujerati schools, but not in the Marathi schools excepting one or two. I am informed by masters that the scholars in Marathi schools are generally poorer than those in Gujerati schools, and that they are either unable or unwilling to pay even one pice per head per month as water fee. In the Marathi schools, therefore, the water and other arrangements are not even as satisfactory as in the Gujerati schools.

Sanitary Rules.

5. I have noticed that masters are tolerant even of sanitary evils which are removable. If simple sanitary rules were prepared for instruction in the schools, their educational value will be great, both to masters and pupils. It would, for instance, conduce to the general health of the pupils, if

masters were to have a clear appreciation of the fact that water has power to absorb impurities and therefore it is dangerous to have, as I have seen in some places, open or partially closed water chatties close to privies or drains.

Difficulty of finding suitable houses.

6. It is almost impossible to find houses in every way suitable for schools. There are several reasons for this state of things. (*a*) In the first place, none of the houses have been constructed specially for schools, hence we find that the light, ventilation and accommodation are widely varying in the different classes of the same school. Some rooms are too large for the classes, some too small, while some others are too dark and therefore entirely useless. The Jairajbhoy Peerbhoy Girls' School is a notable instance of what I say. The front room is all that can be desired, and the accommodation is ample—18 square feet per pupil. The two middle rooms are dark and useless as class rooms, while the room in the rear, which is tolerably well lighted, gives only 3 square feet of space per pupil. (*b*) Another reason for the present unsatisfactory state of house accommodation is want of sufficient means. (*c*) The third reason is that we are necessarily very much restricted in the area of selection, as the children attending the schools are mostly of a tender age, and their parents naturally wish the schools to be somewhere within measurable distance of their houses. So many as 55 of our own schools, together with any number of other primary schools, both aided and unaided, being dotted all over the town, each school serves a very limited area, and if a school were removed from one locality to another, there would be a great falling off in the number of the pupils attending it. Besides it would probably clash with another Municipal or private school in that locality.

Removal to better quarters.

7. It may be noted that even with such resources as are at the Committee's disposal, they have managed, since they took over charge of the schools in April last, to remove six of the schools to comparatively better quarters. The Dongri Schools, for boys and girls, occupied rooms in an extensive chawl which was inhabited by all sorts and conditions of people. The schools have been removed to a large bungalow where the attendance of pupils has much increased. The compound is utilized as a play-ground and a large stable shed has been converted into a gymnasium, the apparatus having been presented by persons living in the district. The following are the schools which have been removed to better quarters since April last :—

A. Chandanwady Marathi School.
B. Chandanwady Gujerati School.
C. Bhuleshwar Girls' School.
D. Dongri 2nd Grade A.-V. School.
E. Dongri Girls' School.
F. Girgaum Vernacular School.
G. Girgaum 2nd Grade A.-V. School.

8. Landlords generally avoid making any expenditure on repairs. Definite arrangements may be made with them, if possible, to white-wash the premises and execute ordinary repairs about twice a year.

House Repairs.

9. The evil of insufficient and insanitary house accommodation cannot be remedied unless the Committee is provided, like the London School Board, with means to build schools of their own. A beginning may be made by the Municipality providing such accommodation for schools as they conveniently can. They may provide accommodation for one or more schools over the Bhuleshwar Vegetable Markot, for instance. The transfer of Sir Mangaldas Nathubhai Girls' School will be accompanied by a trust fund amounting to Rs. 40,000, and if there be no legal objection in the way Government might consent to the money being spent in the construction of a model school for girls bearing the name of Sir Mangaldas Nathubhai. I do not know if it is not a feasible idea to start a building fund to be subscribed to by the Government, the Municipality and the public. Under the Grant-in-aid Code, Government might allow a building grant equal to the amount raised for the purpose by private subscriptions or Municipal contributions.

Means for remedying the evil.

10. The conclusion to which I have come, after carefully inspecting all the school buildings, is that their accommodation and sanitary condition are for the most part very unsatisfactory, and that a large amount of money is necessary to make any appreciable improvement.

N. B. MASANI,

Secretary, Joint Schools Committee.

To

H. W. BARROW, Esq.,

Municipal Secretary,

BOMBAY.

SIR,

In accordance with the 137th Section of the Bombay Municipal Act III. of 1888, we have the honor to send in our Report on the whole of the Municipal Accounts for the official year 1890-91, for submission to the Standing Committee.

We have the honor to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI RASTAMJI RANINA,

Municipal Auditors.

BOMBAY, 8*th September* 1891.

REPORT OF THE CONCURRENT AUDITORS OF THE MUNICIPAL ACCOUNTS FOR THE YEAR 1890-91.

THE Municipal Corporation, at their special meeting held on the 13th day of March 1890, having appointed us Concurrent Auditors to audit the accounts of the Municipality for the year 1890-91, we have the honor to submit our report thereon for the information of the Standing Committee and of the Council.

2. The official year under report comprises twelve months, commencing from 1st April 1890 and ending on the 31st day of March 1891.

3. We have examined the whole of the vouchers and papers relating to Receipts and Disbursements, and have compared the Day Book with General Ledger and Subsidiary Ledgers, Journal, Bank Receipts for Deposits, Investments of Loans, and Building and Fire Insurance Funds, &c., and found them all in order.

4. In compliance with the direction of the Council, contained in their Resolution passed on the 19th November 1888, and communicated to us by the Municipal Secretary in his letter No. 5374 of 1888-89, dated 30th November 1888, we have, at the end of the financial year, examined all Sinking Fund Investments proper to the year, and beg to certify that they have all been duly and properly made.

5. The number of receipts and disbursements vouchers, which have passed our scrutiny, amounted to 59,347 in 1890-91 against 42,826 in 1889-90.

6. We have been able from our daily attendance, on an average, from six to seven hours, owing to our work having greatly increased to keep the concurrent audit of the daily accounts as close up to date as they were booked.

7. In addition to the concurrent audit, we have examined weekly statements of receipts and disbursements of Municipal accounts at the end of each week, before they were published in the *Government Gazette*. The accuracy of this weekly audit was further tested at the end of each month by our preparing a summary of all accounts *directly* from the General Ledger and independently of the Weekly Statements. The summary contained totals of receipts and disbursements of each account as it stood in the Ledger at the end of the last week in each month, and which totals were tallied with the aggregate total of each head of accounts given in the weekly statements of the month. By this method of scrutiny, any error, or omission, or a wrong posting of an item in the Ledger could not remain undetected for more than a month at the most.

8. The summary, so prepared by us, was forwarded every month to the Secretary for submission to the Standing Committee.

Receipts.

9. The total receipts of the Municipal Fund from all sources, except Water Works Fund, amounted, during the twelve months ending 31st March 1891, to Rs. 47,11,984-4-1, and adding to this the income of Water Works Fund for the year, amounting to Rs. 11,49,198-2-3; nominal profit on stock adjusted amounting to Rs. 72,175-7-0, and recoveries of advances made for work done in Municipal Workshops amounting to Rs. 2,32,544-5-9, the whole total of all receipts amounted to Rs. 61,65,902-3-1 (*vide* Statement A of Municipal Accounts given by the Chief Accountant).

10. Deducting Rs. 2,32,544-5-9, being the amount of mere recoveries of advances made from time to time to the Superintendent of the Workshops in the last and previous years, the net total of receipts amounted to Rs. 59,33,357-13-4, which, when compared with the receipts of the year 1889-90, shows an increase of Rs. 5,91,188-2-7 over the receipts of the last year.

Expenditure.

11. The total disbursement of Municipal Fund, including the Water Works Fund, during the 12 months ending 31st March 1891, amounted to Rs. 56,84,861-7-3 (*vide* Statement C).

12. Deducting therefrom Rs. 1,31,829-15-2, being the amount of advances made to Workshops during the last year, and Rs. 44,422-11-3,* being the amount of investments on account of Municipal Building Fund, Fire Insurance Fund, interest realized on Investments, and interest realized on 5 per cent. Municipal Loan Sinking Fund, the net total expenditure amounted to Rs. 55,08,608-12-10, which, when compared with the expenditure of the last year, shows an increase of Rs. 4,99,463-7-4 over the expenditure of the last year.

* *Invested Amount.*

Rs.	a.	p.
28,906	13	1
3,000	0	0
113	4	5
12,402	9	9
Rs. 44,422	11	3

13. Out of the net total expenditure, Rs. 41,94,258-12-2 were paid on account of the Municipal Fund only, including expenditure of all Departments except that of the Water Works and payments made on account of Interest on Loans and Sinking Fund, and Redemption of Municipal Debentures, *less* Rs. 59,108-14-0, which were debitable to Water Works Fund on account of General Superintendence.

14. Rs. 12,49,036-12-2 were paid on account of Water Works, including the above-mentioned Rs. 59,108-14-0, explained as under :—

Rs.	1,65,785 11 3	were expended on the maintenance of Vehar, &c., Water Works.

Leaving a Credit Balance on 31st March 1891	3,30,157	11	7
Rs....	2,60,22,560	13	11

Particulars of Receipts.

17. Water Works Revenue and Tax realized Rs. 11,49,198-2-3, in 1890-91 against Rs. 11,23,005-10-2 in 1889-90, after paying refunds and adjustments of errors in other heads, amounting to Rs. 5,921-12-3, the total receipts being Rs. 26,192-8-1 more than those of the last year, owing to Departmental and public supply of water; from miscellaneous receipts by the sale of grass, pipe, rent of meters, profit on sale of stores and profit on the Tansa Loan Interest Fund Investment.

Budget Estimate, Rs. 10,81,100.

18. The total receipts are summarized as follows :—

	Rs.	a.	p.
Water Rate Collections	9,96,500	15	8
Departmental and Public Supply	97,729	8	6
Interest and Profit on Tansa Loan Interest Fund Investment	38,861	4	11
Rent of Water Meters	7,699	14	7
Profit on sale of Stores	2,626	5	3
Sale of Pipes, Meters, fittings, &c.	1,947	7	3
Sale of Grass	1,569	4	0
Fees for testing water pipes fittings... ...	953	2	1
Miscellaneous	1,310	4	0
Total Receipts Rs....	11,49,198	2	3

19. *General Tax.*—8 per cent. and additional tax ¾ per cent. for Fire Brigade charges.—The total amount under this head, comprising *house*, *police*, and *lighting* rates and annual contribution from Government of Rs. 50,000, and from Port Trust the enhanced contribution of Rs. 1,64,625-8-11, amounted to Rs. 16,90,277-4-0 in 1890-91 against Rs. 16,61,696-8-8 in 1889-90, after paying refunds and adjustments of errors in other heads, amounting to Rs. 10,992-2-0, being only Rs. 28,850-11-4 more than the receipts of the last year, owing to there having been outstandings of this tax, nearly ¾ of a lakh larger in 1890-91 than the outstandings of the previous years.

Budget Estimate, Rs. 15,76,000.
Budget Estimate, Rs. 1,50,00.

20. *Halalcore Cess* yielded Rs. 5,27,222-2-0 in 1890-91 against Rs. 4,73,919-1-3 in 1889-90, after paying refunds and adjustments of errors amounting to Rs. 5,679-13-9, being Rs. 53,303-0-9 more than the receipts of the last year; the increase being due under the operations of the Municipal Act, Sections 141 and 142, as explained in the report of the last year.

Budget Estimate, Rs. 5,11,600.

21. *Wheel Tax and Toll Fees* amounted to Rs. 3,56,647-15-4 in 1890-91 against Rs. 3,25,615-8-10 in 1889-90, being Rs. 31,032-6-6 more than the receipts of the last year, after paying Rs. 556 on account of refunds and adjustments of errors.

Budget Estimate, Rs. 3,25,700.

22. The apparent increase, however, is not an actual increase by the augmentation of public or private conveyances or vehicles. It was simply due to the tax having been first levied for nine months, from 1st April to 31st December 1890, and afterwards levied for all the 12 months of the year 1891, instead of levying for the quarter ending 31st March 1891, as was the practice in previous years; so that the tax levied and collected was for 21 months instead of 12 months.

23. *Establishment for collecting Toll Fees*, under the Traffic Manager of the Port Trust Department, amounted to Rs. 1,680-0-0, the same as was paid in the last year.

24. *Liquor Licenses* amounted to Rs. 1,43,750, being the usual fixed annual instalment paid by Government according to Section 63 of Act V. of 1878, in lieu of Liquor Licenses.

Budget Estimate, Rs. 1,43,750.

25. *Tobacco Duty Licenses.*—Receipts under this head, which were collected through the Commissioner of Customs, amounted to Rs. 1,80,283-15-9 in 1890-91 against Rs. 1,90,922-1-1, being Rs. 10,638-1-4 less than the receipts of the last year. The decrease was due to a change in the establishment of the Commissioner of Customs who formerly collected and paid into the Municipality, *gross* receipts, whereas now he paid *net* receipts, after deducting the pay of his establishment.

Budget Estimate, Rs. 1,65,300.

26. *Licenses.*—Licenses for Dangerous and Offensive Trades were formerly granted by the Health Officer. But the late Municipal Commissioner, Mr. Ollivant, proposed a new arrangement for the purpose of bringing them under an efficient Municipal control and better collection. When placing this subject before a Meeting of the Standing Committee held on 5th December 1889, he is said to have made the following observations on the subject:—"In point of revenue and "of safety, the present arrangements are very unsatisfactory. It is "proposed to strengthen the present establishment and to appoint a "special supervising officer. The increase in expenditure under this "head is to a great extent nominal, for not only will better control "restrict persons from carrying on unlicensed and dangerous trades, "but it must, of necessity, lead to a great increase in the number of "licenses, and, therefore, in the revenue derived therefrom."

27. Thus, under the new arrangement the collections under the Dangerous and Offensive Trades amounted to Rs. 26,925 collected in 1890-91 and Rs. 9,048-8-0 which belongs to the same year, but which were collected during the current year, and Rs. 1,575 which appear to be recoveries of the past year licenses collected through the Health Officer, making an aggregate total of Rs. 37,548-8-0 in 1890-91 against Rs. 25,185 in 1889-90, being Rs. 12,363-8-0 more than the receipt of the last year.

28. This increase verify the observations and expectations of the late Municipal Commissioner, when he introduced the new arrangement, and we hope from the fees received in the first year that Licenses may prove a hopeful source of Municipal revenue in future years.

29. Particulars of the dangerous and offensive Trades for which Licenses were granted and fees charged under Section 394 of the Municipal Act, and of collections received in 1890-91 and arrear of collection received in 1891-92.

30. (*b*) *Streets and Buildings.*—This head comprises Licenses to Plumbers and Surveyors, which amounted to Rs. 2,460 against Rs. 2,220 last year.

Budget Estimate, Rs. 2,600.

31. (*c*) *Land Conveyance, Music, and Sundry Licenses.*—Land Conveyance Licenses amounted to Rs.17,008-10-0 against Rs.15,024-13-8 in 1889-90, being Rs. 1,983-12-4 more than the receipts of the last year. Music Licenses amounted to Rs. 10,615 against Rs. 8,680, being Rs. 1,935 more, and Sundry Licenses, comprising Licenses for Sale of Poisons, Permission for Blastings, Coffee and Boarding Houses, Chandool-shops, &c., amounted to Rs. 1,868 against Rs. 1,682, being Rs. 186 more than the receipts of the last year.

Budget Estimate, Rs. 22,050.

32. *Licensing Establishment.*—The expenditure incurred under this head with the new arrangement amounted to Rs. 12,751-14-11 in 1890-91. This, when compared with the income of Rs. 37,548, realized by the Establishment, appears satisfactory.

Budget Grant, Rs. 24,572-13-2.

33. *Town Duties.*—The gross collections under this head amounted to Rs. 17,67,478-4-1 in 1890-91 against Rs. 12,53,654-3-8 in 1889-90, being Rs. 5,13,824-0-5 more than the receipts of the last year, chiefly owing to increase under the articles, Sugar, Grain, Ghee, Timber and Beer, as shown below :—

Budget Estimate, Rs. 8,07,000.

		Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
34. Port Trust yielded in.	1890-91	14,07,393 6 10

36. *Refunds of Town Duties* amounted to Rs. 7,87,958-10-0 in 1890-91 against Rs. 5,86,588-13-10 in 1889-90, being Rs. 2,01,369-12-2 more than refunds paid in last year, owing to greater portion of grain, which is imported, is exported to Europe.

37. *Charges on account of Commission* paid for collecting Town Duties, amounted to Rs. 53,056-4-3 in 1890-91 against Rs. 48,337-14-1 in 1889-90, being Rs. 4,718-6-2 more paid in 1890-91.

38. *Market and Slaughter-house Receipts.*—Receipts under this head amounted to Rs. 3,29,276-0-8 in 1890-91 against Rs. 3,02,124-15-5, being Rs. 27,151-1-3 more than the receipts of the last year.

Budget Grant, Rs. 3,38,000.

39. There was an increase of Rs. 9,993 in Fair Ground and Feeding Fees; Rs. 3,479 in Squatters' Fees, both Departmental and from Contractors; Rs. 4,883 in Feeding Fees for rejected and unclaimed animals; Rs. 2,897 in License Fees; and Rs. 5,945 in Fees for verifying weights and measures.

40. *Market and Slaughter-house Establishment.*—The expenditure incurred on account of this establishment, amounted to Rs. 1,20,650-9-10 in 1890-91 against Rs. 1,11,430-14-11 in 1889-90, being Rs. 9,219-10-11 more than the expenditure of the last year.

Budget Grant, Rs. 1,36,320-13-9.

41. The increase is explained as follows :—

Particulars.	Years.	Expenditure. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
I. Superintendence	1890-91	18,083 9 9

		Total... Rs.	14,568 1 10	5,348 6 11
		Deduct—Decrease... „	5,348 6 11	
		Net Increase...Rs.	9,219 10 1	

42. *Contribution from Municipal Servants towards Pension Funds* amounted to Rs. 14,820-5-2 against Rs. 13,534-4-2 in 1889-90, being Rs. 1,286-1-0 more than the receipts of the last year.

Budget Estimate, Rs. 13,500.

43. *Tramway Rent* yielded Rs. 36,192-3-10, the same amount as in last year.

Budget Estimate, Rs. 36,200.

44. *Miscellaneous Fines and Penalties* amounted to Rs. 7,569-3-0 against Rs. 6,070-15-5, being Rs. 1,498-3-7 more than the receipts of the last year. The increase was due to larger sums received as fines from the Presidency Magistrate, and penalties from Contractors.

Budget Estimate, Rs. 8,000.

45. *Miscellaneous Fees* amounted to Rs. 39,951-6-7 against Rs. 77,784-5-2 in 1889-90, being Rs. 37,832-14-7 less than the receipts of the last year.

Budget Estimate, Rs. 45,700.

46. This decrease was chiefly due to certain receipts which were formerly collected by the Executive Engineer and Health Departments, but which were transferred in 1890-91 to the License Department, as per particulars explained below :—

Particulars.	Years.	Receipts. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
Through Assessor and Collector.	1890-91	6,243 4 4		
	1889-90	5,273 0 6		
			970 3 10	.....
„ Executive Engineer...	1889-90	18,827 8 8		
	1890-91	16,814 10 3		
			.....	2,012 14 5
„ The Chief Accountant	1889-90	88 4 0		
	1890-91	31 4 0		
			.....	57 0 0

	1890-91	16,820 4 0		
			.....	26,364 8 0
„ Revenue Audit and Refund Establishment	1889-90	48 12 0		
	1890-91	42 0 0		
			.....	6 12 0
„ Police Commissioner.	1889-90	10,362 0 0		
	1890-91	.....		
			.....	10,362 0 0
		Total...Rs.	970 3 10	38,830 2 1
		Deduct—Increase ... Rs.		970 3 10
		Net Decrease ... Rs.		37,832 14 7

47. *Miscellaneous Savings* amounted to Rs. 50 only against Rs. 1,625-9-6 in 1889-90, being Rs. 1,575 less than the savings of the last year.

Budget Estimate, Rs. 4,000.

48. These savings were mere unpaid salaries of some of the Municipal employés whose wages were retained in the office for various reasons, but were eventually paid after satisfactory explanation.

49. In former years the total amount of such unpaid wages were credited, at the end of the year, to revenue account; but this practice has been discontinued from the year under report, and the total amount of unpaid wages is credited to Deposit Account, as is required to be shown in the form of account to be submitted to Government.

50. *Miscellaneous Receipts* amounted to Rs. 1,21,859-0-5 against Rs. 88,133-2-1 in 1889-90, being Rs. 33,725-14-4 more than the receipts of the last year, chiefly due to sale of land in Hornby Road, Fort; rent of Chawls and of reclamation land at Kurla, Tardeo Flats, Clark and Arthur Roads; rent of Telephone lines; right of catching fish at Warli; and rent of Fire Brigade Quarters.

Budget Estimate, Rs. 78,600.

51. The increase is explained under the following particulars:—

Particulars.	Years.	Receipts. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
Sale of Lands	1890-91	9,817 15 2		
	1889-90	3,905 14 8

		Total...Rs.	34,398 5 2	662 6 10
		Deduct—Decrease ... „	662 6 10	
		Net Increase...Rs.	33,725 14 4	

52. *Public Gardens.*—Receipts under the head of Gardens amounted to Rs. 30,371-11-7 in 1890-91 against Rs. 6,322-5-0 in 1889-90, being Rs. 24,049-6-7 more than the receipts of the last year; chiefly due to large donations and gifts, amounting to Rs. 17,900, for construction of birds' and animal cages, &c., admission fees, Rs. 5,976, and to sale of fruit, plants and flowers, amounting to Rs. 6,209.

Budget Estimate, Rs. 7,000.

53. The several items, representing Interest on Investments, realized interest during 1890-91 amounting to Rs. 1,86,418-10-7 against Rs. 1,48,174-14-10, being Rs. 38,243-11-9 more than the interest of the last year.

54. *Municipal Workshops.*—The gross recoveries of Workshops for 1890-91 amounted to Rs. 2,32,544-5-9. Deducting from this amount Rs. 1,10,933-3-7, being the credit balance of the year 1889-90, there remained Rs. 1,21,611-2-2 as the actual recovery for the year 1890-91.

55. Adding to this sum Rs. 6,146-5-10, being the outstandings of the year 1890-91, the whole sum amounted to Rs. 1,27,757-8-0 as the income of the Workshops for this year.

56. The expenditure, however, for the year amounted to Rs. 1,31,829-15-2, which, when compared with the income, shows an adverse balance representing a loss of Rs. 4,072-7-2 for the year.

57. We give the resumé of the above statement in figures as follows:—

WORKSHOPS ACCOUNT FOR 1890-91.

	Rs	a.	p.
Total recoveries of Workshops in 1890-91	2,32,544	5	9
Deduct—Cr. Balance of 1889-90	1,10,933	3	7
Actual recovery for 1890-91	1,21,611	2	2
Add—Outstandings for 1890-91, *viz*:	Rs. a. p.		
On account of Private Works...	513 2 10		
On Departmental Works	3,243 10 9		
Incomplete Works—Departmental Works	2,389 8 3		
	6,146	5	10
Total Income for 1890-91	1,27,757	8	0
Total Expenditure for 1890-91	1,31,829	15	2
Adverse Balance showing a loss ... ... Rs.	4,072	7	2

58. Profit on stores adjusted is a credit entry amounting to Rs. 72,175-7-0, representing the value of Dead and Live Stock purchased during the year as allowed by the Budget grant, after deducting the value of Live Stock which have died and for the depreciation of unserviceable Live and Dead Stock.

EXPENDITURE.

59. *General Supervision.*—The total expenditure under this head, in which are comprised Corporation and Standing Committee Establishments, Municipal Commissioner's Personal Office and General Office Establishment, and Account and Expenditure Audit Establishment, amounted to Rs. 1,82,197-12-2 in 1890-91 against Rs. 1,77,132-12-2, in 1889-90, being Rs. 5,065 more than the expenditure of the last year.

Budget Estimate, Rs. 1,82,197-12-2.

60. This increase of Rs. 5,065 is explained as follows :—

Particulars.	Years.	Expenditure. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
I. Corporation and Standing Committee Establishment. Budget Estimate, Rs. 52,858.	1890-91	50,210 5 3		
	1889-90	47,110 7 1		
			3,099 14 2	.....
II. Municipal Commissioner's Personal Office Establishment. Budget Estimate, Rs. 55,741-7-6.	1889-90	76,885 15 8		
	1890-91	54,159 1 1		
			.....	22,726 14 7
III. General Office Establishment. Budget Estimate, Rs. 22,728.	1890-91	22,667 15 10		
	1889-90	.....		
			22,667 15 10	.....
IV. Chief Accountant's Establishment. Budget Estimate, Rs. 56,174-9-5.	1890-91	55,160 6 0		
	1889-90	53,136 5 5		
			2,024 0 7	.....
		Total...Rs.	27,791 14 7	22,726 14 7
		Deduct—Decrease... ,,	22,726 14 7	
		Net Increase...Rs.	5,065 0 0	

61. The increase of Rs. 3,099-14-2 in the establishment of the Corporation and Standing Committee is explained as per details given below:—

Particulars.	Years.	Expenditure. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
I. Salary of the Municipal Secretary, including Personal Allowance for approved service.	1890-91	14,677 11 10		
	1889-90	14,400 0 0		
			277 11 10 (*a*).....	
II. Office Establishment ...	1890-91	6,089 15 0		
	1889-90	6,019 11 2		
			70 3 10 (*b*).....	
III. Fees of Councillors.....	1890-91	15,210 0 0		
	1889-90	14,700 12 6		
			509 3 6	.....
IV. Contingencies, Stationery, Printing, &c.	1890-91	14,232 10 5		
	1889-90	11,989 15 5		
			2,242 11 0 (*c*).....	
		Increase...Rs.	3,099 14 2	

(*a*) The increase was due to the payment of acting allowance to Mr. D. Bennett from 20th October to 9th November 1890, during which Mr. H. W. Barrow was allowed casual leave as a special case.

(*b*) and (*c*) The increase was due to additional charges for printing and advertising agenda of meetings, notices of motions, reports of committees, &c.

62. The decrease of Rs. 22,726-14-7 in the expenditure of the Municipal Commissioner's Department is explained as follows:—

Particulars.	Years.	Expenditure. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
I. Salary of the Commissioner.	1889-90	36,000 0 0		
	1890-91	33,758 1 0		
			.....	2,241 15 0
II. Office Establishment.....	1890-91	15,519 9 5		
	1889-90	13,693 5 7		
			1,826 3 10	.....
III. Contingencies, Stationery and Printing.	1889-90	5,291 5 2

	1890-91	.....		
			.....	19 2 0
V. General Charges	1889-90	1,806 5 4		
	1890-91	.....		
			.....	1,806 5 4
VI. Printing Voters' Lists ...	1889-90	2,081 14 3		
	1890-91	.....		
			.....	2,081 14 3
VII. Law Charges.....	1889-90	17,993 15 4		
	1890-91	.....		
			.....	17,993 15 4
			1,826 3 10	24,553 2 5
		Deduct—Increase...Rs.		1,826 3 10
		Net—Decrease...Rs.		22,726 14 7

63. The decrease of Rs. 22,726-14-7 in the Municipal Commissioner's Department was due to the Commissioner having separated his own Personal Office Establishment from the General Department, from the year 1890-91, and made the latter entirely a separate establishment under the designation of General Office Establishment.

64. The increase of Rs. 2,024-0-7 under the Chief Accountant's Establishment was due to the employment of additional hands under the new schedule and to increased printing charges.

65. *Assessor and Collector's Department.*—This department expended Rs. 1,37,264-0-3 in 1890-91 against Rs. 1,15,710-0-7

Budget Estimate, Rs. 2,23,354-6-5.

in 1889-90, being Rs. 21,553-15-8 more than expended last year, explained under the following details:—

Particulars.	Years.	Expenditure. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.
I. Head-quarters Office Establishment.	1890-91	60,255 13 2		
	1889-90	49,331 2 0	10,924 11 2	.....
II. Ward Inspection Office.	1890-91	52,332 4 6		
	1889-90	47,017 0 10	5,315 3 8	.....
III. Contingencies, Stationery, Printing, &c.	1890-91	15,075 14 7

66. *Licensing Establishment* expended Rs. 21,903-13-11 in 1890-91 against Rs. 8,955-11-11 in 1889-90, being Rs. 12,948-2-0 more than the expenditure last year.

Budget Estimate, Rs. 24,572-13-2.

The increase was due to the new arrangement made by the late Municipal Commissioner Mr. E. C. K. Ollivant, in placing the Licensing of the dangerous and offensive trades under the supervision of a special officer referred to in the 24th, 25th, and 26th paras. of our report.

67. *Public Health Department.*—The total expenditure of the Health Department amounted to Rs. 11,72,442-4-3 in 1890-91 against Rs. 10,85,179-6-5 in 1889-90, being Rs. 86,262-13-10 more than expended last year.

Budget Estimate, Rs. 13,90,206-10-7.

68. The increase is explained under the following details:—

Particulars.	Years.	Expenditure. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.

71. *Municipal Engineer's Department*, in which was comprised formerly Out-door Establishment (Roads and Buildings) in 1889-90, was separated under the new schedule for 1890-91 under two separate heads, *viz.* (*a*)—General Supervision and Miscellaneous Duties; and (*b*)—Inspection and Supervision of Streets and Buildings.

Budget Estimate.	Rs.	a.	p.
(*a*)	40,916	0	0
(*b*)	83,124	10	4
Rs.	1,24,040	10	4

72. Total expenditure under both heads amounted to Rs. 1,16,756-11-11* in 1890-91 against Rs. 1,16,072-0-6 in 1889-90, being Rs. 684-11-5 more than the expenditure of the last year.

73. The increase is explained by the following details. When reading the following comparisons, it should be borne in mind, that they are made between the expenditure of the establishments as they existed in 1889-90 and the changes incurred according to the new schedule in 1890-91 :—

Particulars.	Years.	Expenditure. Rs. a. p.	Expenditure. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.

90. *Charges on account of Loans* amounted to Rs. 7,747-3-10 in 1890-91, against Rs. 6,039-5-7 in 1889-90, being,

Budget Estimate Rs. 12,600-11-2.

Rs. 1,707 14 3 more than paid in last year.

„ 95 0 0 were paid more on account of Government Loan Contingencies.

„ 1,542 15 9 on account of commission paid to Bank of Bombay for payment of Interest; and

„ 69 14 6 on account of Miscellaneous charges.

Rs. 1,707 14 3

91. *Primary Education.*—Rs. 39,500 were contributed towards Primary Education in 1890-91 against Rs. 31,374 in 1889-90, being Rs. 8,126 more than contributed last year.

Budget Estimate Rs. 40,500.

92. This increase of Rs. 8,126 was a supplementary grant given by the Corporation for Primary Education for the year 1890-91. This additional grant was passed by the Corporation at their meeting held on 22nd May 1890.

93. *School for Deaf and Dumb Mutes.*—Full grant of Rs. 1,800 were paid to this school, same as was paid in last year.

Budget Estimate Rs. 1,800.

94. *Victoria and Albert Museum.*—Rs. 9,428 were contributed to this institution in 1890-91 against Rs. 9,860-9-2 in 1889-90, being Rs. 431-11-1 less than contributed last year.

Budget Estimate Rs. 11,630.

95. *Victoria Jubilee Technical College.*—Full grant of Rs. 10,000 was paid to this institution as was paid in last year.

Budget Estimate Rs. 10,000.

96. *Veterinary College.*—Full grant of Rs. 2,500 was paid to this institution, same as in the last year.

Budget Estimate Rs. 2,500.

97. *Joint Schools Committee's Establishment.*—Rs 5,417-2-5 were paid on account of the Joint Schools Committee's Establishment in 1890-91 against Rs. 6,150 in 1889-90, being Rs. 712-13-7 less than in last year.

Budget Grant Rs. 5,880.

98. *Gokuldas Tejpal Hospital.*—Rs. 36,202-9-3 were paid towards the expenses of this hospital in 1890-91 (less Rs. 3,796-11-11 being unexpended balance of the Municipal contribution refunded, by Government, against Rs. 29,213-2-1 in 1889-90 being Rs. 3,192-11-3 more expended than last year.

Budget Estimate, Rs. 36,000.

99. *Jaffer Suleman Dispensary for Women and Children.*—Rs. 3,000 were paid in 1890-91, for this Dispensary against Rs. 6,000 in 1889-90, owing to the reduction of grant by the Standing Committee to Rs. 3,000 in last year.

Budget Estimate, Rs. 3,000.

100. *Pensions, Gratuities and Compassionate Allowances.*—Pension amounted to Rs. 27,761-15-4 in 1890-91 against Rs. 24,150-9-6 ; and Gratuity and Compassionate allowances amounted to Rs. 4,355-2-4 in 1890-91 against Rs. 4,988-11-0 in 1889-90, being Rs. 3,611-5-10 more and Rs. 633-8-8 less, respectively, than in last year.

Budget Estimate, Rs. 33,254-6-4.

101. *Discretional Contingencies.*—Rs. 4,526-3-9 were expended under this head in 1890-91 against Rs. 6,957-1-2 in 1889-90, being Rs. 2,430-13-5 less than expended last year.

Budget Estimate, Rs. 8,986-14-3.

102. We give details of charges paid out of the Discretional Contingencies Grant which was placed at the disposal of the Commissioner for the purpose of meeting unforeseen charges.

103. Details.—

The following Charges were paid from the Discretional Contingent Grant during 1890-91.

		Rs.	a.	p.
Conveyance allowance to Inspector Mr. A. R. Dawes of the Health Department from March 1890-91 ...		300	0	0

Do.	of wages of labourers employed in February 1891 on making arrangements for planting as an experimental measure 200 s. ft. of land at the Reservoir on the Flats with gram and Guinea grass	7	2	3
Do.	of charges for blue trap stone, &c., supplied in December 1889 and January 1890 for building a masonry plinth for a bear's cage in the Victoria Gardens...	215	4	9
	Carried over...Rs.	2,919	11	10

	Rs.	a.	p.
Brought forward...Rs.	2,919	11	10
Amount of charges incurred on building 12 plinths for Monkeys' Cages in the Victoria Gardens...	501	7	0
Do. of a portion of Municipal Workshop charges for erecting an iron fencing for the deer park in the Victoria Gardens	1,105	0	11
Total Rs....	4,526	3	9

104. Besides the expenditure incurred under the head of Victoria Gardens out of the regular Budget Grant under that head and from the Public Donations specially made for the improvements of the Garden, it will be observed from the details given above, that the three last items of Rs. 215-4-9, Rs. 501-7-0 and Rs. 1,105-0-11, total Rs. 1,821-12-8 were expended for building masonry plinth for animal cages and erecting iron fencing in the Victoria Gardens, from Discretional Contingencies.

105. Again there were paid from the same head Rs. 30-4-0 expense for bringing two bears and one wolf from Bhopal for the gardens; Rs. 300 were paid as compensation for a compound wall at Charni Road; and Rs. 300 for conveyance allowance to an Inspector of the Health Department, from March 1890 to February 1891. A similar allowance since August 1889 was paid from the same grant; thus it appears that items of expenditure belonging to a particular budget head are shown under two different heads of accounts.

106. We do not think that excesses on ordinary grants should be paid out of this Discretional Contingency. Should, however, any necessity arise, the charges must be debited to the proper head by a transfer, otherwise, as we have observed, the expenditure under any particular head would appear under two different heads without being known.

107. We also quote below certain remarks made by the Municipal Secretary on a Debit Voucher, No. 1809, dated 15th April 1891, for Rs. 1,500, sanctioned by the Municipal Commissioner to be paid out of his Discretional Contingencies to cover an excess of expenditure on Steam Rollers :—

"The Secretary informed the Standing Committee, at the meeting "held this day, that he had no authority to countersign Cheque "No. 4741, as the Rs. 1,500 in question were in payment of an excess "over the grant made by the Corporation last year for the purchase of "Steam Rollers, and as it was proposed to meet the charge by a tem-"porary advance from Discretional Contingencies.

"The Commissioner agreed to debit the whole of the Rs. 1,500 to "Discretional Contingencies finally, and as the Standing Committee "have no voice in the expenditure of that grant when applied to such "a charge as this, it was agreed that the Cheque be duly counter-"signed."—15th April 1891. (Sd.) H. W. BARROW, Secretary.

108. *Auditor's Allowances.*—The whole grant was expended during the year in payment of their audit fee.

Budget Estimate, Rs. 8,000.

109. *Rent of Municipal Office.*—Rs. 19,000 were expended in payment of rent of the Municipal Office in 1890-91 against Rs. 1,400 in 1889-90, owing to the rent having been increased under a renewed lease up to 31st December 1893.

Budget Estimate, Rs. 19,627-6-5.

110. The following sundry expenditure was incurred during the year 1890-91, amounting to Rs. 15,265-2-0 :—

		Rs.	a.	p.
1.	Election expenses	530	2	2
2.	Cost of survey for a scheme for removal of Town Sweepings	1,164	5	11
3.	Further expenses in connection with the Addresses to H. R. H. Prince Albert Victor and Casket, to H.R.H. the Duke of Connaught, H. E. Lord Reay and H. E. Lord Harris	1,721	8	4
4.	Remuneration, travelling and other expenses to Mr. Baldwin Latham, while engaged in advising and reporting on the question of Drainage of Bombay.	2,370	13	4
5.	Contribution towards the cost of entertainment on the occasion of the return visit of H.R. H. Prince Albert Victor of Wales.....Rs. 19,262-8- 2 *Less* Receipts ..... „ 9,784-3-11	9,478	4	3
6.	Homeless Leper Asylum at Matunga. Rs. 6,399-11-11 *Less* Receipts ..... „ 3,205- 0- 0	3,194	11	11
7.	Census Establishment :— Rs. 19,899 10 5 *Less* „ 10,928 6 3 being a moiety of expenditure recovered from Government.	8,971	4	2
		Rs. 27,431	2	1

111. *New Works.*—Rs. 63,333-12-8 were expended on new works in 1890-91 against Rs. 45,997-4-6 in 1889-90, being Rs. 17,336-8-2 more expended on new works than in last year.

112. Rs. 3,142 14 9 were expended on new works under the Health Department.

„ 3,142 9 10 on Road Department.

„ 49,016 2 6 on Drainage Department, and

„ 4,012 1 7 on Mis. Works, Assessment Ward Office.

Rs. 63,333 12 8

113. *Public Light Account.*—Cost of lighting the Town and Island of Bombay amounted to Rs. 3,03,882-2-1 in 1890-91 against Rs. 3,01,930-0-0 in 1889-90, being Rs. 1,952-2-1 more than the amount expended last year.

Budget Estimate, Rs. 3,39,879-15-9.

114. The increase is explained as under :—

Particulars.	Years.	Expenditure. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.

		Net Increase ...Rs.	1,952 2 1	

115. *Loss on Municipal Workshops.*—Loss of Rs. 4,072-7-2 on the working of the Municipal Workshops during the year 1890-91 is explained under the head of this account, on the receipt side in paras. 54 to 56.

116. While framing the Budget relating to Workshops, it was estimated that the Workshops expenditure would be balanced by Workshops receipts, but contrary to this expectation, the expenditure exceeded the recoveries *plus* outstandings and the result has been a loss of Rs. 4,072-7-2.

117. In our opinion some satisfactory explanation of the causes of the loss should have been given.

118. Loss on account of Private Works Irrecoverable Bills, amounting to Rs. 6,649-10-6, which was sanctioned to be written off by order of the Standing Committee.

119. With reference to these bills, we beg to observe that while writing them off or transferring the charges to Departmental Works owing to errors, original bills were not produced. This procedure was, to say the least, most irregular, inasmuch as there was no guarantee that recoveries were not made and appropriated by parties concerned as was done some time ago by a water Mukadam. For particulars *vide* Chief Accountant's Report, page 74, for the year 1889-90.

120. We further beg to bring to the notice of the Standing Committee and of the Council another irregularity in a case where a lump sum of Rs. 1,000 was charged to the Pawai Engines, as cost of fuel which was obtained from the wood of the trees felled on the land forming the basin of the reservoir, without giving, for that sum, any detail as to the quantity of wood consumed, and rate charged, to enable one to calculate how the Rs. 1,000 were arrived at.

121. Similarly in Workshops Vouchers Nos. 145 and 346, dated 31st March 1891, on account of Loan Works, Work constructed out of Loans (Erskine Road Market Extension) and New Works, Ward Offices, Assessment Department, actual expenses *plus* 25 per cent., amounting to Rs. 42,373 and Rs. 3,786, respectively, are charged for constructing and erecting iron work, and building the said office at Sankli Tank, without giving any detail as to quantities of the work and rates charged, to enable us to compare the quantities and rates shown in the sanctioned estimate prepared for the former work.

122. The latter work seems to have been undertaken without any previous estimate, and in the absence of detailed quantities of the work contrasted with the estimated quantities and estimated or petty works contractor's or ruling market rates, one cannot express an opinion as to the cheapness or otherwise of Buildings, &c., constructed departmentally by the Municipal Workshops.

123. We have enumerated some of these instances only with the object that measures may be adopted in future to check irregularities which have been pointed out.

124. *General Police Account* (including Police Hospital) and *Steam Fire Brigade Establishment.*—Expenditure under the head of General Police and Fire Brigade, amounted to Rs. 2,58,285, and Rs. 1,29,291-0-4, respectively; the whole total being Rs. 3,87,576-7-4 in 1890-91 against Rs. 3,52,192-6-3 in 1889-90, being Rs. 35,384-1-1 more than expended last year.

Budget Estimate, Rs. 2,58,289.
Budget Estimate, Rs. 1,68,910-5-10.

125. The increase is explained by the following details :—

Particulars.	Years.	Expenditure. Rs. a. p.	Expenditure. Rs. a. p.	Increase. Rs. a. p.	Decrease. Rs. a. p.

128. *Loan Works, Water Works.*—During the year under report, the following further expenditure was incurred, with the sanction of the Municipal Council, in connection with Water Works, out of the various loans. They amount in all to Rs. 39,64,941-1-11 in 1890-91 against Rs. 37,74,598-3-4 in 1889-90, being Rs. 1,90,342-12-7 more than expended last year. The following are the particulars of the work executed in 1890-91 :—

			Rs. a. p.
1.	On further Tansa Works, from Tansa Loan		34,38,284 13 2
2.	Extension of Catch-water Channels at Tulsi	From 35 Lakhs various Sanitary Works Loans.	6,946 7 10
3.	Providing an asphalt surface to the floor of the settling basin at Malabar Hill Reservoir and other works in connection therewith		76,875 14 7
4.	On Pawai Water Works		3,75,838 12 0
5.	Additional Water Mains		65,645 4 4
6.	Sundries...		349 14 0
	Total of Loan Works Water Works ...Rs.		39,64,941 1 11

129. *Surface Drainage Works.*—A further sum, expended on these works during the year, amounted to Rs. 125-5-8, which, when added to the total of the preceding year, amounting to Rs. 13,15,773-9-8, makes a total of Rs. 13,15,898-15-4 up to 31st March 1891.

130. *New Drainage Works.*—A further sum, amounting to Rs. 4,12,988-6-5 was expended on these works during the year 1890-91, which, when added to the sum of Rs. 33,24,758-7-11, expended up to 31st March 1890, makes a total of Rs. 37,37,746-14-4 up to 31st March 1891.

131. *New Roads made out of Loans.*—A further sum of Rs. 1,66,818-8-1 was expended under this head in 1890-91, which, when added to the total of Rs. 1,87,303-14-0 on 31st March 1890, makes a total of Rs. 3,54,122-6-1 up to 31st March 1891.

132. *Extension of Markets.*—A further sum of Rs. 24,904-14-3 was expended on the Erskine Road Market and Bhuleshwar Market during the year 1890-91, which, when added to Rs. 2,14,652-14-0 expended in 1889-90, and Rs. 2,86,570-15-4 in previous years, makes a grand total of Rs. 5,26,128-11-7 up to 31st March 1891.

133. *New Municipal Building.*—A further sum of Rs. 2,53,933-5-7 was expended on the construction of the New Municipal Buildings, which sum, when added to the total expended up to 31st March 1890, makes a total of Rs. 4,40,321-5-5 up to 31st March 1891.

134. *Dhobiwada Lines* at Mahalaxmi were enlarged during the last year by an expenditure of Rs. 7,832-0-7 and a chawl for Hallalkhor was constructed in Khershedjee Sukhlajee Street at an outlay of Rs. 181-0-0.

135. *Liabilities and Assets.*—In accordance with the provision of the Municipal Act, the accounts of the Vehar Water Works Fund are kept entirely separate and distinct from other accounts of the Municipal Funds; hence the Liabilities and Assets of the Municipal Fund are shown separately in Schedules Nos. 4 and 5 and of the Water Works in Schedule No. 6.

136. From Schedule No. 4 it will appear that the total Liabilities of the Municipal Fund, amounted to Rs. 1,19,96,281-4-9 in 1890-91 against Rs. 92,47,127-0-0 in 1889-90, being Rs. 27,49,154-4-9 more than the Liabilities of the last year.

137. The Assets of the Municipal Fund amounted to Rs. 2,48,93,873-0-5 in 1890-91 against Rs. 2,14,95,708-14-9 in 1889-90 (including Rs. 14,43,468-10-3, being the balance due by the Water Works Fund to the Municipal Fund), there was an increase of Assets amounting to Rs. 33,98,164-1-8 over the Assets of the last year.

138. The Liabilities of the Water Works Fund amounted to Rs. 2,37,03,452-5-6 in 1890-91 against Rs. 1,98,43,947-6-4 in 1889-90 being Rs. 38,59,504-15-2 more than the Liabilities of the last year.

139. The Assets of the Water Works Fund amounted to Rs. 2,58,86,976-4-8 in 1890-91 against Rs. 2,19,76,632-12-1, being 39,10,343-8-7 more than the Assets of the last year.

140. *Scrutiny of Collections and Outstanding Bills of Rates and Taxes for the year* 1890-91 *and of previous years.*

141. *Collections.*—During the year under report there were issued, by the Assessor and Collector, 85,703 net demand assessment bills, amounting in value to Rs. 33,96,302-3-9.

142. To the abovementioned number of bills were added 326 additional bills for the year 1889-90 and for previous years up to 1886-87, inclusive of the value of Rs. 19,164-11-5, making the total of all collections to 86,054 bills, amounting to Rs. 34,15,466-15-2.

143. Adding to this the amount of Government and Port Trust contribution bills of the value of Rs. 2,29,265-5-0 and the amount of Rs. 3,07,710-5-11, being the outstandings of the last year, 1889-90, the total value of collection bills amounted to Rs. 39,52,442-10-1 for the year 1890-91.

144. Out of the abovementioned Rupees 30,52,442-10-1, Rs. 32,75,666-10-9 were collected by the Assessor and Collector, and Rs. 2,13,900-3-7 were paid by Government and Port Trust *direct* to the Municipality, making a total of collections received of Rs. 34,89,566-14-4, which left a balance of Rs. 4,62,875-11-9.

145. Adding to this Rs. 1,928-2-10, the amount of meter hire, the whole total of outstandings amounted to Rs. 4,64,803-14-7.

146. From the whole total were deducted Rs. 27,223-2-10, being the reduced value of bills for the year 1889-90, there remained, therefore, Rs. 4,37,580-11-9 as a net total outstanding for the year 1890-91.

147. We give in detail, in the annexed form of Appendices, marked A, B, C and D, the result of our scrutiny of the outstanding balances for the year 1890-91, and of the previous years up to 1882.

148. Appendix A shows outstandings for the year 1890-91, amounting to 6,647 bills of the value of Rs. 3,23,815-0-10, including 26 *defalcated bills* of the value of Rs. 14,322-8-6.

149. Appendix B shows outstandings for the year 1889-90 and of previous years up to 1882 inclusive, amounting to 1,320 bills of the value of Rs. 88,213-9-6, including 10 *defalcated bills* of the value of Rs. 17,564-4-0.

150. Appendix C shows outstandings of disputed bills and bills for inquiry and for correction or for cancelling, amounting to Rs. 25,552-1-5. These were bills relating to Port Trust Properties, pending the settlement of assessment on them.

151. Appendix D is a summary of the abovementioned three Appendices A, B and C, and shows the grand total of all outstandings on the 31st day of March 1891, amounting to 6,647 bills of the value of Rs. 4,37,580-11-9 against Rs. 3,07,710-5-11, being Rs. 1,29,870-5-10 more than the outstandings of the last year.

152. We give below a *resumé* of the above statements in the following figures :—

			Rs.	a.	p.	Rs.	a.	p.

Total outstandings on the 31st day of March 1891...Rs.				4,37,580	11	9

153. *Defalcations in* the collections of rates and taxes, committed by a Bill Collector of A Ward, Fort, amounted to Rs. 31,886-12-6. There were 10 bills for the year 1889-90 amounting to Rs. 17,564-4-0 and 26 bills of the value of Rs. 14,322-8-6 for the year 1890-91.

154. While referring to the subject of defalcations, we feel the necessity of inviting the attention of the Standing Committee and of the Council to the practice in vogue of stamping all bills of rates and taxes with a stamped signature seal of the Assessor and Collector. We are fully aware of the laborious task of signing with hand more than one hundred thousand bills every year, but at the same time we cannot remain indifferent to the fact, how easy it is to imitate a stamped signature seal, and misuse it on blank bill forms and endeavour to pass them as genuine bills undetected.

155. *Lapsed Grants.*—We think it proper also to say a word on the nature of this grant. We consider it advisable, that lapsed grants which are in some cases renewed from year to year and that successively for seven or eight years without being expended, should not be renewed for more than one year following that in which it was made.

We do not think the Legislature contemplated that an expenditure should be budgeted for which was not likely to be spent, even partially, if not wholly, in the budgeted year, and to admit of the balance being expended in the following year on the completion of the work originally budgeted for, which could not, on account of peculiar circumstances, be completed within the budget year, it was, we believe, provided that such balance, if not taken credit for as cash balance, should be renewed by the Standing Committee.

We have the honor to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI RASTAMJI RANINA,

Municipal Auditors.

BOMBAY, *8th September* 1891.

To

H. W. BARROW, Esq.,

Municipal Secretary,

Bombay.

Sir,

In accordance with the 137th Section of the Bombay Municipal Act of 1888, we have the honor to forward four Appendices, marked A, B, C, and D, containing the result of our scrutiny of the Outstanding Bills of Rates and Taxes, which were in the hands of the Ward Clerks and in the Office of the Assessor and Collector on the 31st day of March 1891.

As these Appendices will have to be annexed to our Annual Report on Municipal Accounts for the year 1890-91 now under preparation, we have to request you to place the Appendices in the hands of the printers, to be ready in time to be published with the Report.

We have the honor to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI RASTAMJI RANINA,

Municipal Auditors.

Bombay, 28*th July* 1891.

ARDASEER FRAMJEE MOOS,
NANABHAI RASTAMJI RANINA, } *Municipal Auditors.*

BOMBAY, 28*th July* 1891.

To

H. W. BARROW, Esq.,

Municipal Secretary,

Bombay.

Sir,

In continuation of our Report on Municipal Accounts, forwarded to you on the 8th September last, we have the honor to state, for the information of the Standing Committee, that we have examined the adjusting and cross entries and compared them with the books of the Municipality and Appendices 3, 4, 5, 6, 7 and 8, and find they have been correctly extracted from the books.

We have the honor to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI RASTAMJI RANINA,

Municipal Auditors.

Bombay, 5*th October* 1891.

BOMBAY, 22*nd September* 1891.

To

H. W. BARROW, ESQ.,

Municipal Secretary.

Sir,

In accordance with the Joint Schools Committee's Bye-law No. 15 passed by the Municipal Council, we have the honor to send in our Report on the Accounts of the Municipal Schools, from 1st February 1890 to 31st March 1891, for submission to the Council.

We have the honor to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI RASTAMJI RANINA,

Municipal Auditors.

REPORT ON THE ACCOUNTS OF THE JOINT SCHOOLS COMMITTEE.

In accordance with the Joint Schools Committee's Bye-law No. 15, we have examined the vouchers and papers relating to Receipts and Disbursements of the schools in charge of the Joint Schools Committee from 1st February 1890 to 31st March 1891, being 14 months.

2. We have compared the Day-book with Ledger, Journal, and Bank's Pass-book, &c., and found them all in order.

3. We have, however, to observe that the provision of Bye-law No. 2, regarding the daily payment of all receipts into the Bank and the details prescribed in Bye-laws Nos. 12 and 13, regarding Acquittance Roll and Pay Abstract are not strictly observed, which, we think, should be attended to in future.

4. The account books are, on the whole, kept well; still we would suggest that all items should be carefully entered in the Cash-book in the order of date, and on no account should interlineations be allowed in case of omission from oversight; and further that the Daily Cash-book should be signed by the Book-keeper, and some responsible officer should initial it after proper examination of the entries.

5. We would also suggest the advisability of opening a few more heads of account in the daily Cash-book, such as Deposit Account, Open and Suspense Account, Advance Account, and Petty Charges Account, &c., in order that the receipts and expenditure may be conveniently entered under separate heads, instead of mixing them all in one head.

6. The accounts show receipts amounting to Rs. 1,10,461-10-0, and expenditure to Rs. 95,719-0-7, leaving a credit balance of Rs. 14,742-9-5 into the hands of the Joint Schools Committee, on the 31st March 1891.

We have the honor to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI RASTAMJI RANINA,

Municipal Auditors.

BOMBAY, *22nd September* 1891.
